Attorney, Agent, or Firm-Robert E. Stebens

[57] CLAIM

The ornamental design for a mud flap for trucks, as shown and described.

DESCRIPTION

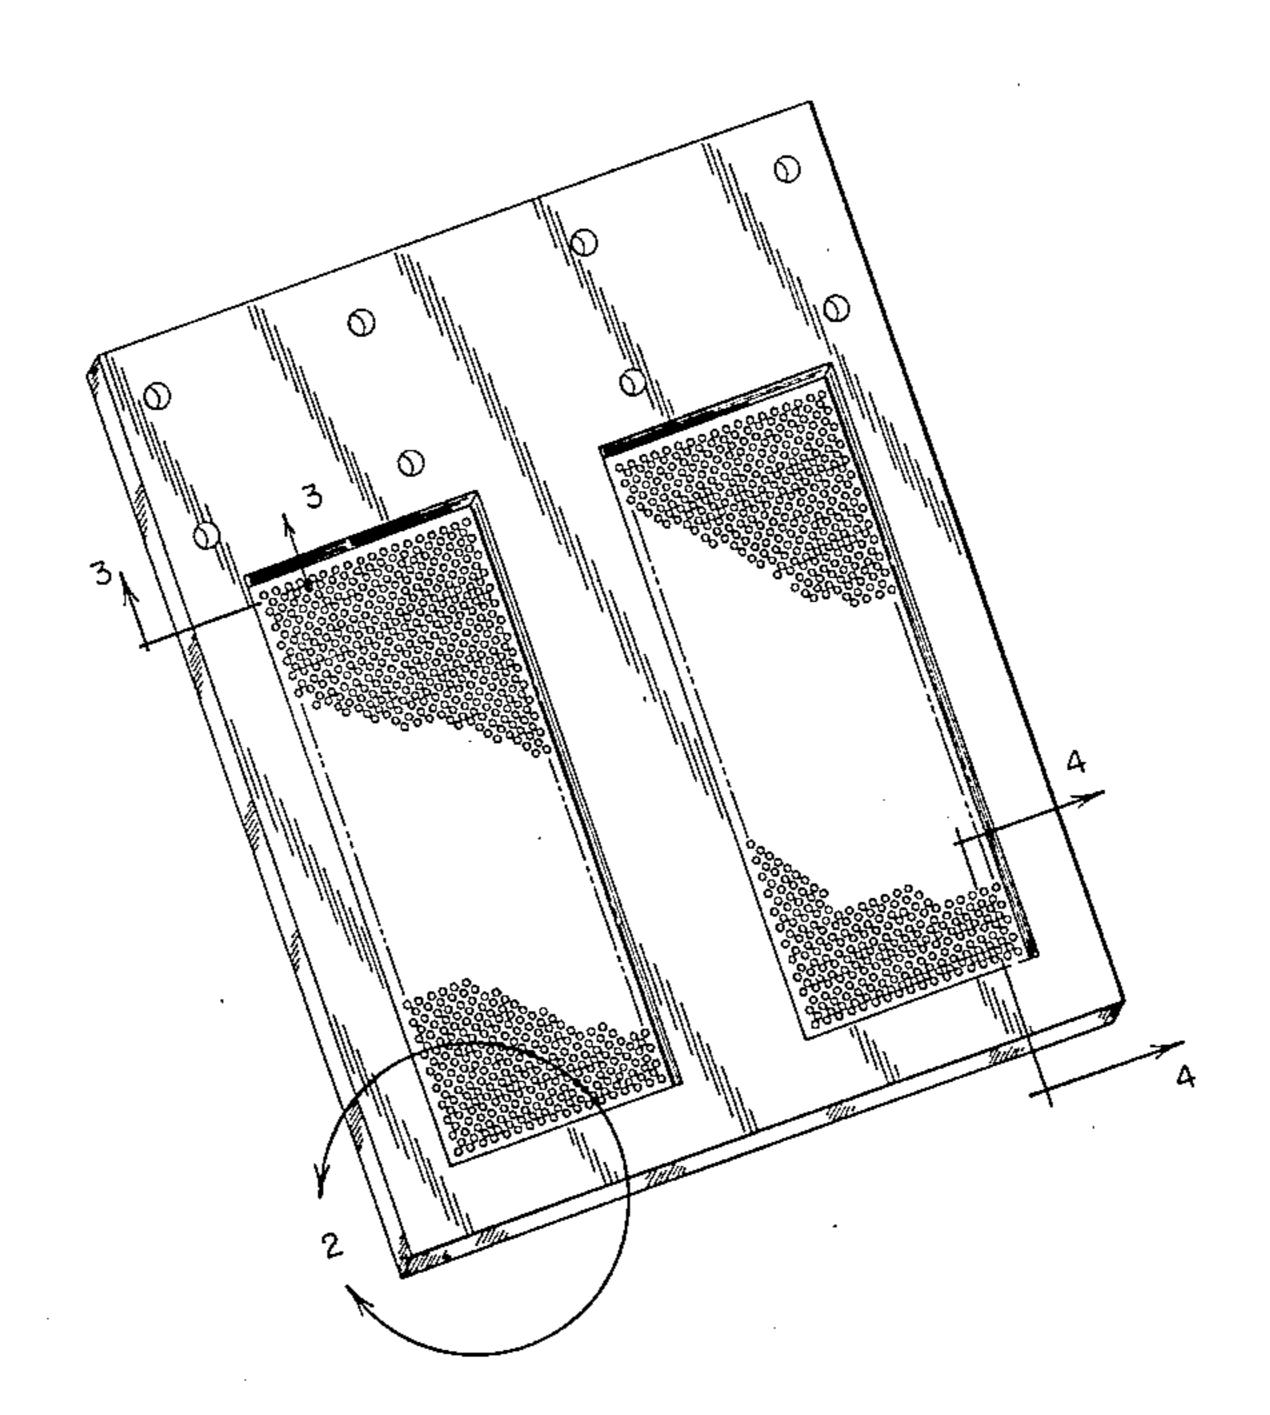

FIG. 1 is a perspective view of a mud flap for trucks showing my new design, it being understood that the pattern of projections is repeated uniformly throughout the entire surface of the two recessed rectangular areas as shown schematically by dot-dash lines.

FIG. 2 is a fragmentary plan view on an enlarged scale of the lower left corner thereof in the region of the circle 2 of FIG. 1.

FIG. 3 is a fragmentary sectional view thereof on a substantially enlarged scale taken along line 3—3 of FIG. 1.

FIG. 4 is a fragmentary sectional view thereof on a substantially enlarged scale taken along line 4—4 of FIG. 1.

The surface of the mud flap opposite to that shown in FIG. 1 is substantially flat and unornamented. The longitudinal and transverse edge surfaces at the right side and at the top of the mud flap are mirror images of the respective left side and bottom edge surfaces shown in FIG. 1. The border of the mud flap has been shown as broken in FIGS. 3 and 4 for convenience of illustration.

