FIG. 1 is a side and left end perspective view of the translucent hand-held blinking device for signaling transportation, such as bus or taxi, showing my new design; FIG. 2 is a longitudinal cross-sectional view thereof taken through the center of the design; The opposite side is a mirror image of the side shown in FIG. 1. The right end of the design is similar to the left end but has two indentations and no pushbutton. The words "STOP" and "BUS" and the internal circuitry are shown in broken lines for illustrative purposes only.
