[57] CLAIM

The ornamental design for a combined massager and back scratcher, substantially as shown and described.

DESCRIPTION

FIG. 1 is a top plan view of a combined massager and back scratcher embodying my new design, the massager having the appearance of golf balls;

FIG. 2 is a front elevational view thereof;

FIG. 3 is a rear elevational view thereof;

FIG. 4 is a bottom plan view thereof;

FIG. 5 is an elevational view showing the right-hand end thereof;

FIG. 6 is an elevational view showing the left-hand end thereof; and,

FIG. 7 is a fragmentary view showing a modified design of the end of the massager and back scratcher shown in FIGS. 1 through 6, the massager having the appearance of tennis balls.

The novelty in the present design resides in the combination of the particular shaft with the pair of spherical massaging means at one end and the back scratching means at the other end. The modified device shown in FIG. 7 includes the above mentioned design features, and only the precise appearance of the spherical massaging members has been varied.
