[57] CLAIM

The ornamental design for an electric box with lockable and hingeable cover, as shown and described.

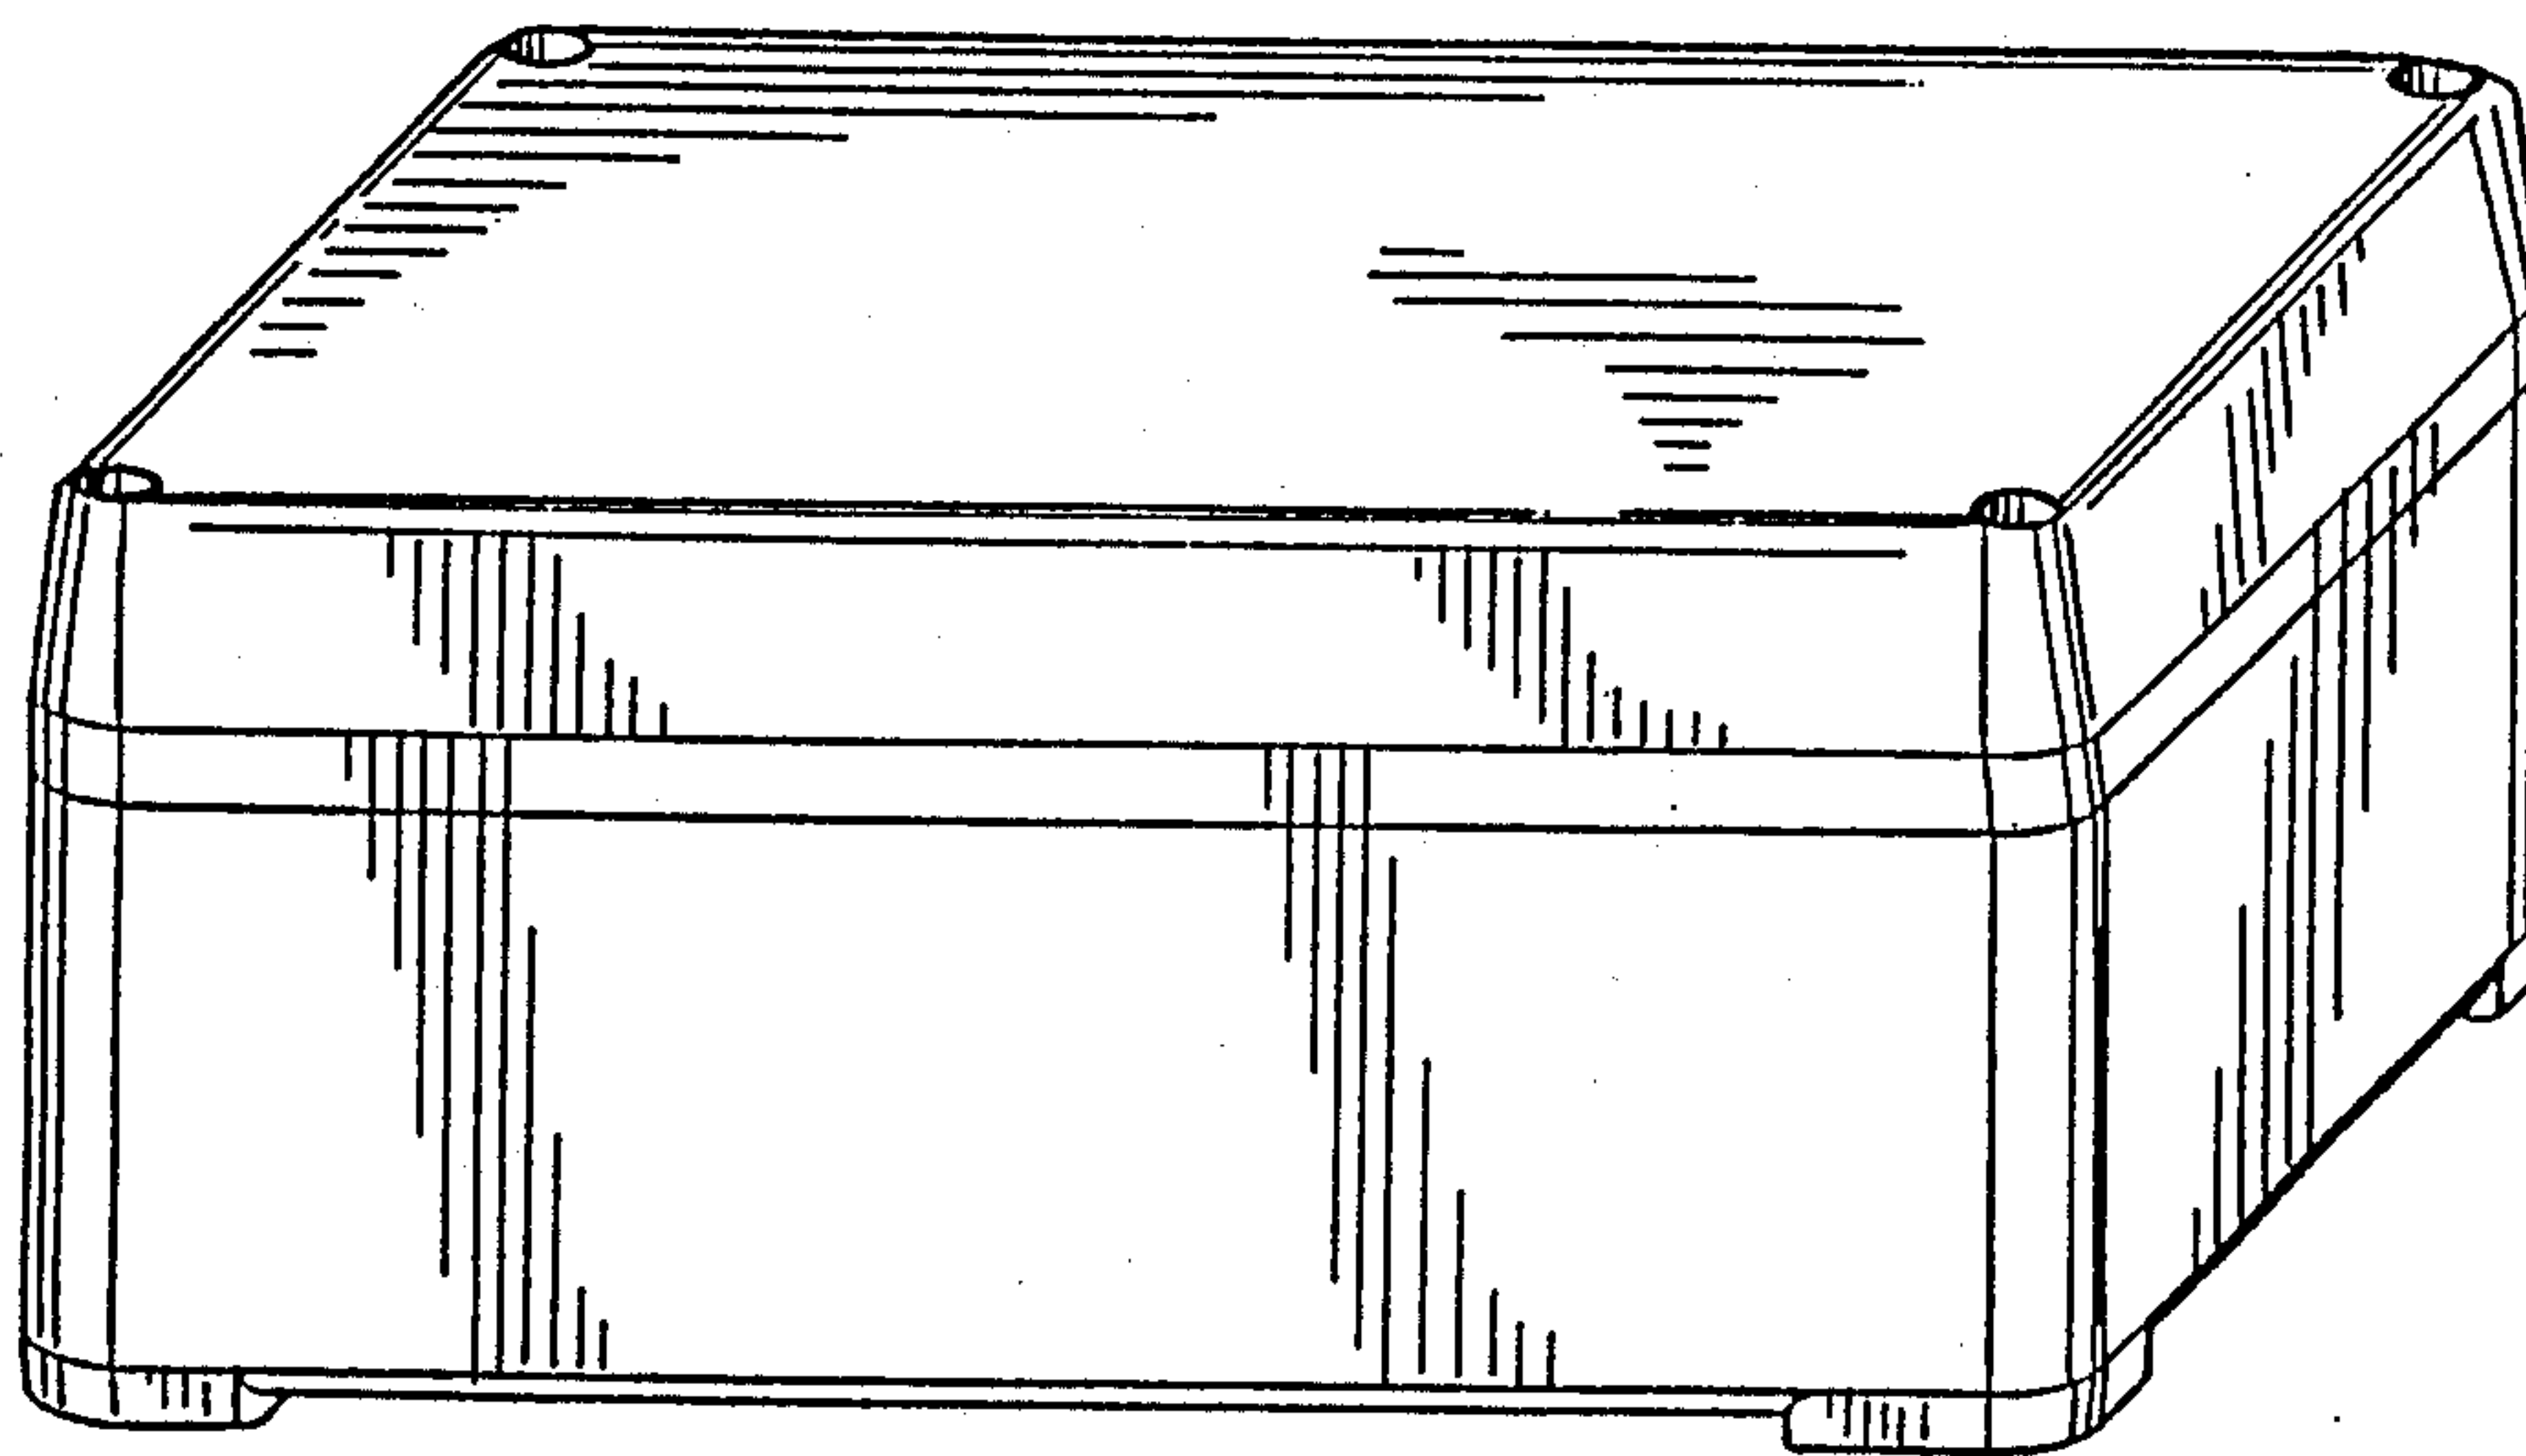

DESCRIPTION

FIG. 1 is a front perspective view of an electric box with lockable and hingeable cover in the closed position showing our new design. The left and rear sides thereof are mirror images of the right and front side, respectively;

FIG. 2 is a front perspective thereof with the cover raised vertically from the body;

FIG. 3 is a front perspective view thereof with the cover hinged to the rear side in the open position, the inside bottom portion being plain and unornamental.

The left and rear sides of the box are substantially mirror images of the right and front sides shown in the drawings; and, the bottom of the box is plain and unornamental. The box is a mounting and distributing box for electrotechnical purposes.

