[57] CLAIM

The ornamental design for a visual control panel for television monitor for monitoring the position of individual elevators of a group of elevators or similar article, as shown and described.

DESCRIPTION

The single FIGURE is a front view of our visual control panel for a television monitor for monitoring the position of individual elevators of a group of elevators or similar article. The rear, sides, top and bottom of the visual control panel are essentially flat. The panel is flat with no substantial thickness.
