[57] CLAIM

The ornamental design for a frequency induction locator to find gold and silver, as shown.

DESCRIPTION

FIG. 1 is a left side elevational view of a frequency induction locator to find gold or silver showing my design;

FIG. 2 is a top plan view;

FIG. 3 is a bottom plan view;

FIG. 4 is a front elevational view;

FIG. 5 is a rear elevational view;

FIG. 6 is a right side elevational view, with the antenna extended; and

FIG. 7 is a top plan view, of another embodiment of my design wherein the detecting rods are straight, all other portions being identical to my new design of FIGS. 1-6.

FIG. 1

FIG. 2

FIG. 3

FIG. 6

FIG. 4

FIG. 5

FIG. 7
