DESCRIPTION

FIG. 1 is a front elevational view of a handset telephone and base combination showing my new design; FIGS. 2 and 3 are respectively top and bottom plan views thereof; FIGS. 4 and 5 are respectively left and right side elevational views thereof. FIG. 6 is a bottom plan view of the handset telephone unit thereof, shown independently of its base for ease of illustration; and FIG. 7 is a front elevational view of a second embodiment of the handset telephone unit shown in FIG. 1, it being understood that the conformational views of this embodiment are substantially the same as those shown in FIGS. 1-6, the only difference of this embodiment being the ornamental surface pattern represented in FIG. 7. The coiled cord in FIG. 6 is shown in fragmentary form for ease of illustration, and is omitted in other figures for the same reason.
