[57] CLAIM

The ornamental design for a combined fuel pump and canopy structure for a service station, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a combined fuel pump and canopy structure for a service station showing my new design;
FIG. 2 is a side elevational view thereof, the opposite side being a mirror image of that shown;
FIG. 3 is a front elevational view thereof, the rear being a mirror image of that shown;
FIG. 4 is a top plan view thereof;
FIG. 5 is a bottom plan view thereof;
FIG. 6 is an enlarged perspective view of the first of two types of pump components thereof;
FIG. 7 is an enlarged front elevational view of the first of two types of pump components thereof, the rear being a mirror image of that shown;
FIG. 8 is an enlarged side elevational view of the first of two types of pump components thereof, the opposite side being a mirror image of that shown;
FIG. 9 is an enlarged horizontal cross-sectional view of the first of two types of pump components thereof, taken along line 9—9 of FIG. 7;
FIG. 10 is an enlarged rear elevational view of the second of two types of pump components thereof, the front and sides being identical to those shown in FIGS. 7 and 8; and
FIG. 11 is an enlarged horizontal cross-sectional view of the second of two types of pump components thereof, taken along line 11—11 of FIG. 10. The canopy and other pump components have been omitted from FIGS. 6—11 for clarity of illustration.
