[57] CLAIM

The ornamental design for a wall mount holder for telephone handset, as shown and described.

DESCRIPTION

FIG. 1 is a left side, top and front perspective view of a wall mount holder for telephone handset showing my new design, the view of the right side, top and front perspective being a mirror image thereof, and the rear and bottom thereof having flat, rectangular surfaces;

FIG. 2 is an enlarged sectional view taken along the lines 2—2 of FIG. 1;

FIG. 3 is a left side, top and front perspective view of a second embodiment thereof, the view of the right side, top and front perspective being a mirror image thereof; and the rear and bottom thereof having flat rectangular surfaces;

FIG. 4 is an enlarged sectional view taken along the lines 4—4 of FIG. 2; and

FIG. 5 is a similar left side, perspective view of a third embodiment thereof, the right side perspective view being a mirror image thereof, and the rear and bottom thereof having flat, rectangular surfaces.

The broken line showing of means for mounting the holder to an upright wall (screws and adhesive pads), and the fragmentary showing of telephone handset outlines are for illustrative purposes only and form no part of the claimed design.
