[57] CLAIM

The ornamental design for a combined radio and television receiver, as shown and described.

DESCRIPTION

FIG. 1 is a front, top and left side perspective view of a combined radio and television receiver showing our new design;

FIG. 2 is a rear, bottom and right side perspective view thereof;

FIG. 3 is a top plan view thereof;

FIG. 4 is a rear elevational view thereof;

FIG. 5 is a front elevational view thereof;

FIG. 6 is an elevational view of the interior thereof, with the hinged casing halves pivoted to open in-line position;

FIG. 7 is an elevational view of the exterior thereof, with the casing halves pivoted to open in-line position;

FIG. 8 is a top plan view with the casing halves in open in-line position;

FIG. 9 is a perspective view of the interior thereof, with the casing halves pivoted to open in-line position;

FIG. 10 is a perspective view thereof with the casing halves open in-line and in laid down position and with a pivotable viewing cover in raised, oblique position;

FIG. 11 is a perspective view thereof, diametrically opposite to that of FIG. 10; and

FIG. 12 is a perspective view thereof with the casing halves open and at 90° to each other and with the antenna partially extended.