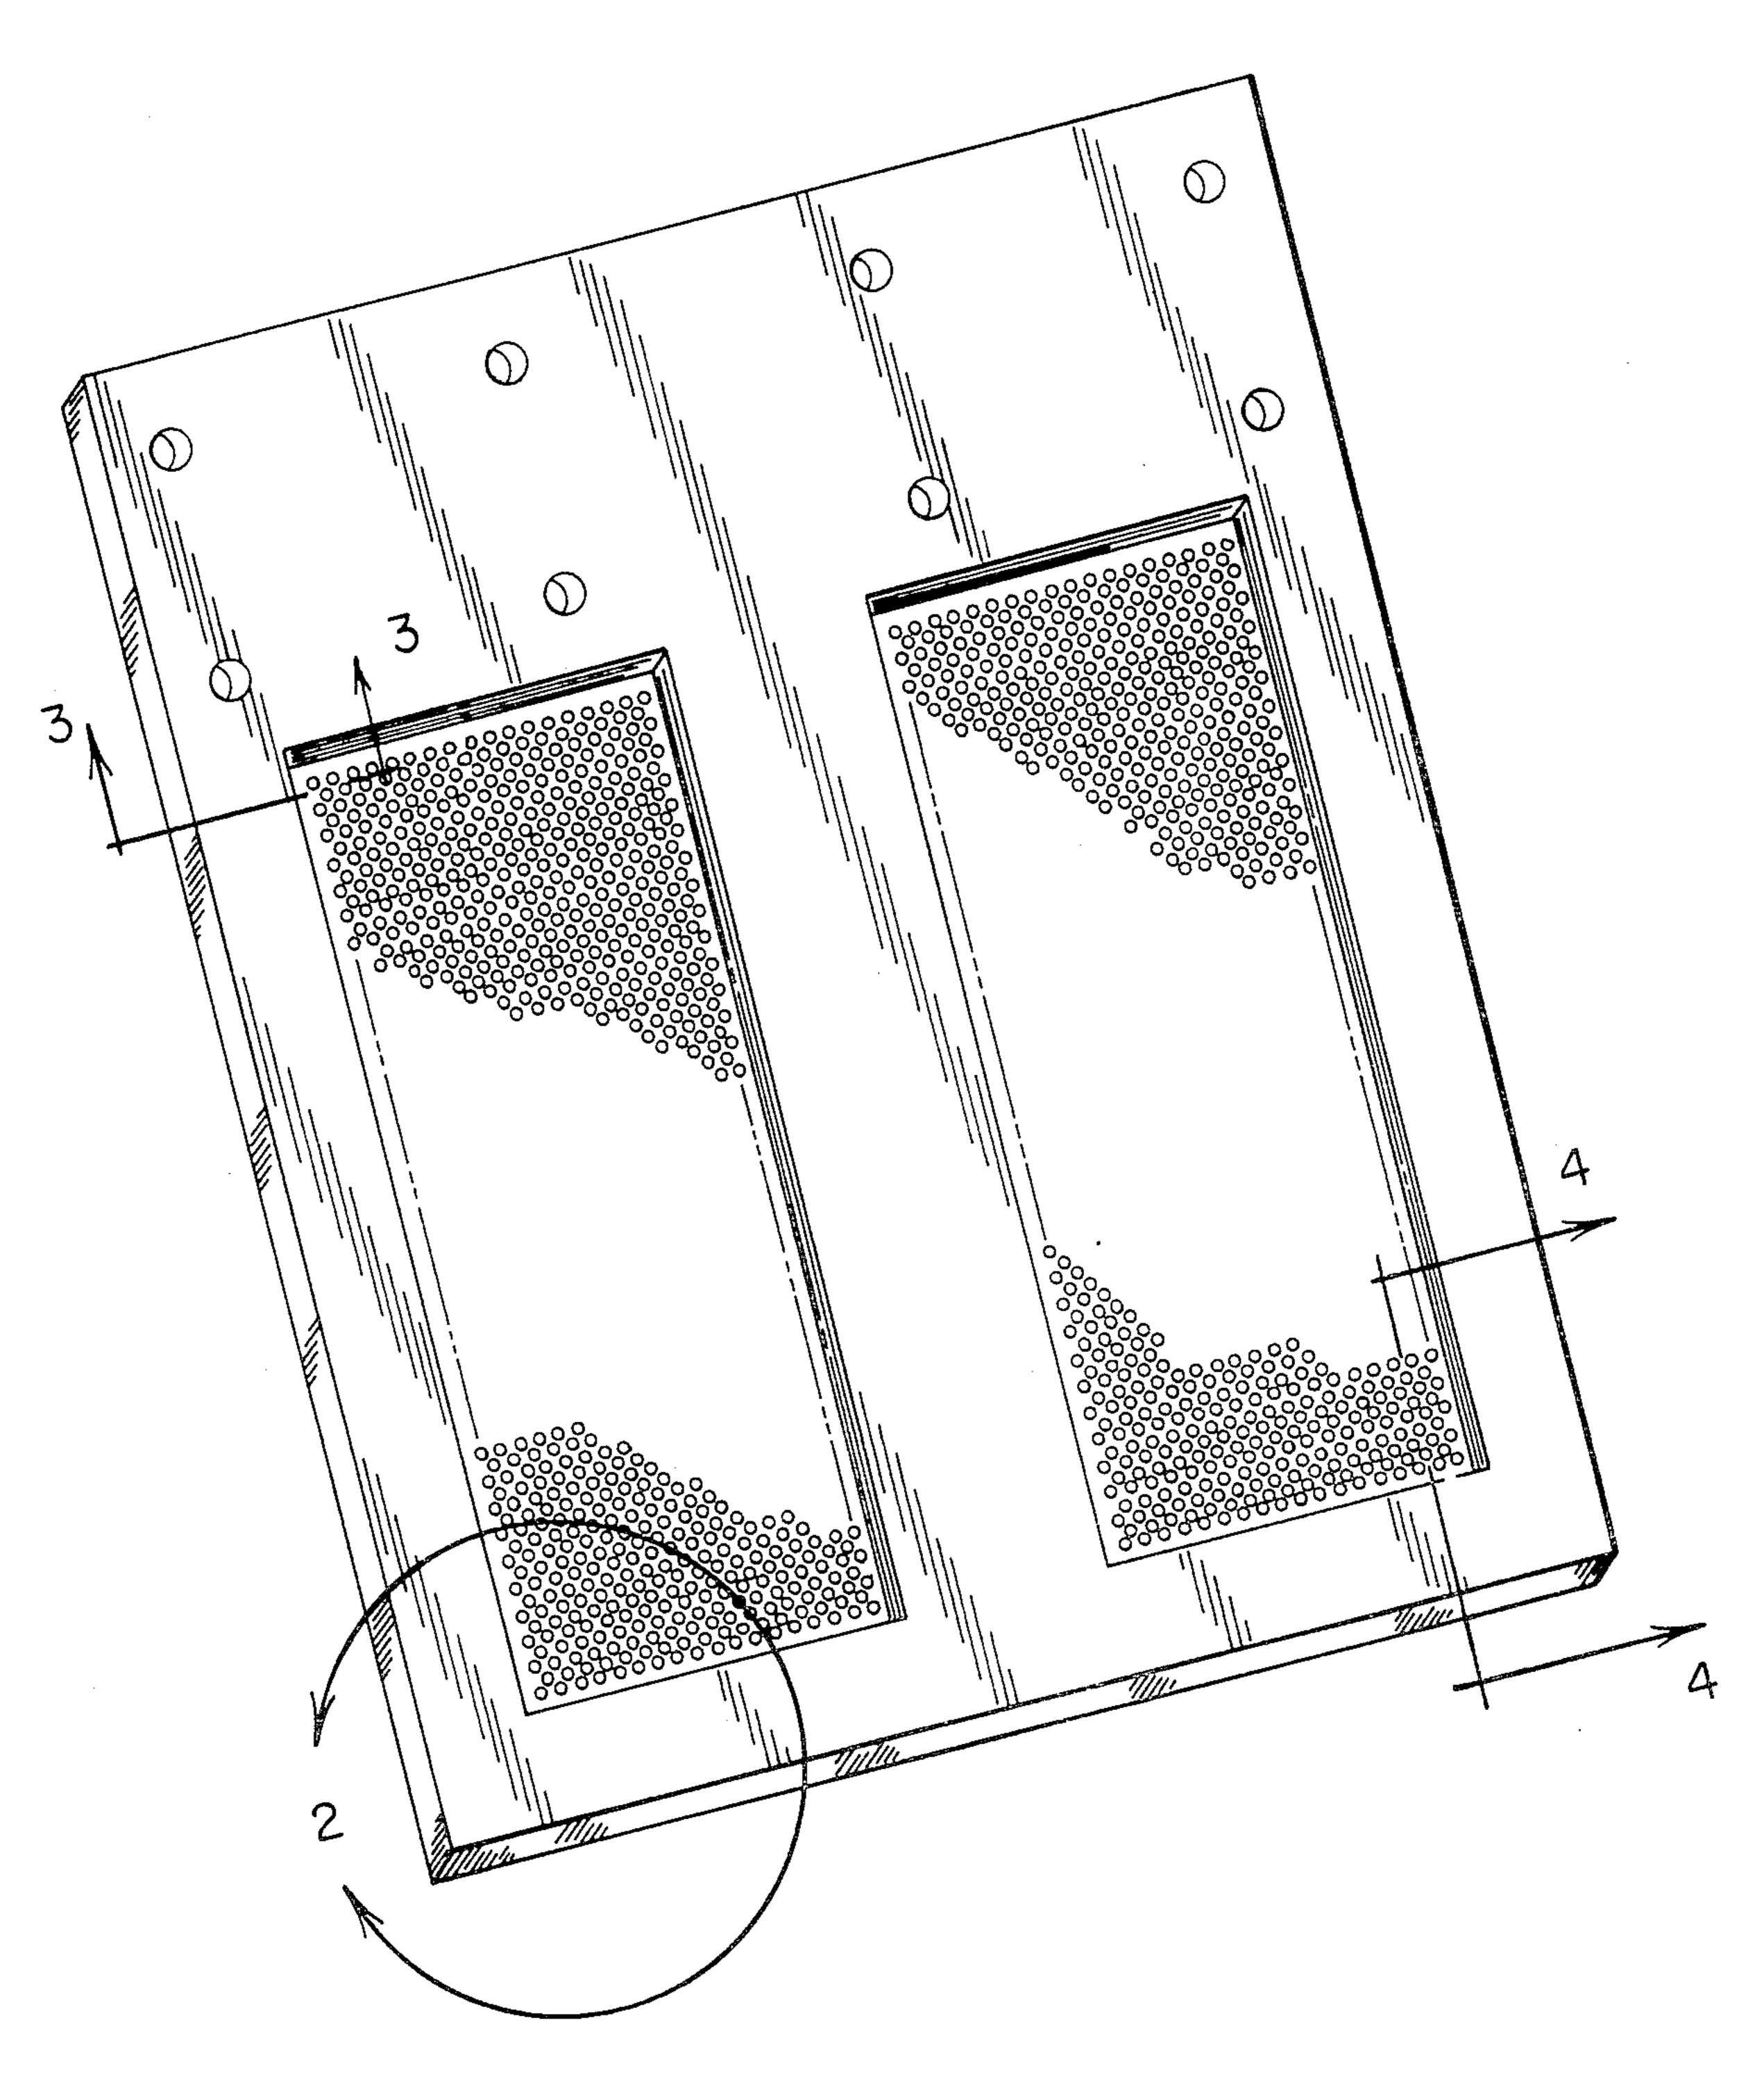

