[57] CLAIM

The ornamental design for a portable lamp for joggers or the like, substantially as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of the portable lamp for joggers or the like showing my new design, the lamp unit and battery holder in assembled condition;

FIG. 2 is a rear perspective view thereof, the lamp unit set on the battery holder with its light emitting lens to the rear;

FIG. 3 is a front perspective view thereof, the lamp unit detached from the battery holder with the headband shown in broken lines for illustrative purposes only;

FIG. 4 is a front elevational view thereof in assembled condition;

FIG. 5 is a right side view thereof;

FIG. 6 is a left side elevational view thereof in assembled condition;

FIG. 7 is a rear elevational view thereof in assembled condition;

FIG. 8 is a top plan view thereof in assembled condition;

FIG. 9 is a bottom plan view thereof;

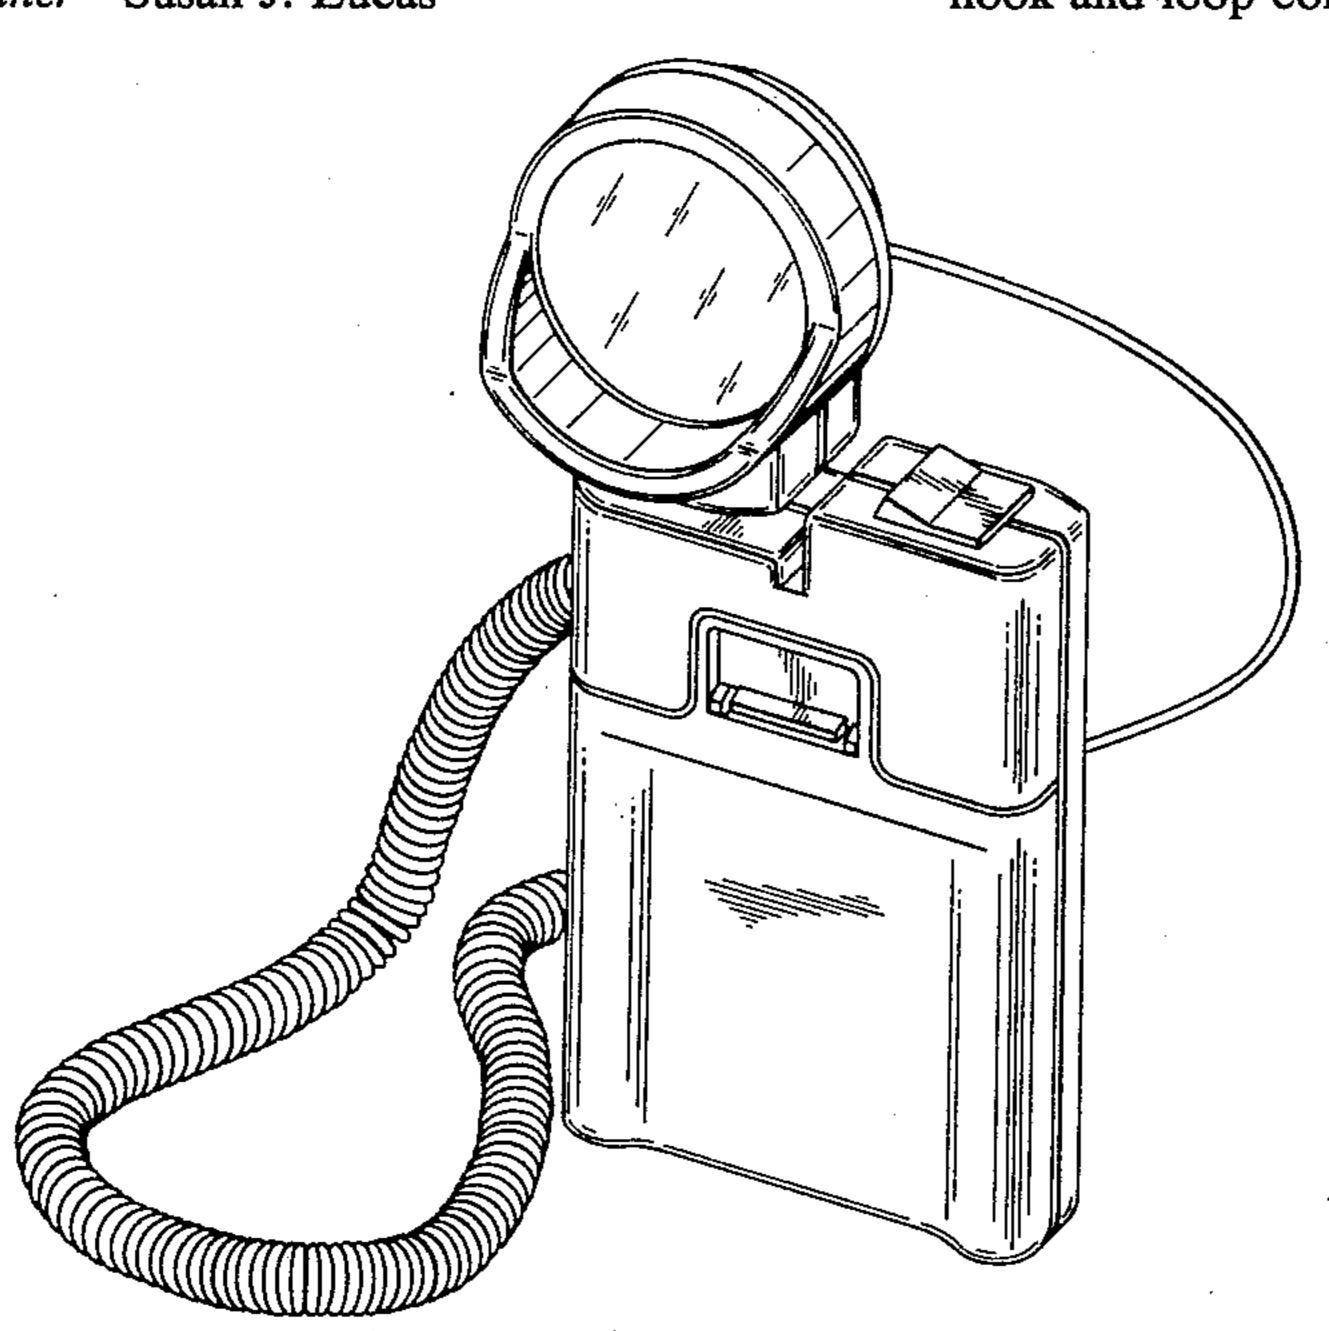

FIGS. 10 and 11 are respectively a top plan view and a left side elevational view of the battery holder, the lamp unit being omitted for purposes of disclosure;

