## United States Patent [19]

Mattson et al.

- **DECALCOMANIA FOR CHINA** [54] **DINNERWARE OR SIMILAR ARTICLES**
- Jeanette Mattson, Syracuse; Steve A. [75] Inventors: Unger, Manilus, both of N.Y.
- [73] Syracuse China Corporation, Assignee: Syracuse, N.Y.
- [\*\*] Term: 14 Years
- Appl. No.: 786,526 [21]
- [22] Filed:

Patent Number: Des. 300,196 [11] Date of Patent: \*\* Mar. 14, 1989 [45]

only. The decalcomania is of no substantial thickness. The stippling represents shading of color. FIG. 2 is a plan view of another embodiment of my new design for decalcomania for use on china dinnerware or similar articles, the fragmentary broken line showing of chinaware being illustrative of environmental structure only. The decalcomania is of no substantial thickness. The stippling represents shading of color. FIG. 3 is a plan view of another embodiment of my new design for decalcomania for use on china dinnerware or similar articles, the fragmentary broken line showing of chinaware being illustrative of environmental structure

#### [57] CLAIM

The ornamental design for decalcomania for china dinnerware or similar articles, as shown and described.

#### DESCRIPTION

FIG. 1 is a plan view of a first embodiment of my new design for decalcomania for use on china dinnerware or similar articles, the fragmentary broken line showing of chinaware being illustrative of environmental structure only. The decalcomania is of no substantial thickness. The stippling represents shading of color.

FIG. 4 is a plan view of another embodiment of my new design for decalcomania for use on china dinnerware or similar articles, the fragmentary broken line showing of chinaware being illustrative of environmental structure only. The decalcomania is of no substantial thickness. The stippling represents shading of color.

FIG. 5 is a plan view of another embodiment of my new design for decalcomania for use on china dinnerware or similar articles, the fragmentary broken line showing of chinaware being illustrative of environmental structure only. The decalcomania is of no substantial thickness. The stippling represents shading of color.

FIG. 6 is a plan view of another embodiment of my new design for decalcomania for use on china dinnerware or similar articles, the fragmentary broken line showing of chinaware being illustrative of environmental structure only. The decalcomania is of no substantial thickness. The stippling represents shading of color. FIG. 7 is a plan view of another embodiment of my new

design for decalcomania for use on china dinnerware or similar articles, the fragmentary broken line showing of chinaware being illustrative of environmental structure only. The decalcomania is of no substantial thickness. The stippling represents shading of color.