FIG. I

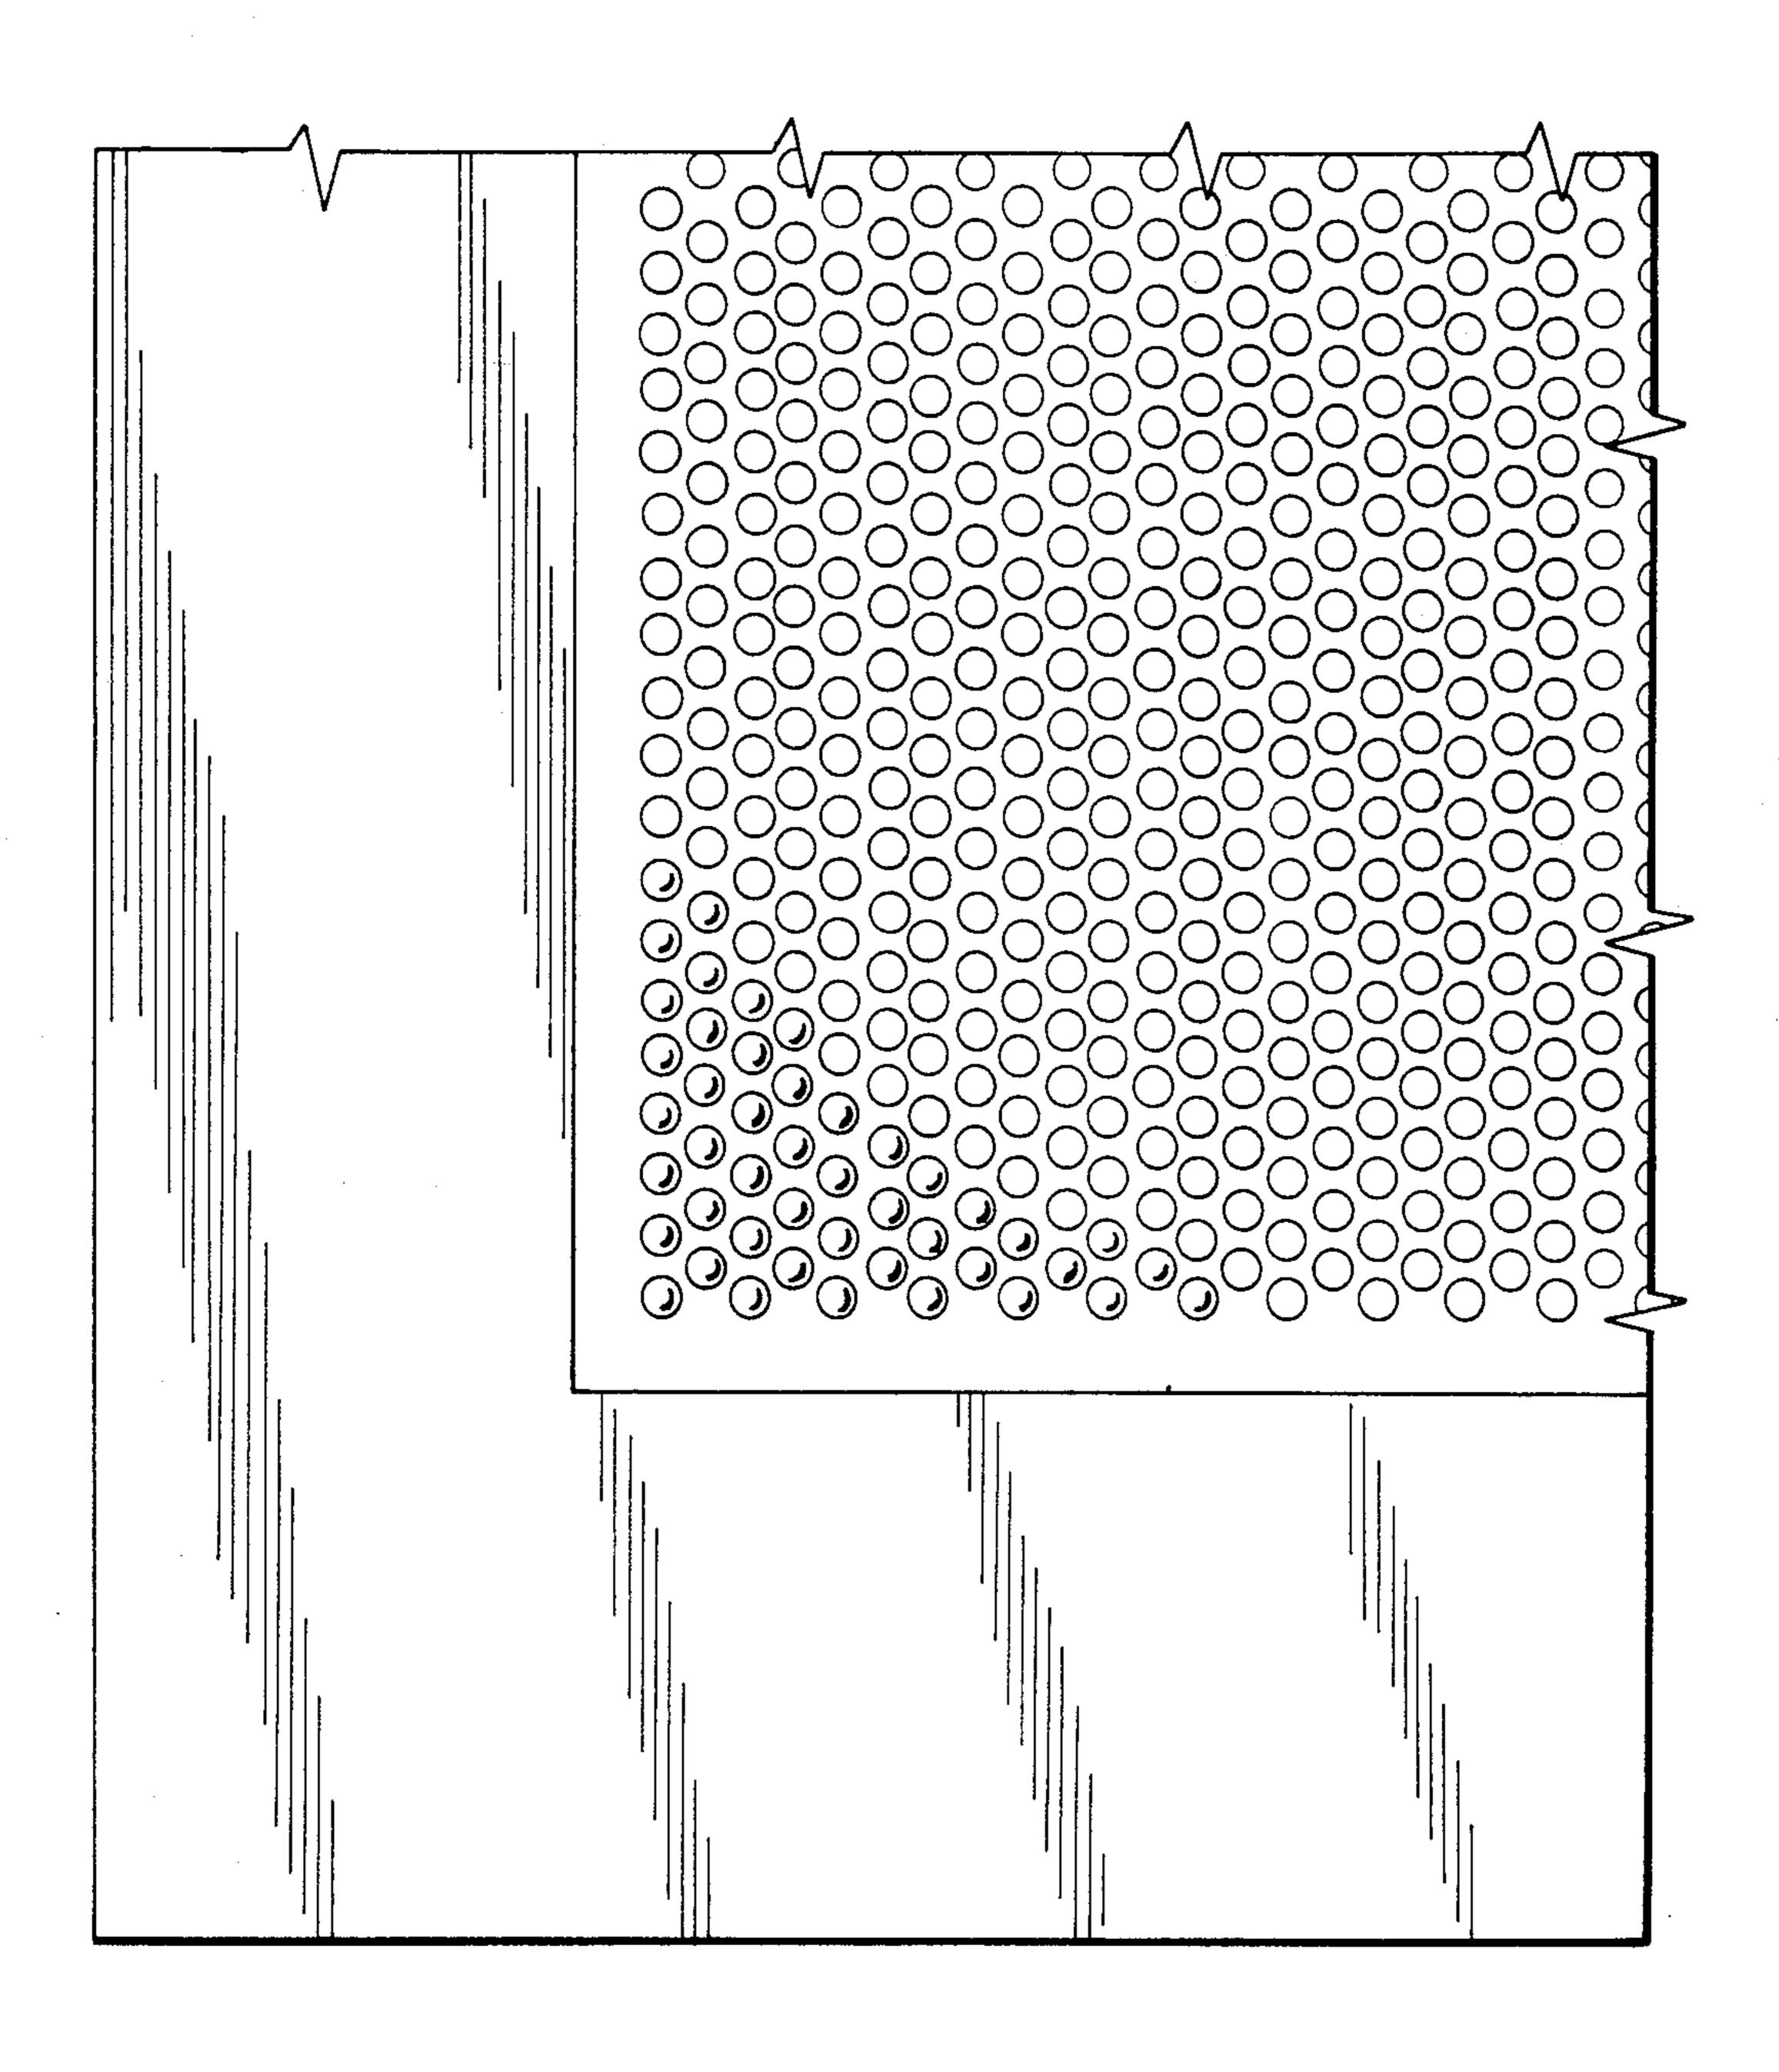

FIG. 2
