[57] **CLAIM**

The ornamental design for earring display stand, as shown and described.

DESCRIPTION

FIG. 1 is a front elevational view of an earring display stand showing my new design;
 FIG. 2 is a top plan view thereof;
 FIG. 3 is a right side elevational view, the left side being a mirror image thereof;
 FIG. 4 is a bottom plan view thereof;
 FIG. 5 is a rear elevational view thereof;
 FIG. 6 is an enlarged fragmentary portion of the circular perforated plate;
 FIG. 7 is a front elevational view of a second embodiment of the earring display stand shown in FIG. 1, the rear being a mirror image thereof;
 FIG. 8 is a top plan view thereof;
 FIG. 9 is a right side elevational view thereof;
 FIG. 10 is a bottom plan view thereof;
 FIG. 11 is a left side elevational view thereof;
 FIG. 12 is an enlarged fragmentary portion of the circular perforated plate;
 FIG. 13 is a front elevational view of a third embodiment of the earring display stand shown in FIG. 1;
 FIG. 14 is a top plan view thereof;
 FIG. 15 is a right side elevational view, the left side being a mirror image thereof;
 FIG. 16 is a bottom plan view thereof;
 FIG. 17 is a rear elevational view thereof;
 FIG. 18 is an enlarged fragmentary portion of the circular perforated plate;
 FIG. 19 is a front elevational view of a fourth embodiment of the earring display stand shown in FIG. 1;
 FIG. 20 is a top plan view thereof;
 FIG. 21 is a right side elevational view, the left side being a mirror image thereof;
 FIG. 22 is a bottom plan view thereof;
 FIG. 23 is a rear elevational view thereof; and
 FIG. 24 is an enlarged fragmentary portion of the circular perforated plate.
