**CLAIM**

The ornamental design for a seating unit for a patient's chair, substantially as shown and described.

**DESCRIPTION**

FIG. 1 is a right side elevational view of a seating unit

for a patient's chair, shown in a fully reclined position, illustrating the ornamental design of the invention.

FIG. 2 is a left side elevational view of a seating unit for a patient's chair, shown in a fully upright position, illustrating the ornamental design of the invention.

FIG. 3 is a front perspective view of a seating unit for a patient's chair, shown in a fully upright position, illustrating the ornamental design of the invention.

FIG. 4 is a rear perspective view of a seating unit for a patient's chair, shown in a fully upright position, illustrating the ornamental design of the invention.

FIG. 5 is a right side elevational view of an alternate embodiment of a seating unit for a patient's chair, shown in a fully reclined position, illustrating the ornamental design of the invention.

FIG. 6 is a left side elevational view of an alternate embodiment of a seating unit for a patient's chair, shown in a partially reclined position, illustrating the ornamental design of the invention.

FIG. 7 is a front perspective view of an alternate embodiment of a seating unit for a patient's chair, shown in a fully upright position, illustrating the ornamental design of the invention.

FIG. 8 is a rear perspective view of an alternate embodiment of a seating unit for a patient's chair, shown in a fully upright position, illustrating the ornamental design of the invention.

FIG. 9 is a top perspective view of an alternate embodiment of a seating unit for a patient's chair, shown in a fully upright position, illustrating the ornamental design of the invention.

In each of the Figures, the seating unit is shown for illustrative purposes as being mounted on a base, which is shown broken away at the bottom to conserve space.
