[57] **CLAIM**

The ornamental design for a marked retractile cord, as shown and described.

DESCRIPTION

FIG. 1 is a front elevational view of our new design for a marked retractile cord having a logotype on outer surfaces of the convolutions of the cordage with modular plugs terminating the ends of the coiled cordage and appearing as it may be disposed on a desk or hanging from a wall-mounted telephone;

FIG. 2 is a left side elevational view of the retractile cord of FIG. 1;

FIG. 3 is a front elevational view of a portion of the cord of FIG. 1 in an extended position such as when a handset of telephone apparatus to which the cord is connected is moved apart from a base to which the cord also is connected;

FIG. 4 is a front elevational view of our new design for a marked retractile cord having a logotype on inner surfaces of the convolutions of a length of cordage and showing a portion of the length of cordage in an extended condition to expose the logotype; and

FIG. 5 is a front elevational view of our new design for a marked retractile cord having logotypes on inner and on outer surfaces of the convolutions of a length of cordage which has been wound to provide the cord and showing a portion of the length of the cordage extended to expose the logotypes on the inner surfaces.

The plugs are shown in broken lines for illustrative purposes only.
