[57] **CLAIM**

The ornamental design for a cordless telephone assem-

bly including a transmitter/receiver base unit, a transceiver handset and cradle stand therefor, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of a cordless telephone assembly including a transmitter receiver base unit, a transceiver handset and cradle stand therefor, showing my new design, with the handset shown mounted on the cradle;

FIGS. 2 and 6 are respectively front and rear end elevational views of the base unit;

FIGS. 3 and 7 are respectively top and bottom plan views of the base unit;

FIGS. 4 and 5 are respectively left and right side views of the base unit;

FIGS. 8 and 10 are respectively top and underside plan views of the handset unit;

FIG. 9 is a side elevational view of the handset, the side opposite being a mirror image;

FIGS. 11 and 12 are respectively front and rear elevational views of the handset;

FIGS. 13 and 15 are respectively top and bottom plan views of the cradle unit;

FIG. 14 is an elevational view of one side of the cradle unit, the side opposite being a mirror image;

FIGS. 16 and 17 are respectively front and rear elevational views of the cradle unit;

FIG. 18 is a left side, inner, operational surface, and front end perspective view, of the handset from above, the same perspective view from the opposite side being substantially a mirror image; and

FIG. 19 is a left side, top upper surface and front end perspective view of the cradle unit from above, the same perspective view from the opposite side being substantially a mirror image.

Applicant's cordless telephone assembly as described in FIG. 1 is shown in that figure with the component units bracketed together to indicate the article of manufacture claimed under 35 U.S.C. 171. In remaining FIGS. 2-19, the three individual units of the assembly are shown separately for facility, expediency and clarity of illustrative disclosure.