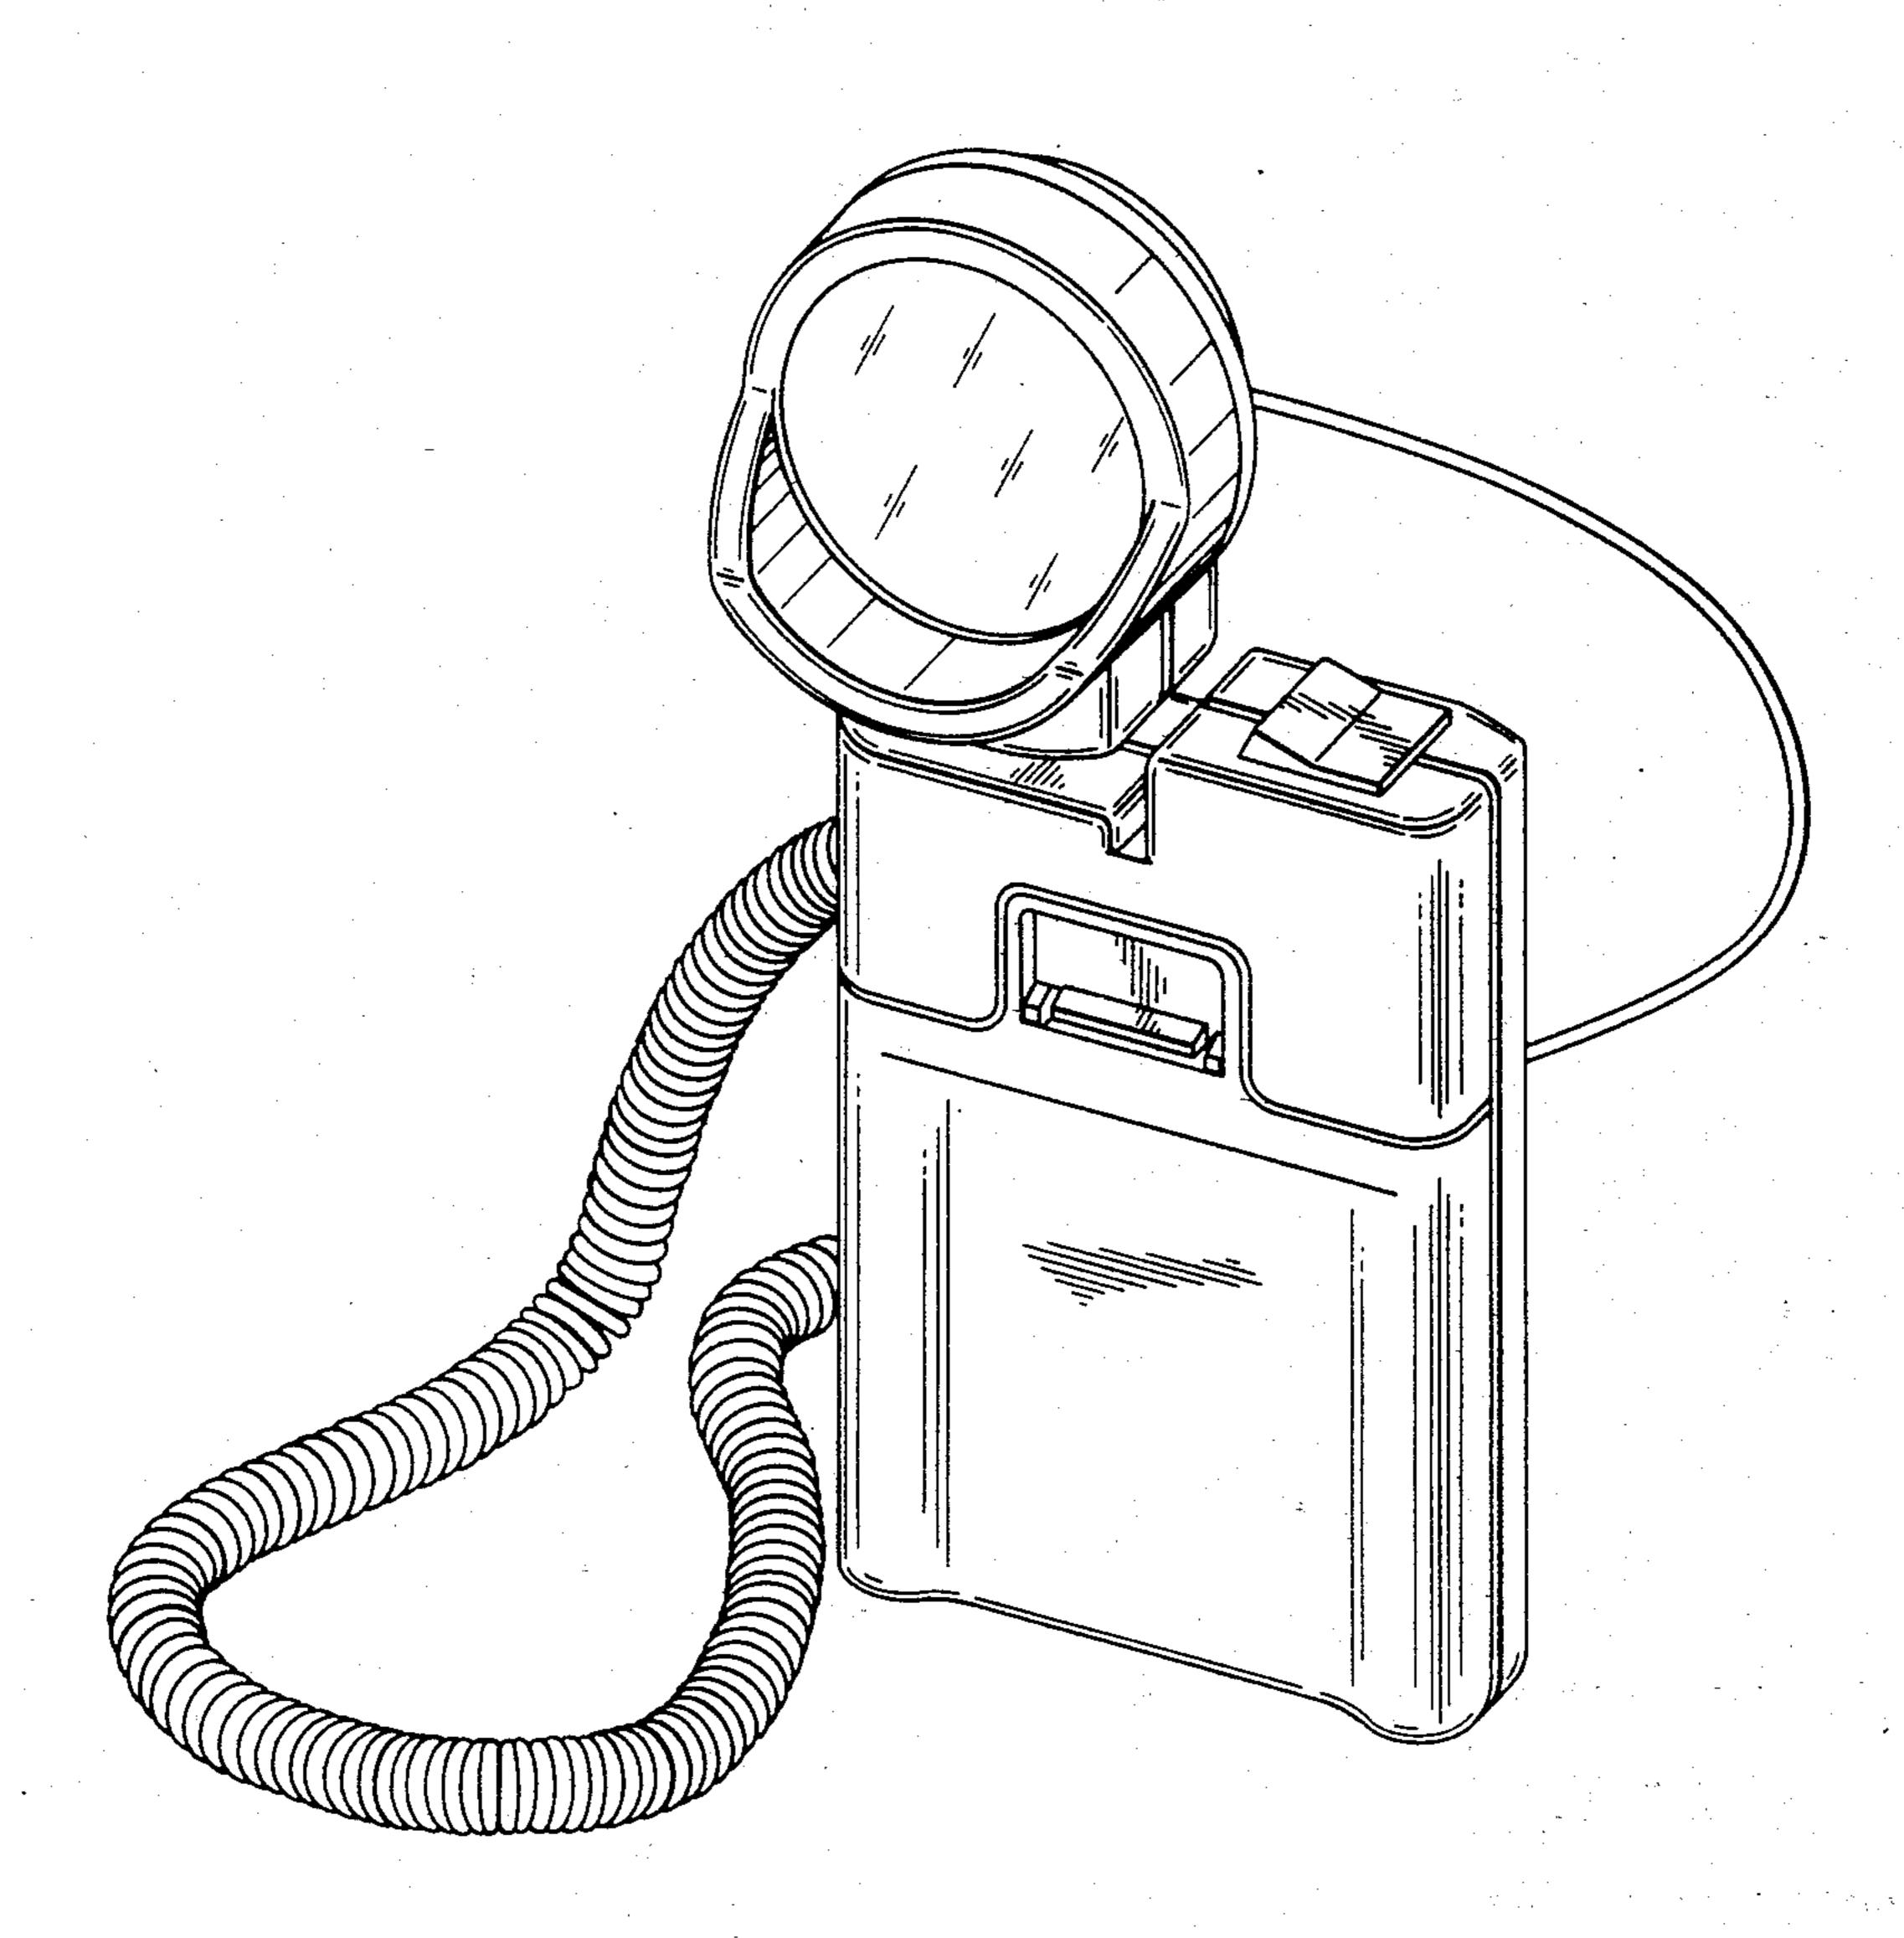

FIG. 12 is an enlarged rear elevational view of the lamp unit, the battery holder being omitted for purposes of disclosure;

FIG. 13 is a bottom plan view of the lamp unit, the battery holder being omitted for purposes of disclosure; and