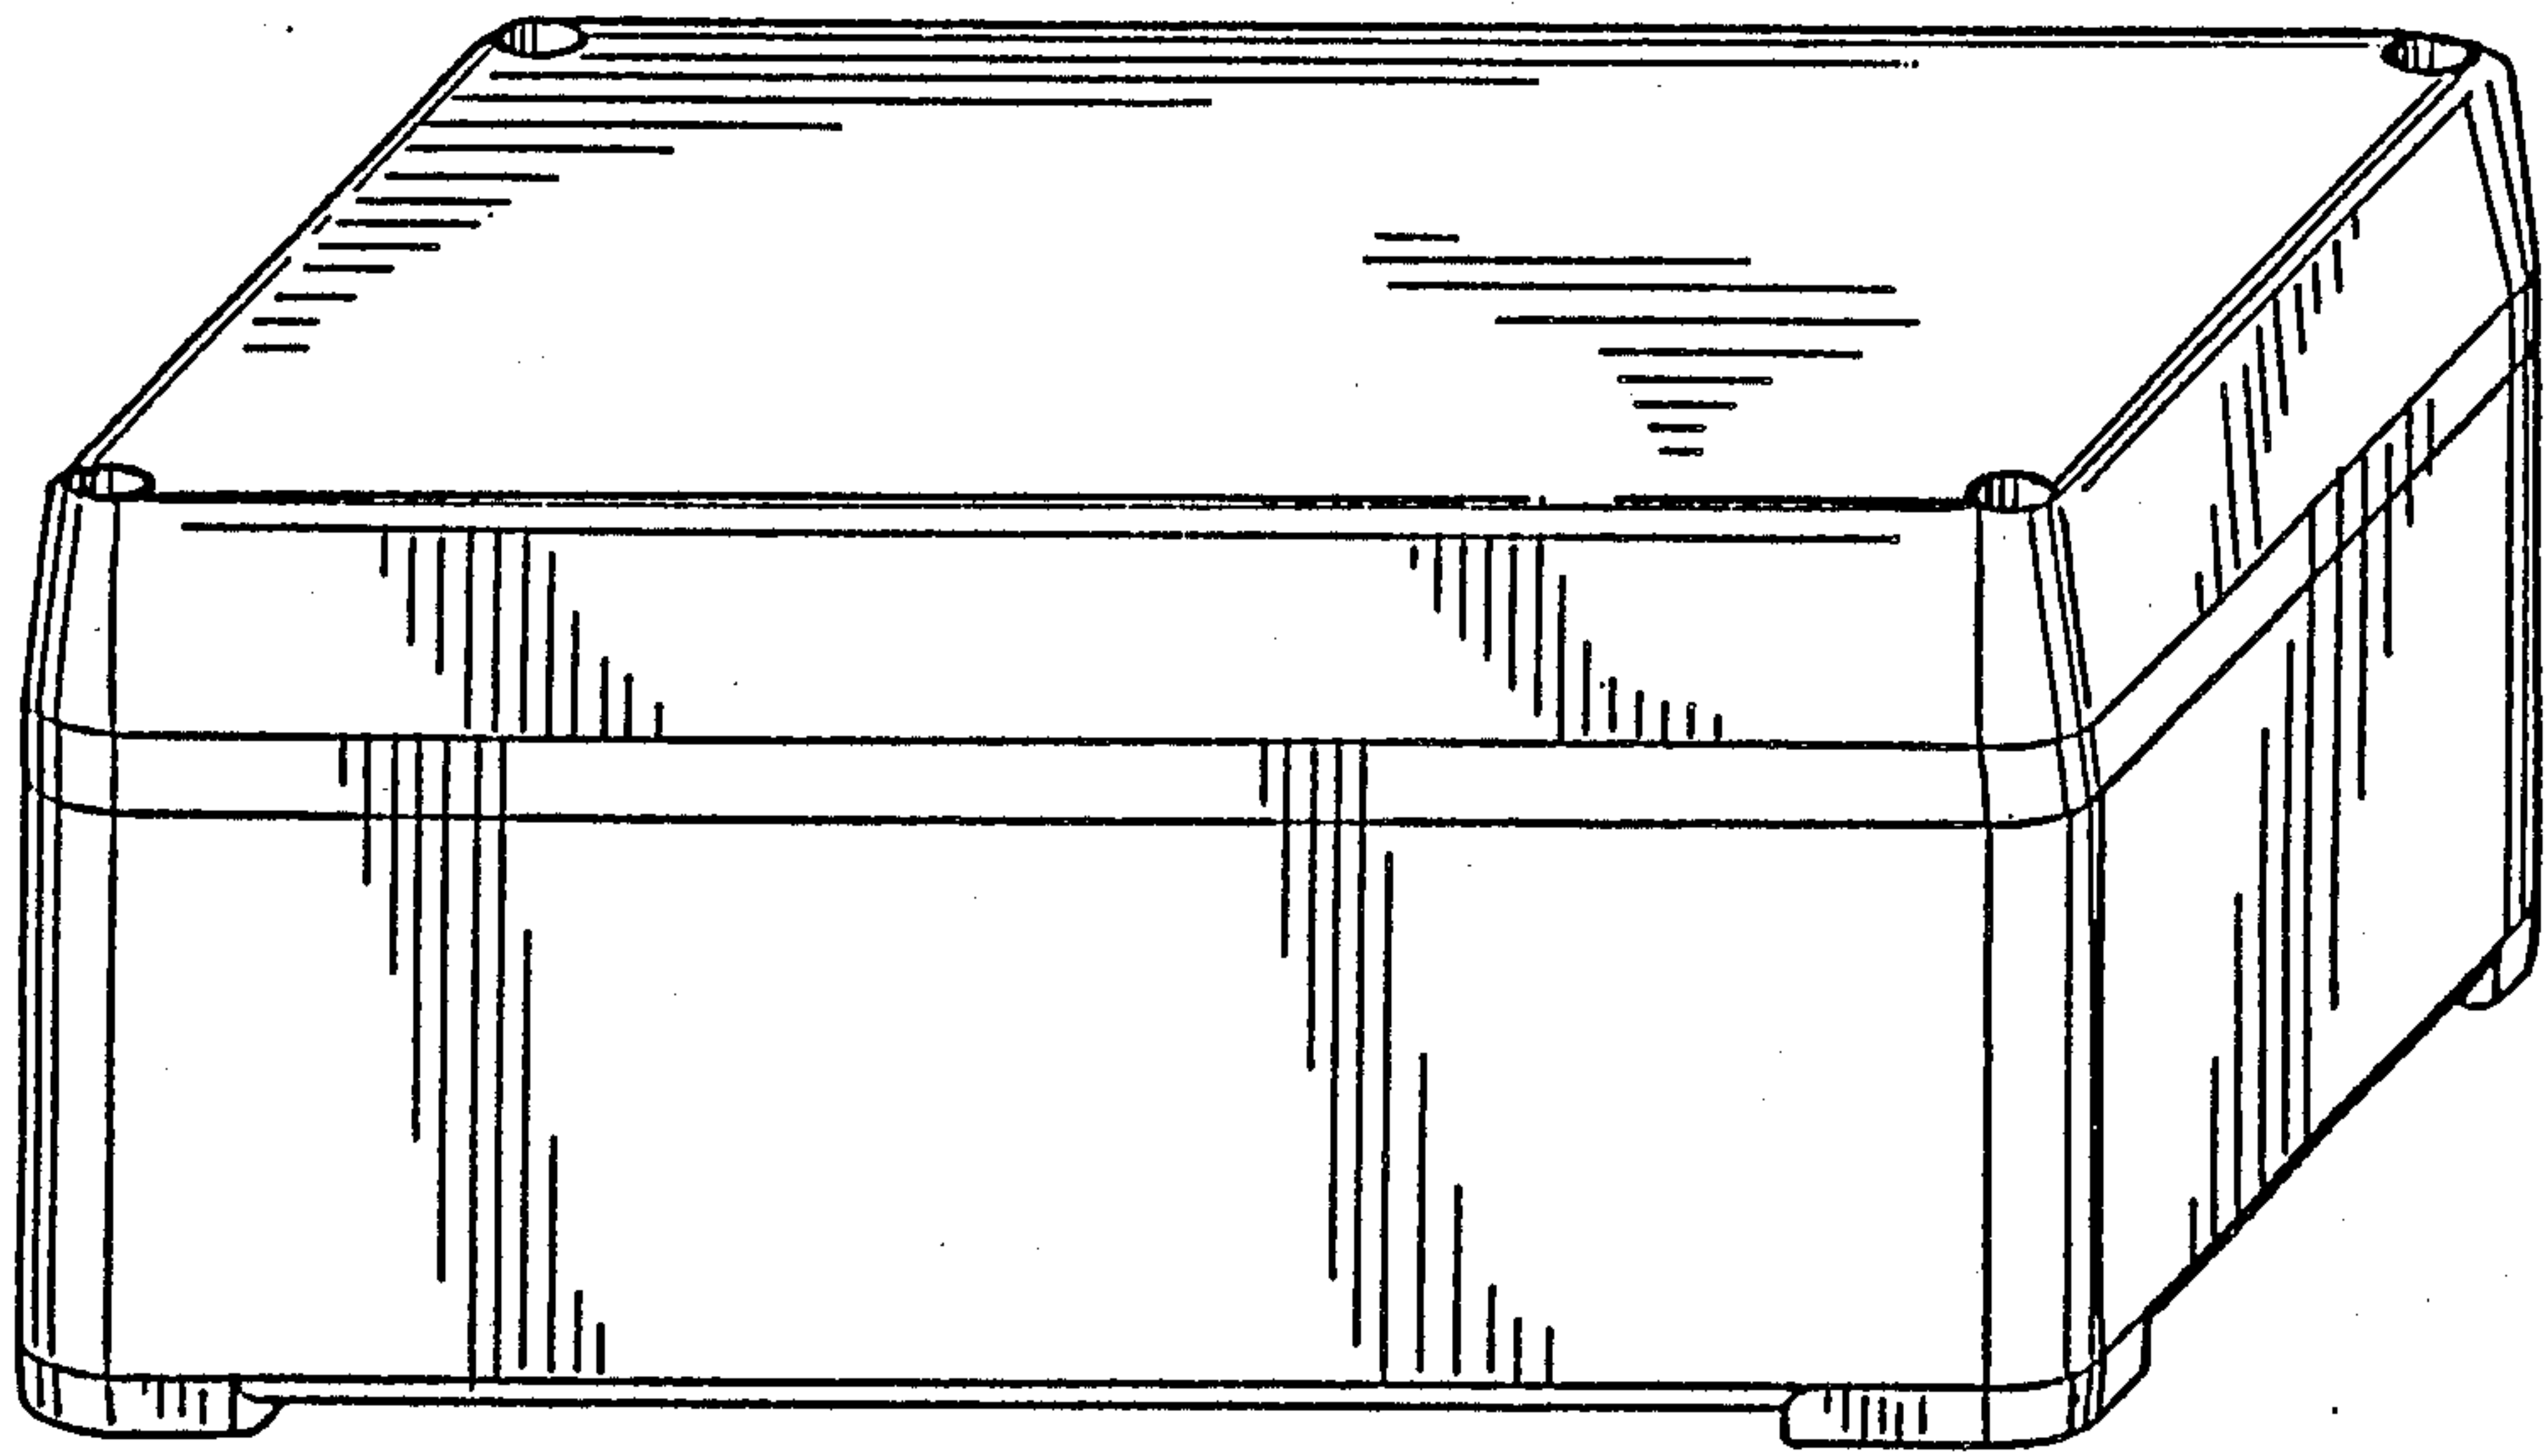

