[57] CLAIM

The ornamental design for a vending stand, substantially as shown and described.

DESCRIPTION

The FIGURE is a front perspective view showing my new design for a vending stand. The bottom is a featureless plane and the sides opposite those shown are like those shown. The open window, when closed, is like the closed window shown.

The design is characterized by serrate trim above, relieved wheels below, and symmetrically curved corner guards.

The broken line showing of the wordage is for illustrative purposes only and forms no part of the claimed design.
