[57] CLAIM

The ornamental design for an electronic article surveillance system, substantially as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of an electronic article surveillance system showing my new design; FIG. 2 is a top plan view thereof; FIG. 3 is a front elevational view thereof; and FIG. 4 is a left side elevational view thereof.

An electronic article surveillance system is a system for detecting the presence of articles, such as merchandise, to which electronic security tags have been attached. Such systems are used, for example, for shoplifting prevention.

FIG. 1

FIG. 2

FIG. 4