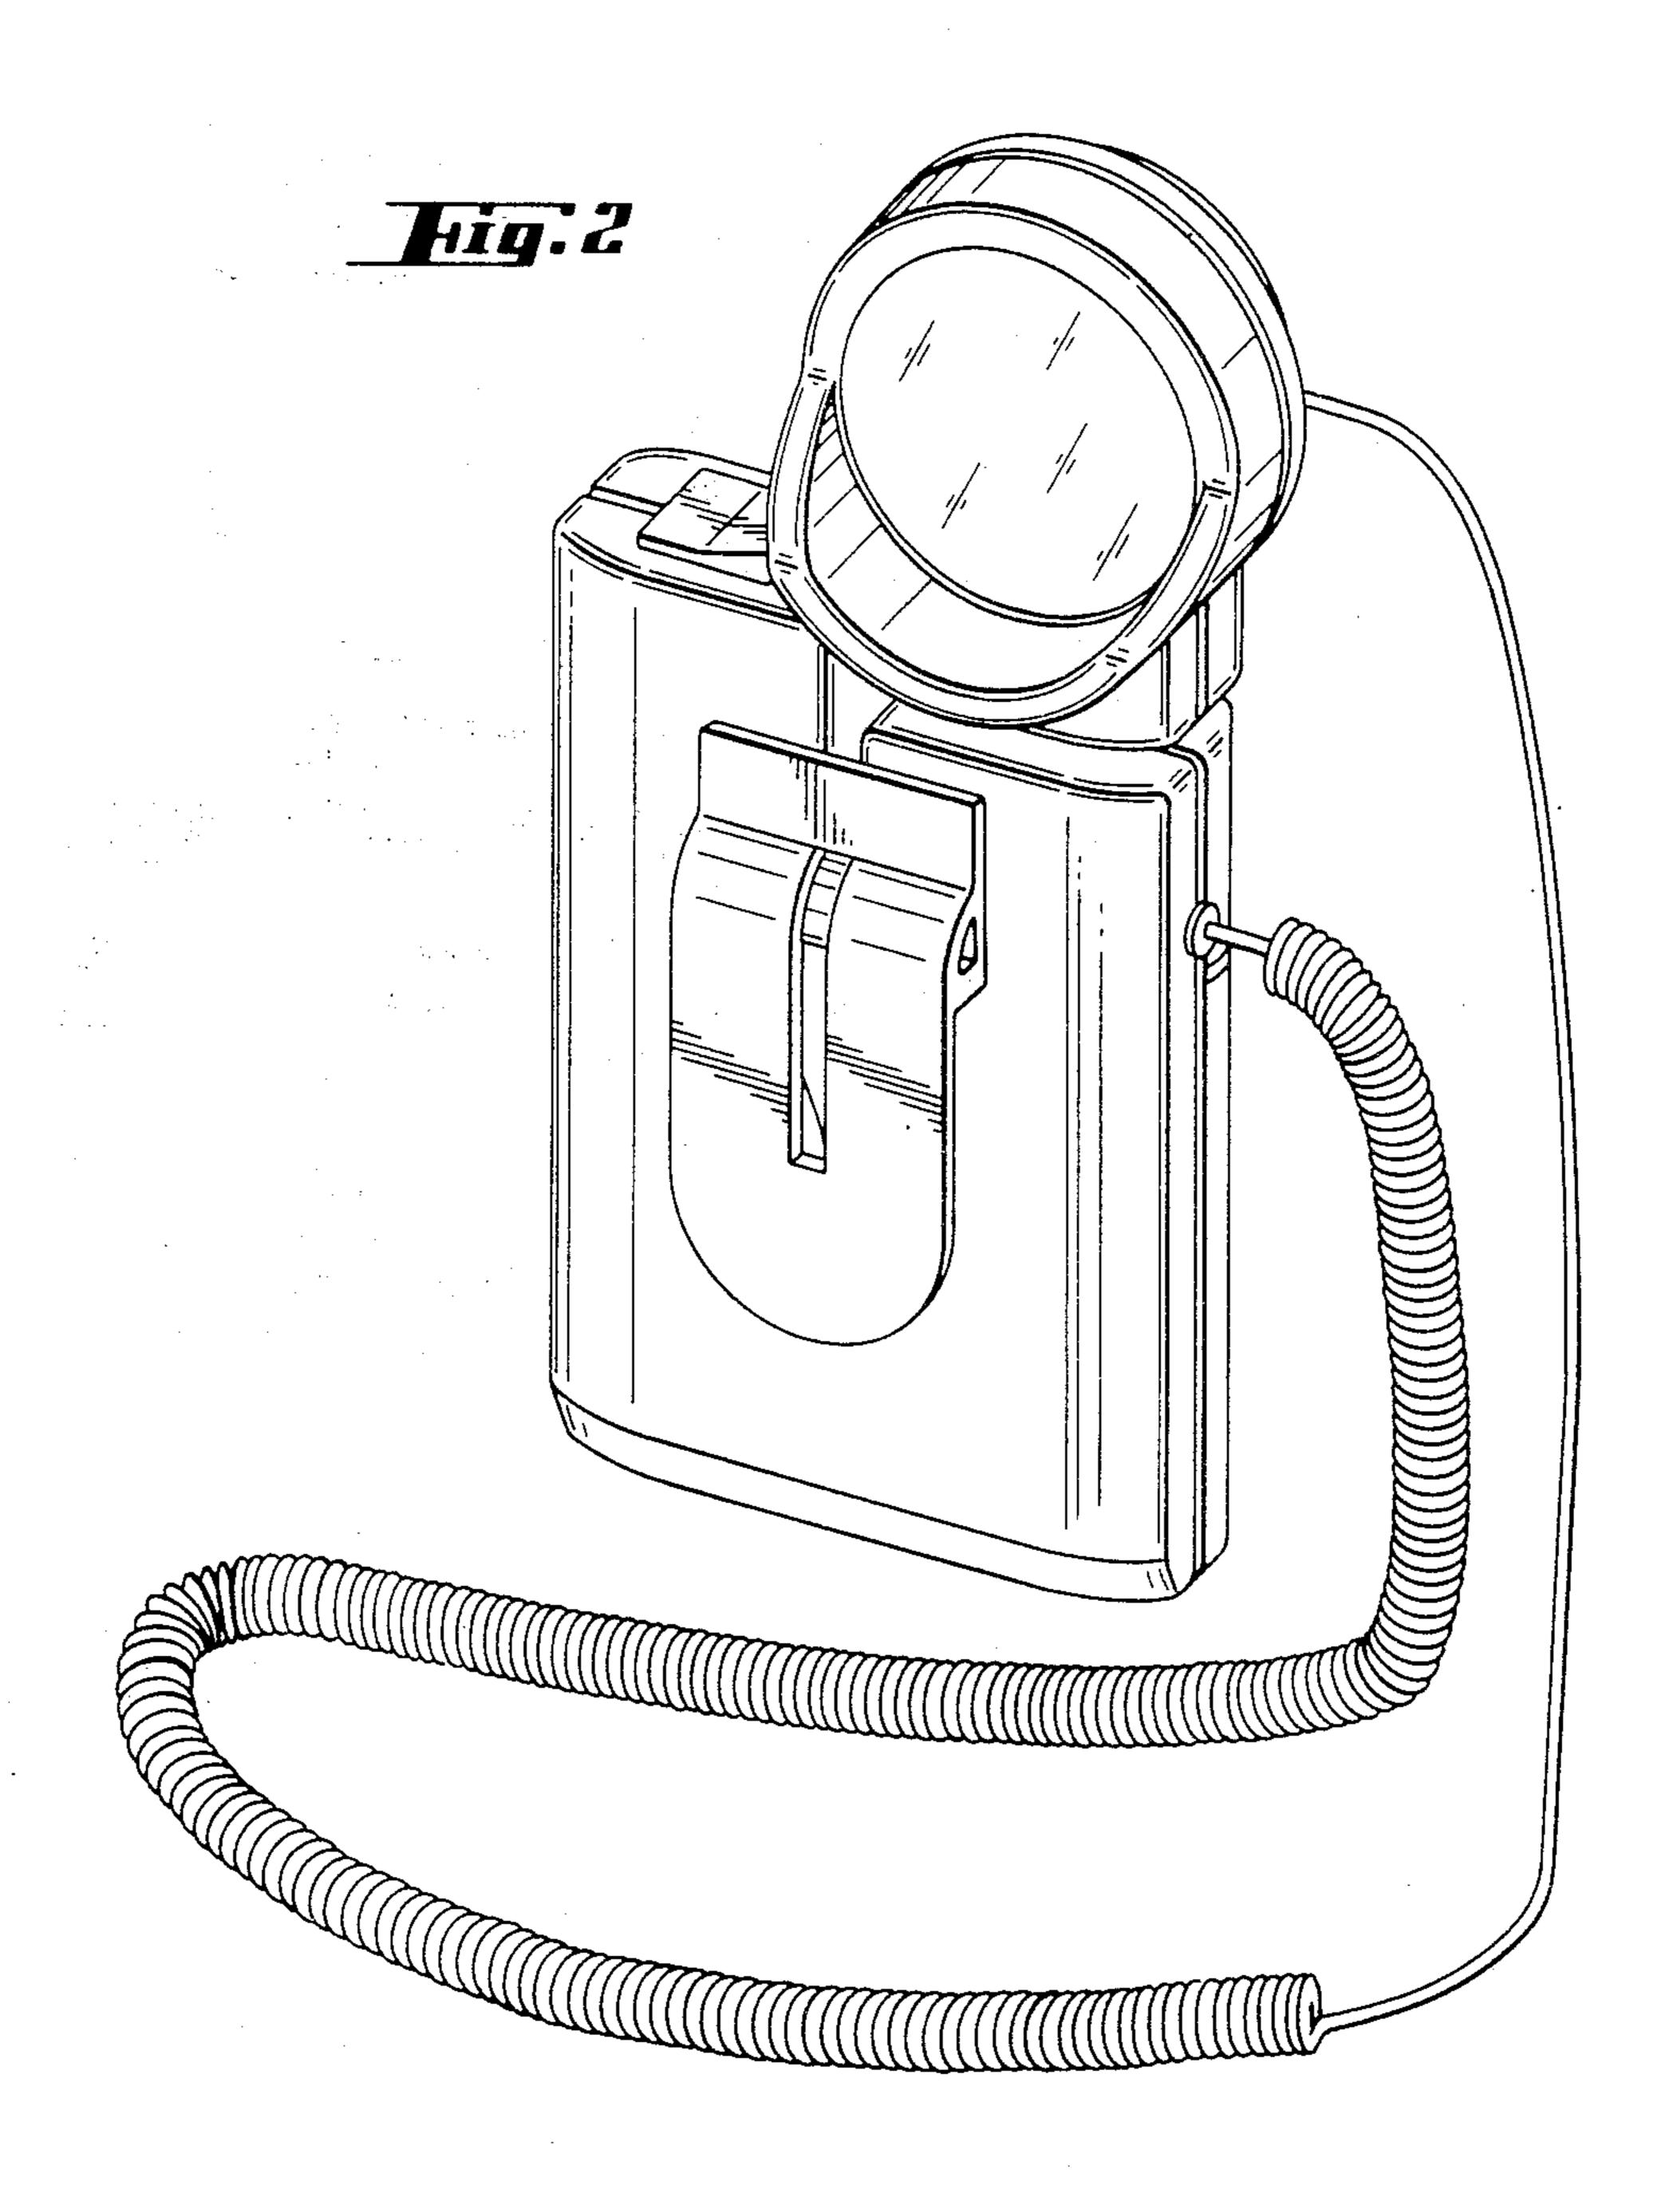

FIG. 14 is a bottom-left perspective view of the lamp unit detached from the battery holder.

