[57] CLAIM

The ornamental design for a luggage case, substantially as shown and described.

DESCRIPTION

FIG. 1 is a side elevational view of a luggage case showing my new design, the hardware shown in dotted lines being for illustrative purposes only and not a part of the design;

FIG. 2 is an opposite side elevational view thereof;

FIG. 3 is a top plan view thereof;

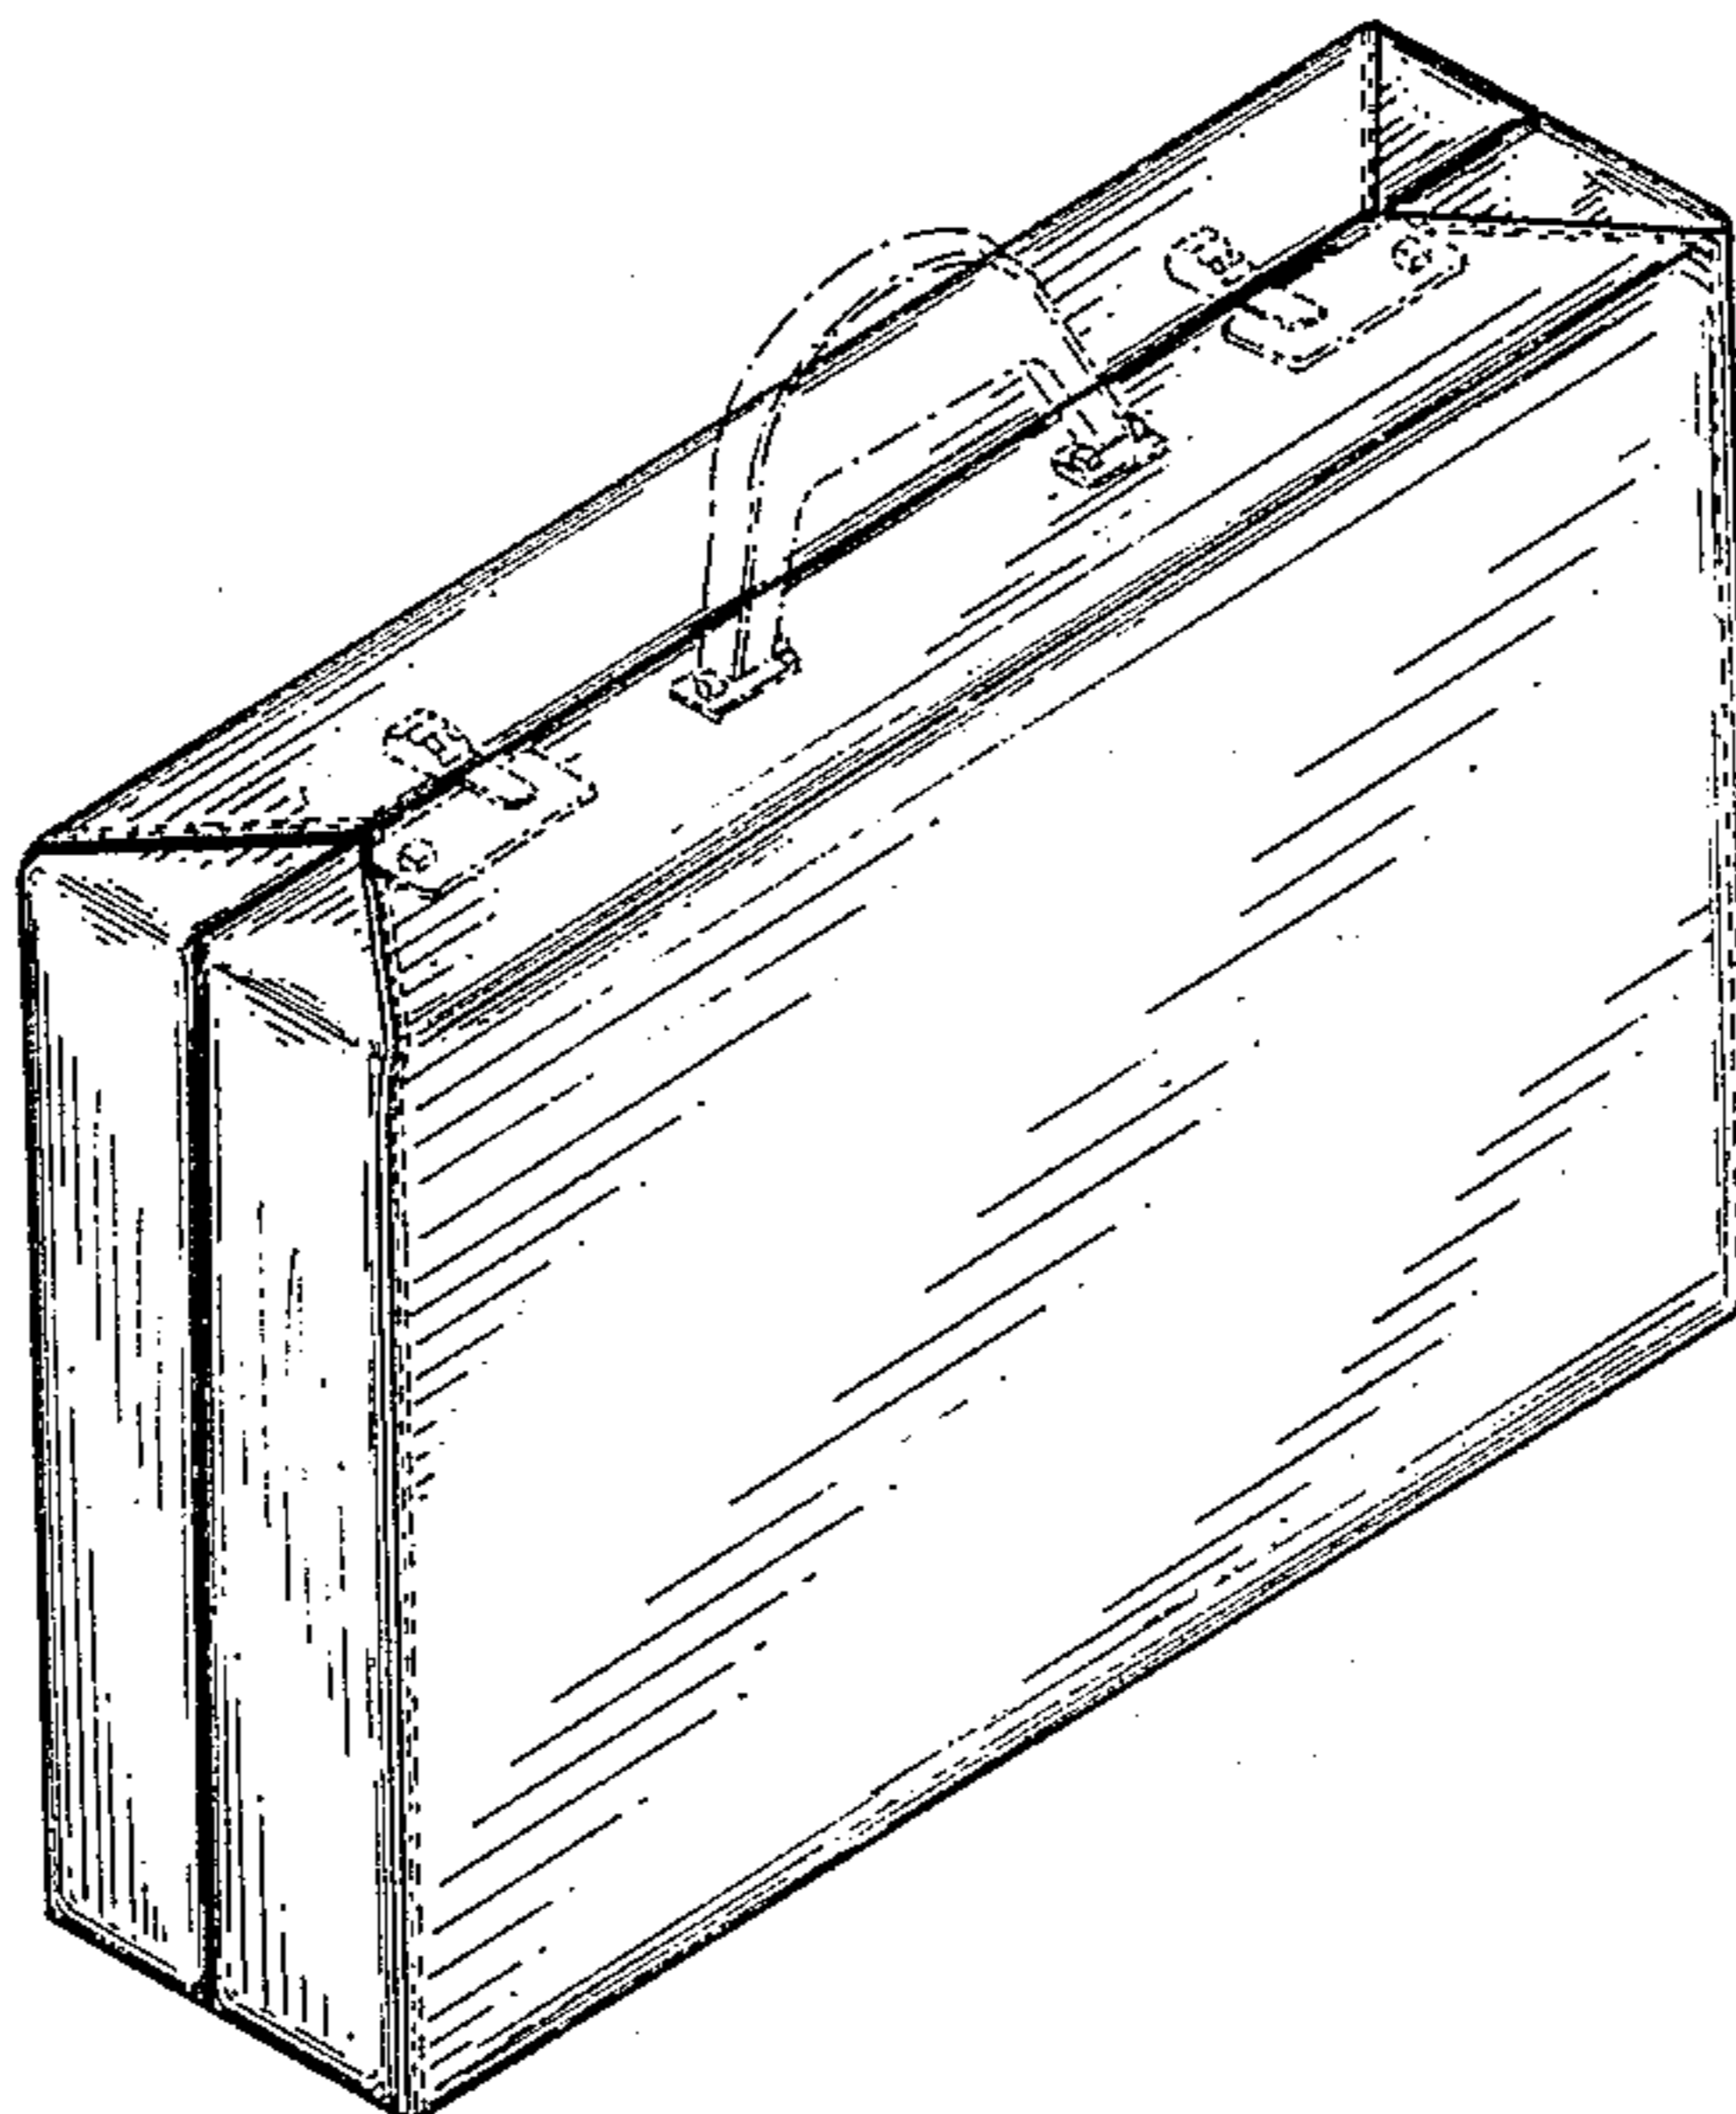

FIG. 4 is a bottom plan view thereof;

FIG. 5 is an end elevational view thereof;

FIG. 6 is an opposite end elevational view thereof; and

FIG. 7 is a perspective view thereof.

Characteristic feature of my design resides in a pair of parallel vertical lap sewn seams on both faces of the case running parallel to the edge from corner to corner then angling inward from the top corners on the top side of the case. When the case is closed a V-shape is formed by the angled seams on the top of the case.
