[57]

The ornamental design for a helicopter, as shown and described.

**CLAIM** 

#### **DESCRIPTION**

FIG. 1 is a right side elevation view of a helicopter showing my new design;

FIG. 2 is a top plan view thereof;

FIG. 3 is a rear elevation view thereof;

FIG. 4 is a front elevation view thereof.

The left-hand side elevation of the helicopter is substantially the mirror image of FIG. 1, eacept that the tail rotor is on the left-hand side, and the anti-torque vane is on the right-hand side, and the views would differ accordingly.
