[57] CLAIM

The ornamental design for an electro-optic display for a timepiece, as shown and described.

DESCRIPTION

FIG. 1 is a front elevational view of an electro-optical display for a timepiece showing our new design with all of the elements shown but in a non-energized condition, the rear, not shown, being flat, plain, and unornamented;

FIG. 2 is a right side elevational view, the left side being a mirror image thereto;

FIG. 3 is a front elevational view thereof in a typical energized condition with the alarm activated at 10:11.31 p.m.;

FIG. 4 is a bottom plan view, the top plan being a mirror image thereto.

FIG. 1

FIG. 2

FIG. 3

FIG. 4