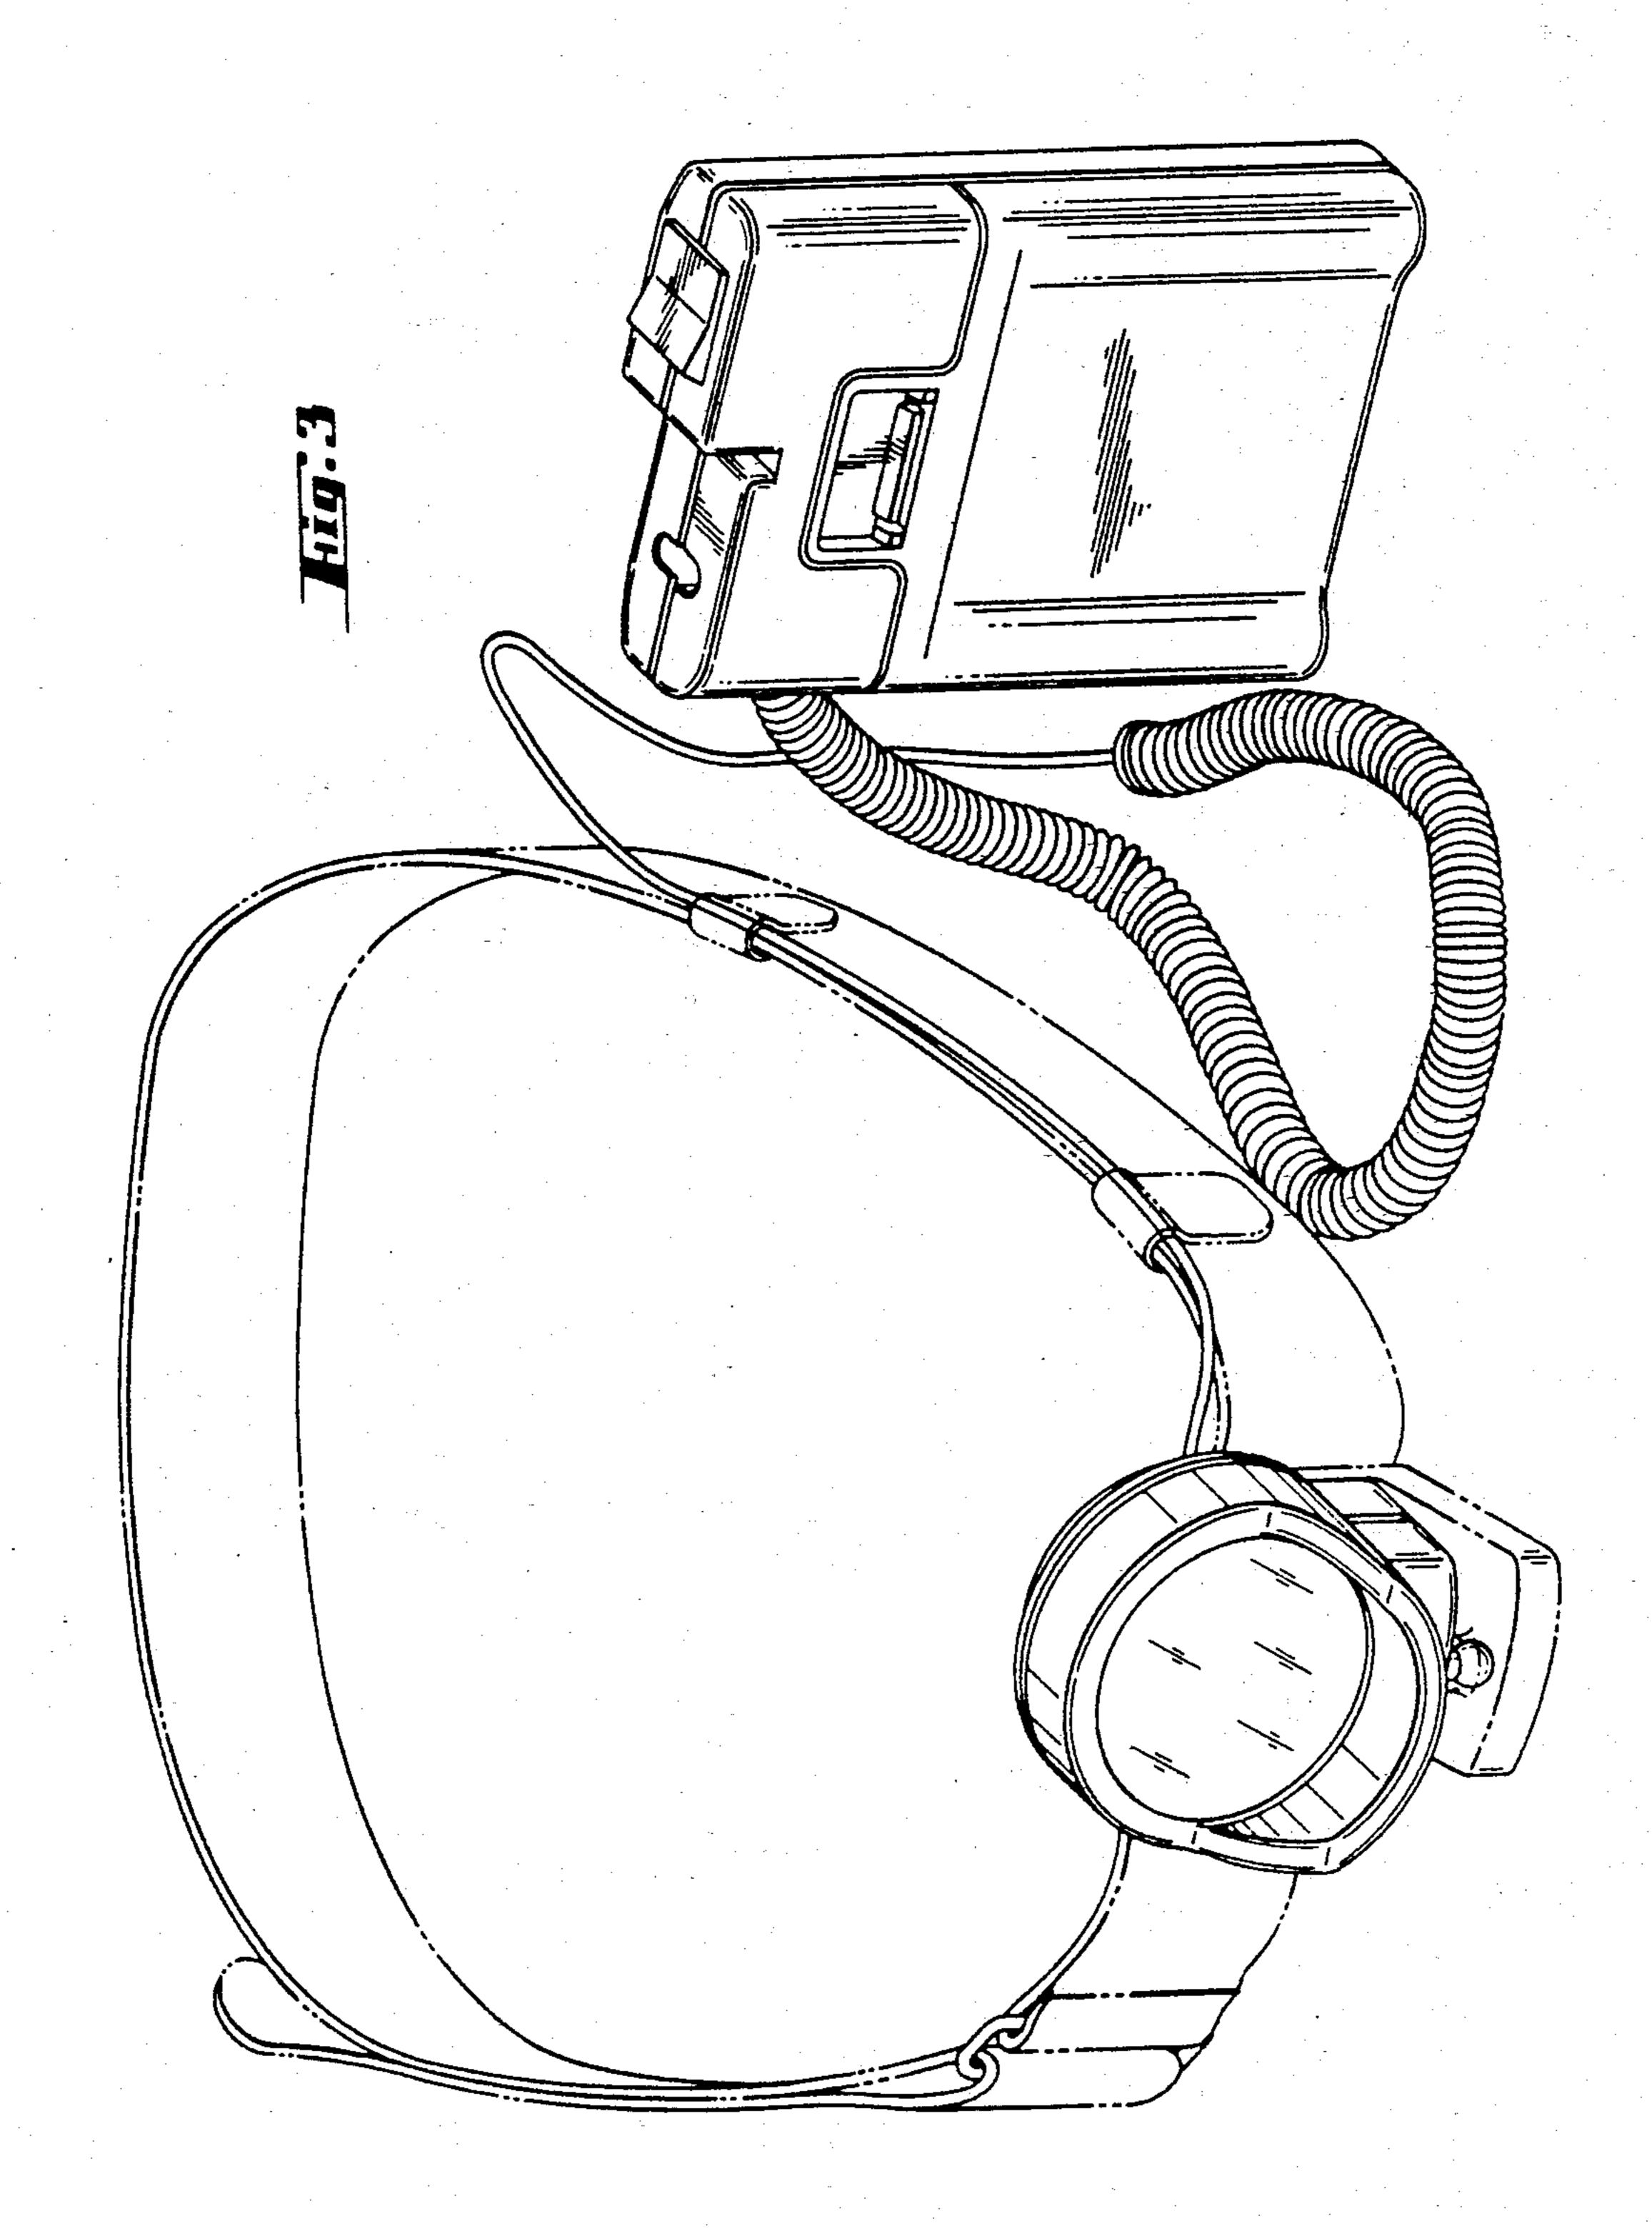

The bottom surface of the connecting bracket (designated 2 in FIG. 15) is one member of a hook-and-loop connector for connecting to the headband of FIG. 3, the outer surface of which is the other member of the hook-and-loop connector.
