[57] CLAIM

The ornamental new design for a telephone set, as shown and described.

DESCRIPTION

FIG. 1 is a left side, top and front perspective view of the stand of a telephone set, and a partial bottom, left side and front perspective view of the corded handpiece of the telephone set showing my new design with the stand and handpiece spaced apart for clarity of representation;

FIG. 2 is a similar perspective view of a second embodiment thereof, with the right side, bottom and partial front of the corded handpiece shown spaced apart from the stand for clarity of representation;

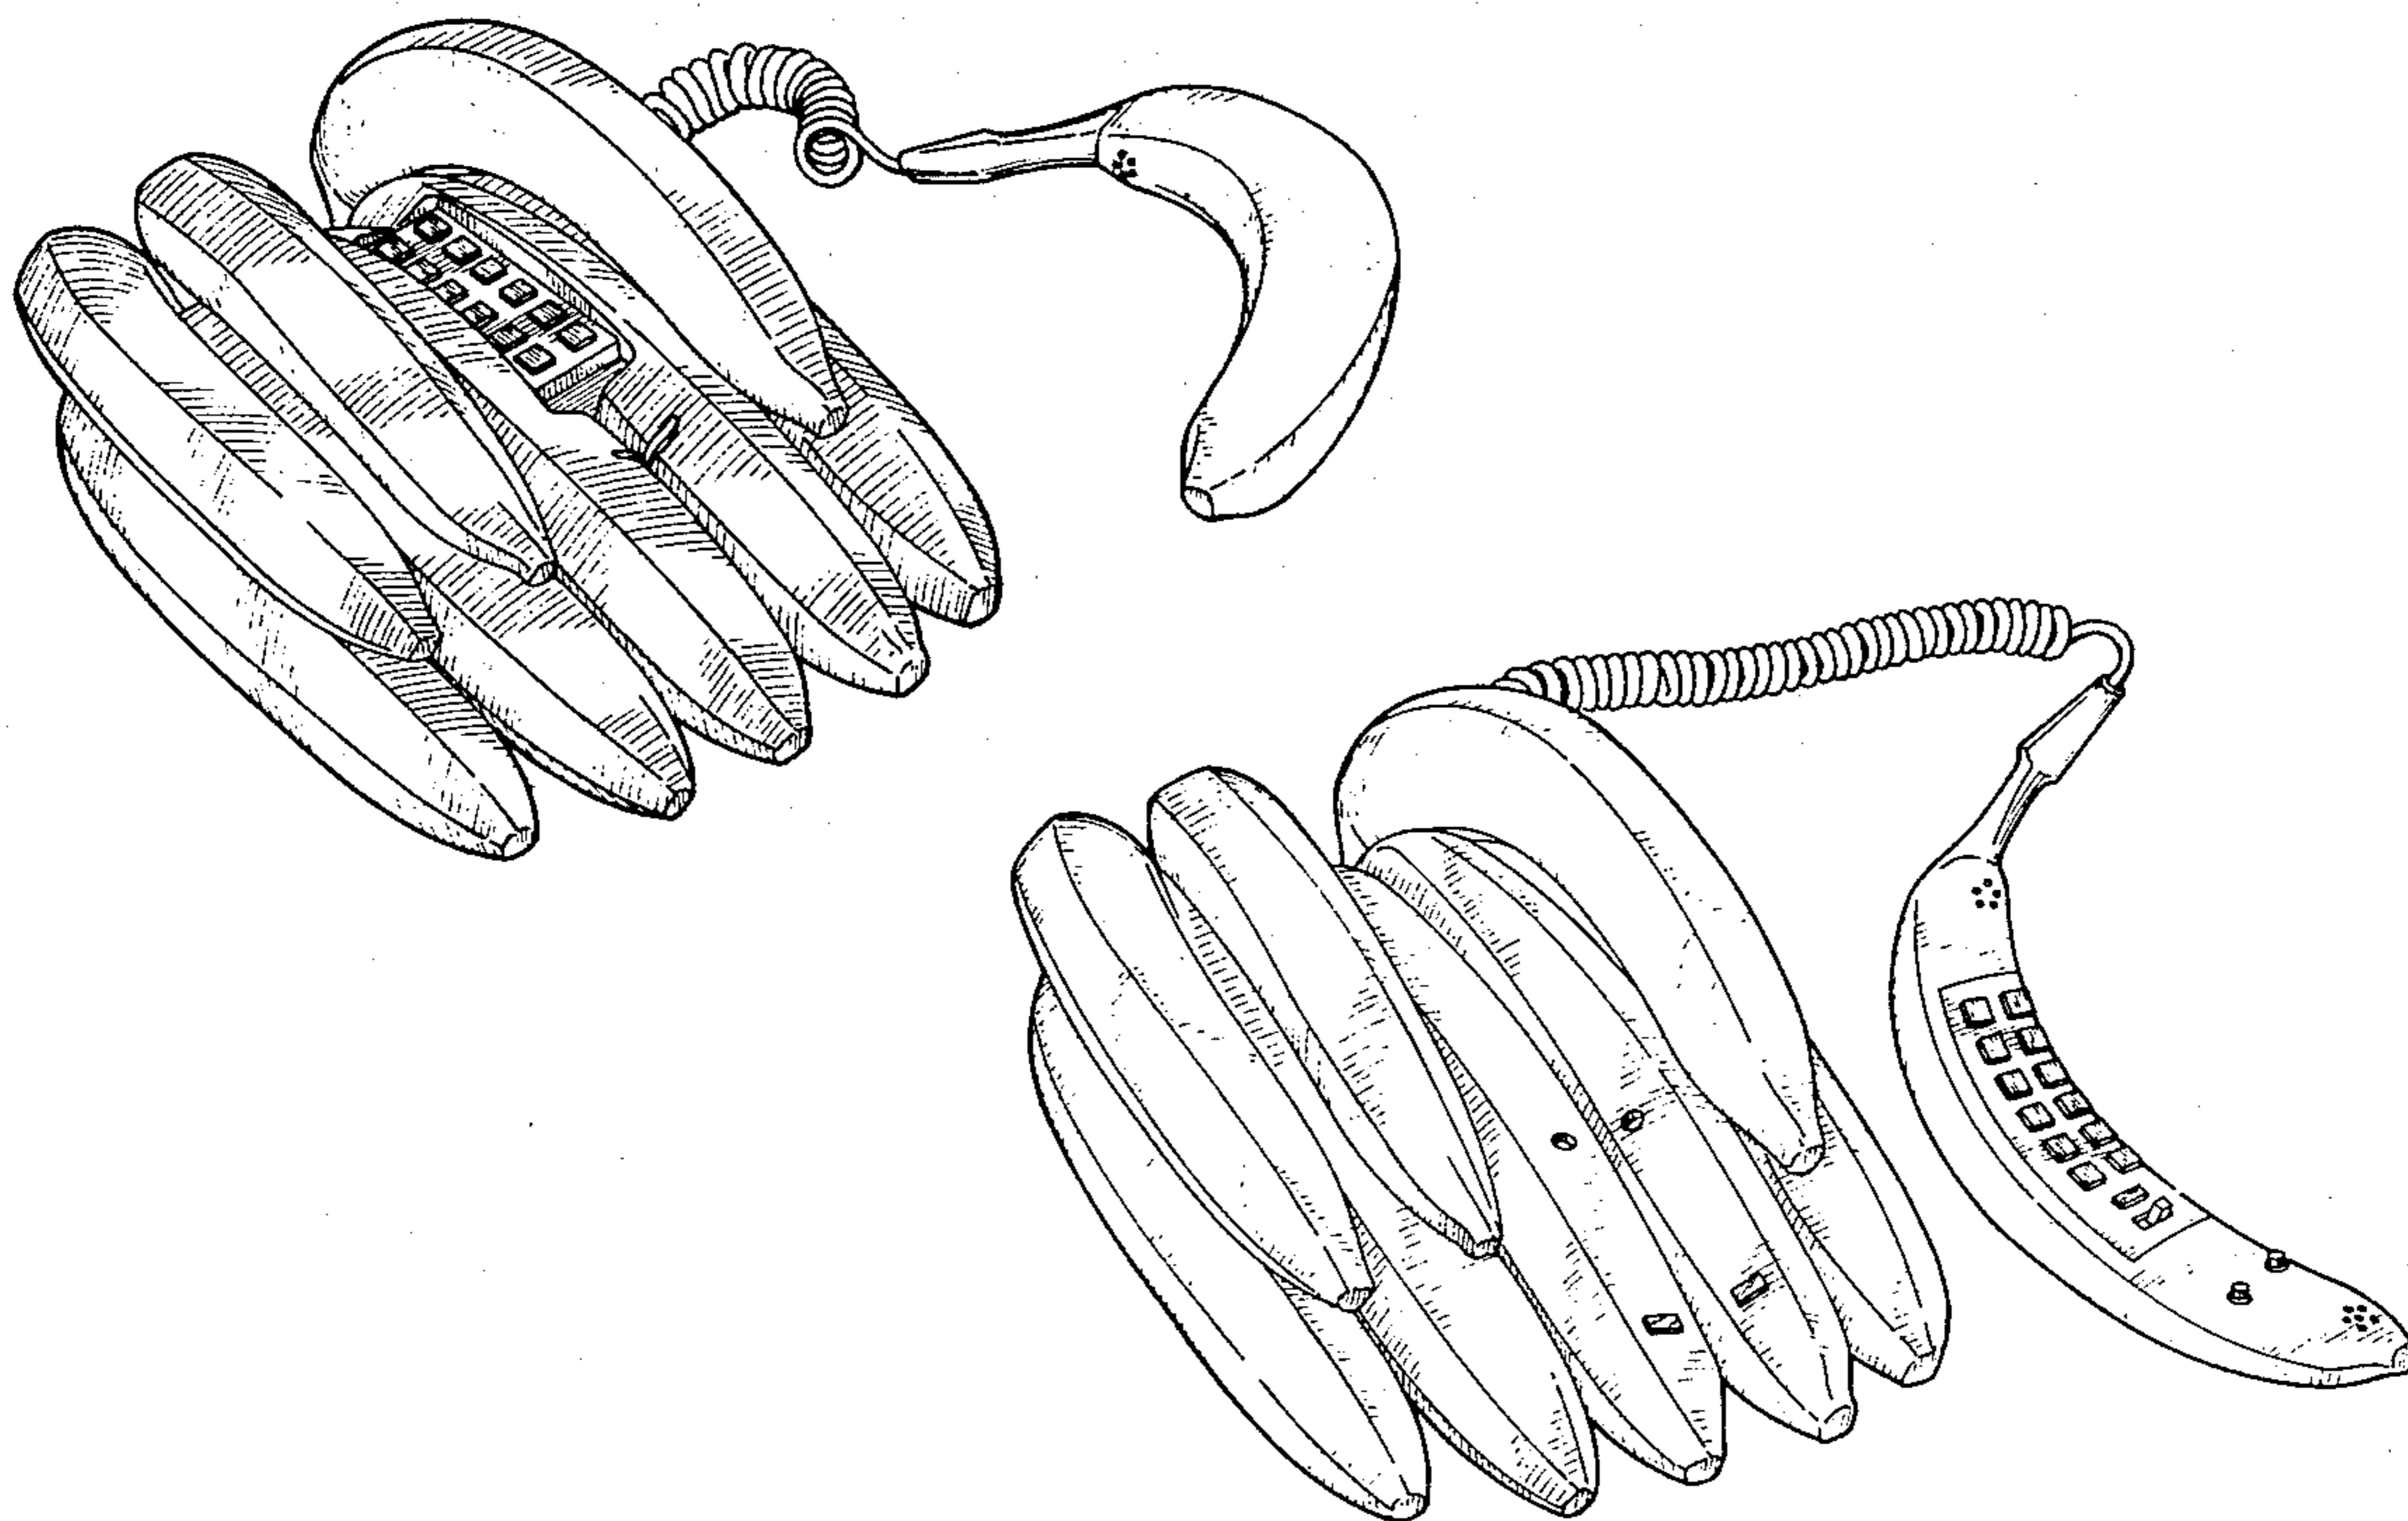

FIG. 3 is a similar bracket-associated perspective view of a third embodiment thereof, with the operative cordless relationship of the stand and handpiece shown by an integral antenna possessed by each unit;

FIG. 4 is a left side elevational view thereof of all the embodiments, except that cord and antenna are not shown; and the right side elevational view being substantially a mirror image;

FIG. 5 is a top plan view of all embodiments thereof with the handpiece cradled upon the stand, the cord and antennas being omitted for facility of illustration;

FIG. 6 is an end elevational view of all embodiments thereof with the handpiece assembled upon the stand, the cord and as terms omitted for facility of illustration; and

FIG. 7 is a bottom plan view of the stand of all embodiments, with the cord and antennas omitted for ease by illustration.
