[57] **CLAIM**

The ornamental design for an automated telephone communicating machine, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of an automated telephone communicating machine embodying the present design in two components, a first component and a second component, the first component being shown resting on top of the second component.

FIG. 2 is a perspective view only of the first component thereof.

FIG. 3 is a top plan view of the first component thereof.

FIG. 4 is a front elevational view of the first component thereof.

FIG. 5 is a bottom plan view of the first component thereof.

FIG. 6 is a right-hand side elevational view of the first component thereof, the left-hand side elevational view being a mirror image thereof.

FIG. 7 is a back elevational view of the first component thereof.

FIG. 8 is a perspective view of only the second component thereof.

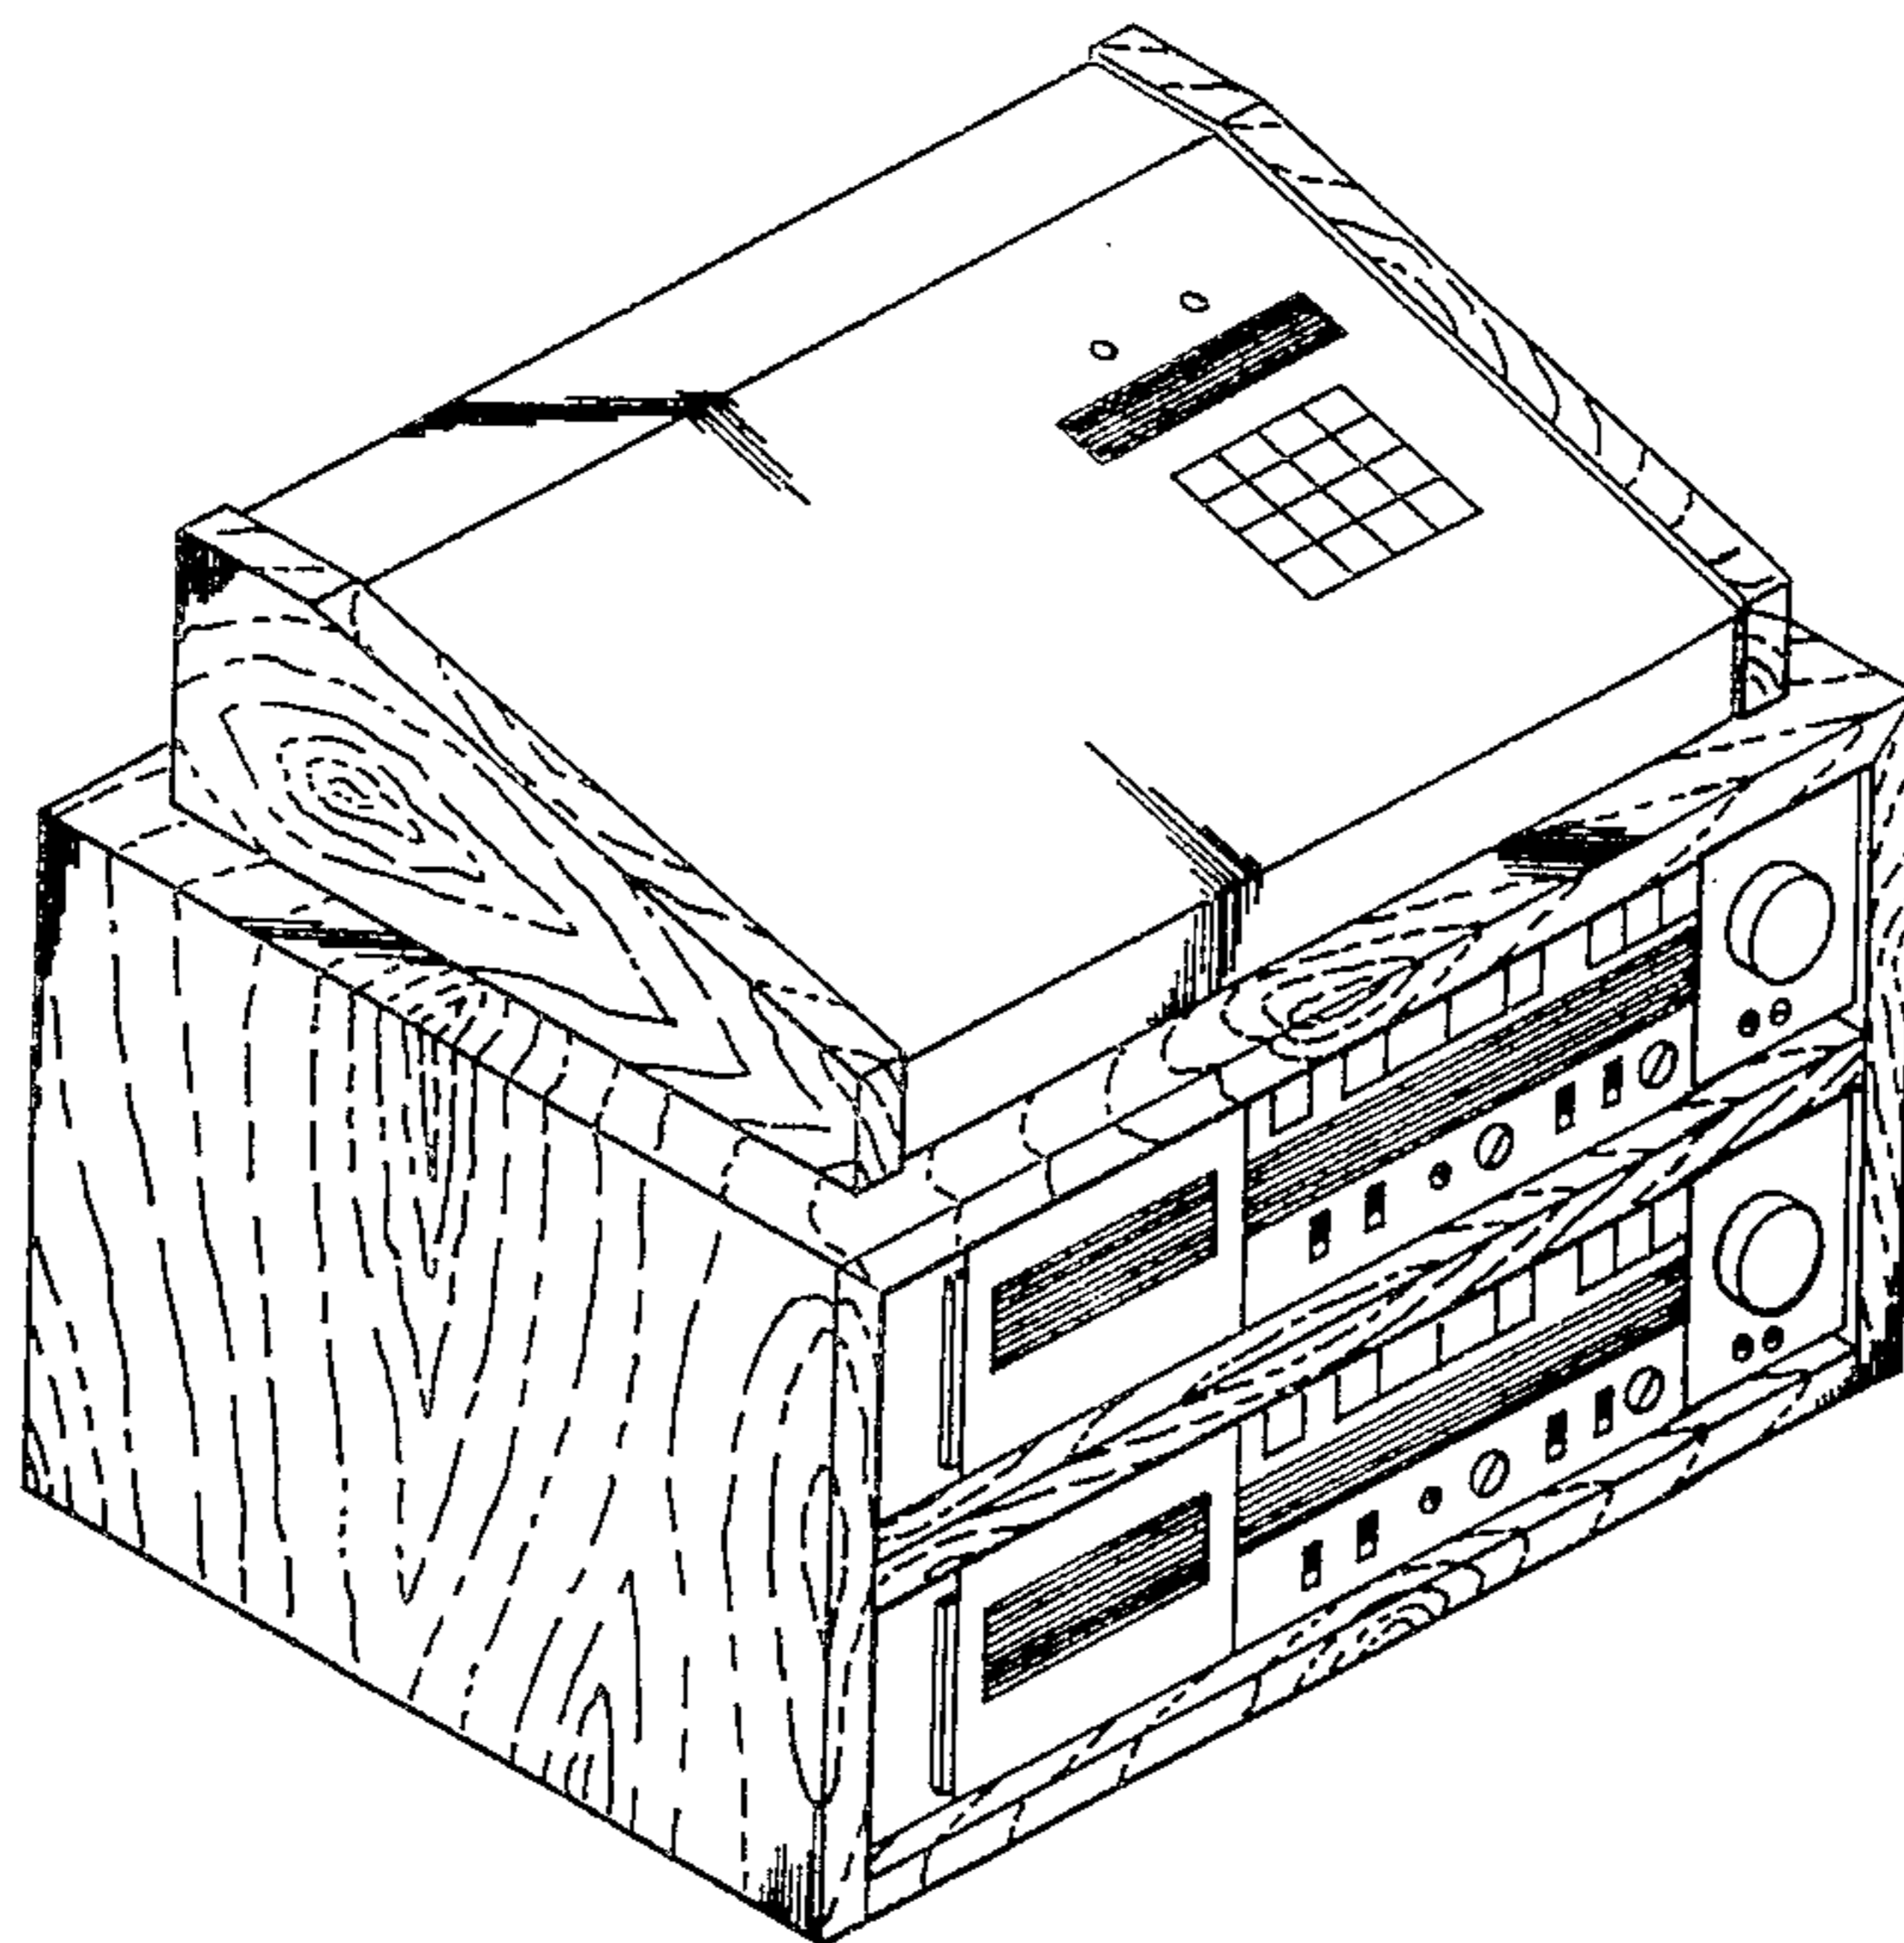

FIG. 9 is a top plan view of the second component thereof.

FIG. 10 is a front elevational view of the second component thereof.

FIG. 11 is a bottom plan view of the second component thereof.

FIG. 12 is a rear elevational view of the second component thereof.

FIG. 13 is a right-hand elevational view of the second component thereof, the left-hand side elevational view being a mirror image thereof.
