[57] CLAIM

The ornamental design for a display sign support having detachable component parts and slideable ground anchors, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a display sign support having detachable component parts and slideable ground anchors, showing our new design; FIG. 2 is a bottom plan view thereof; FIG. 3 is an end elevational view taken from the right of FIG. 1; and FIG. 4 is a left side elevational view, the right side being a mirror image thereof.