FIG. 1

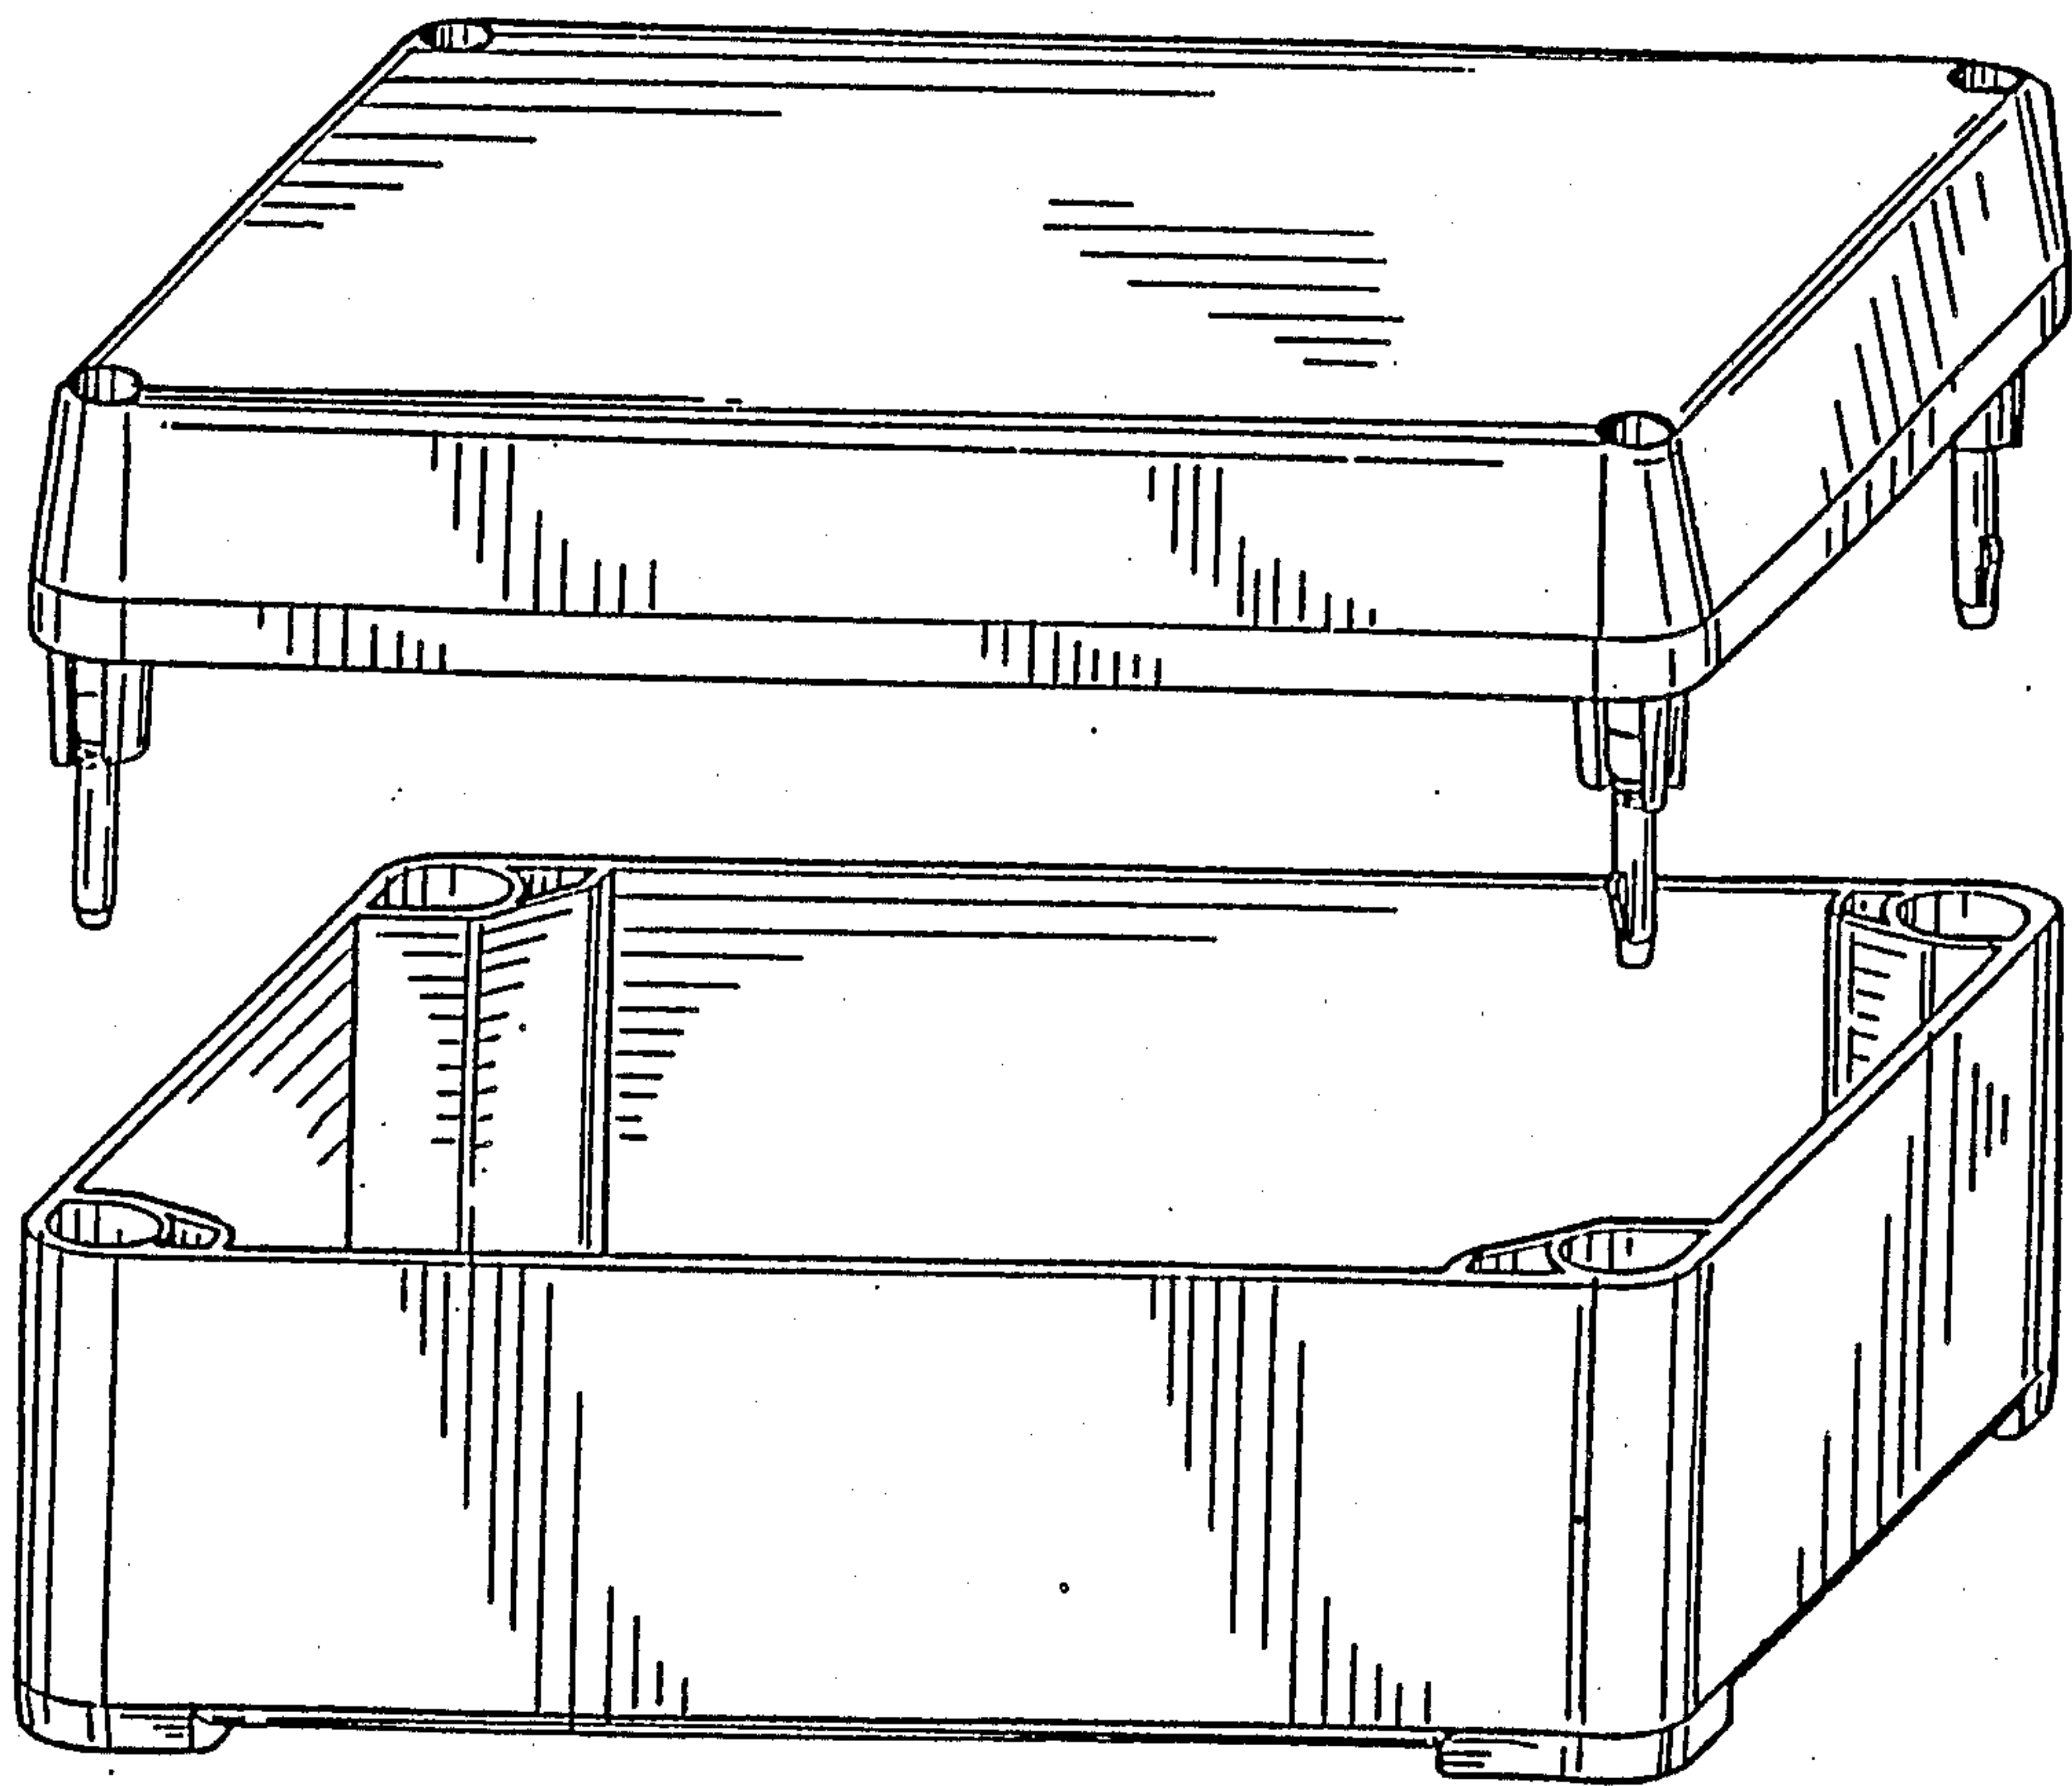

FIG. 2

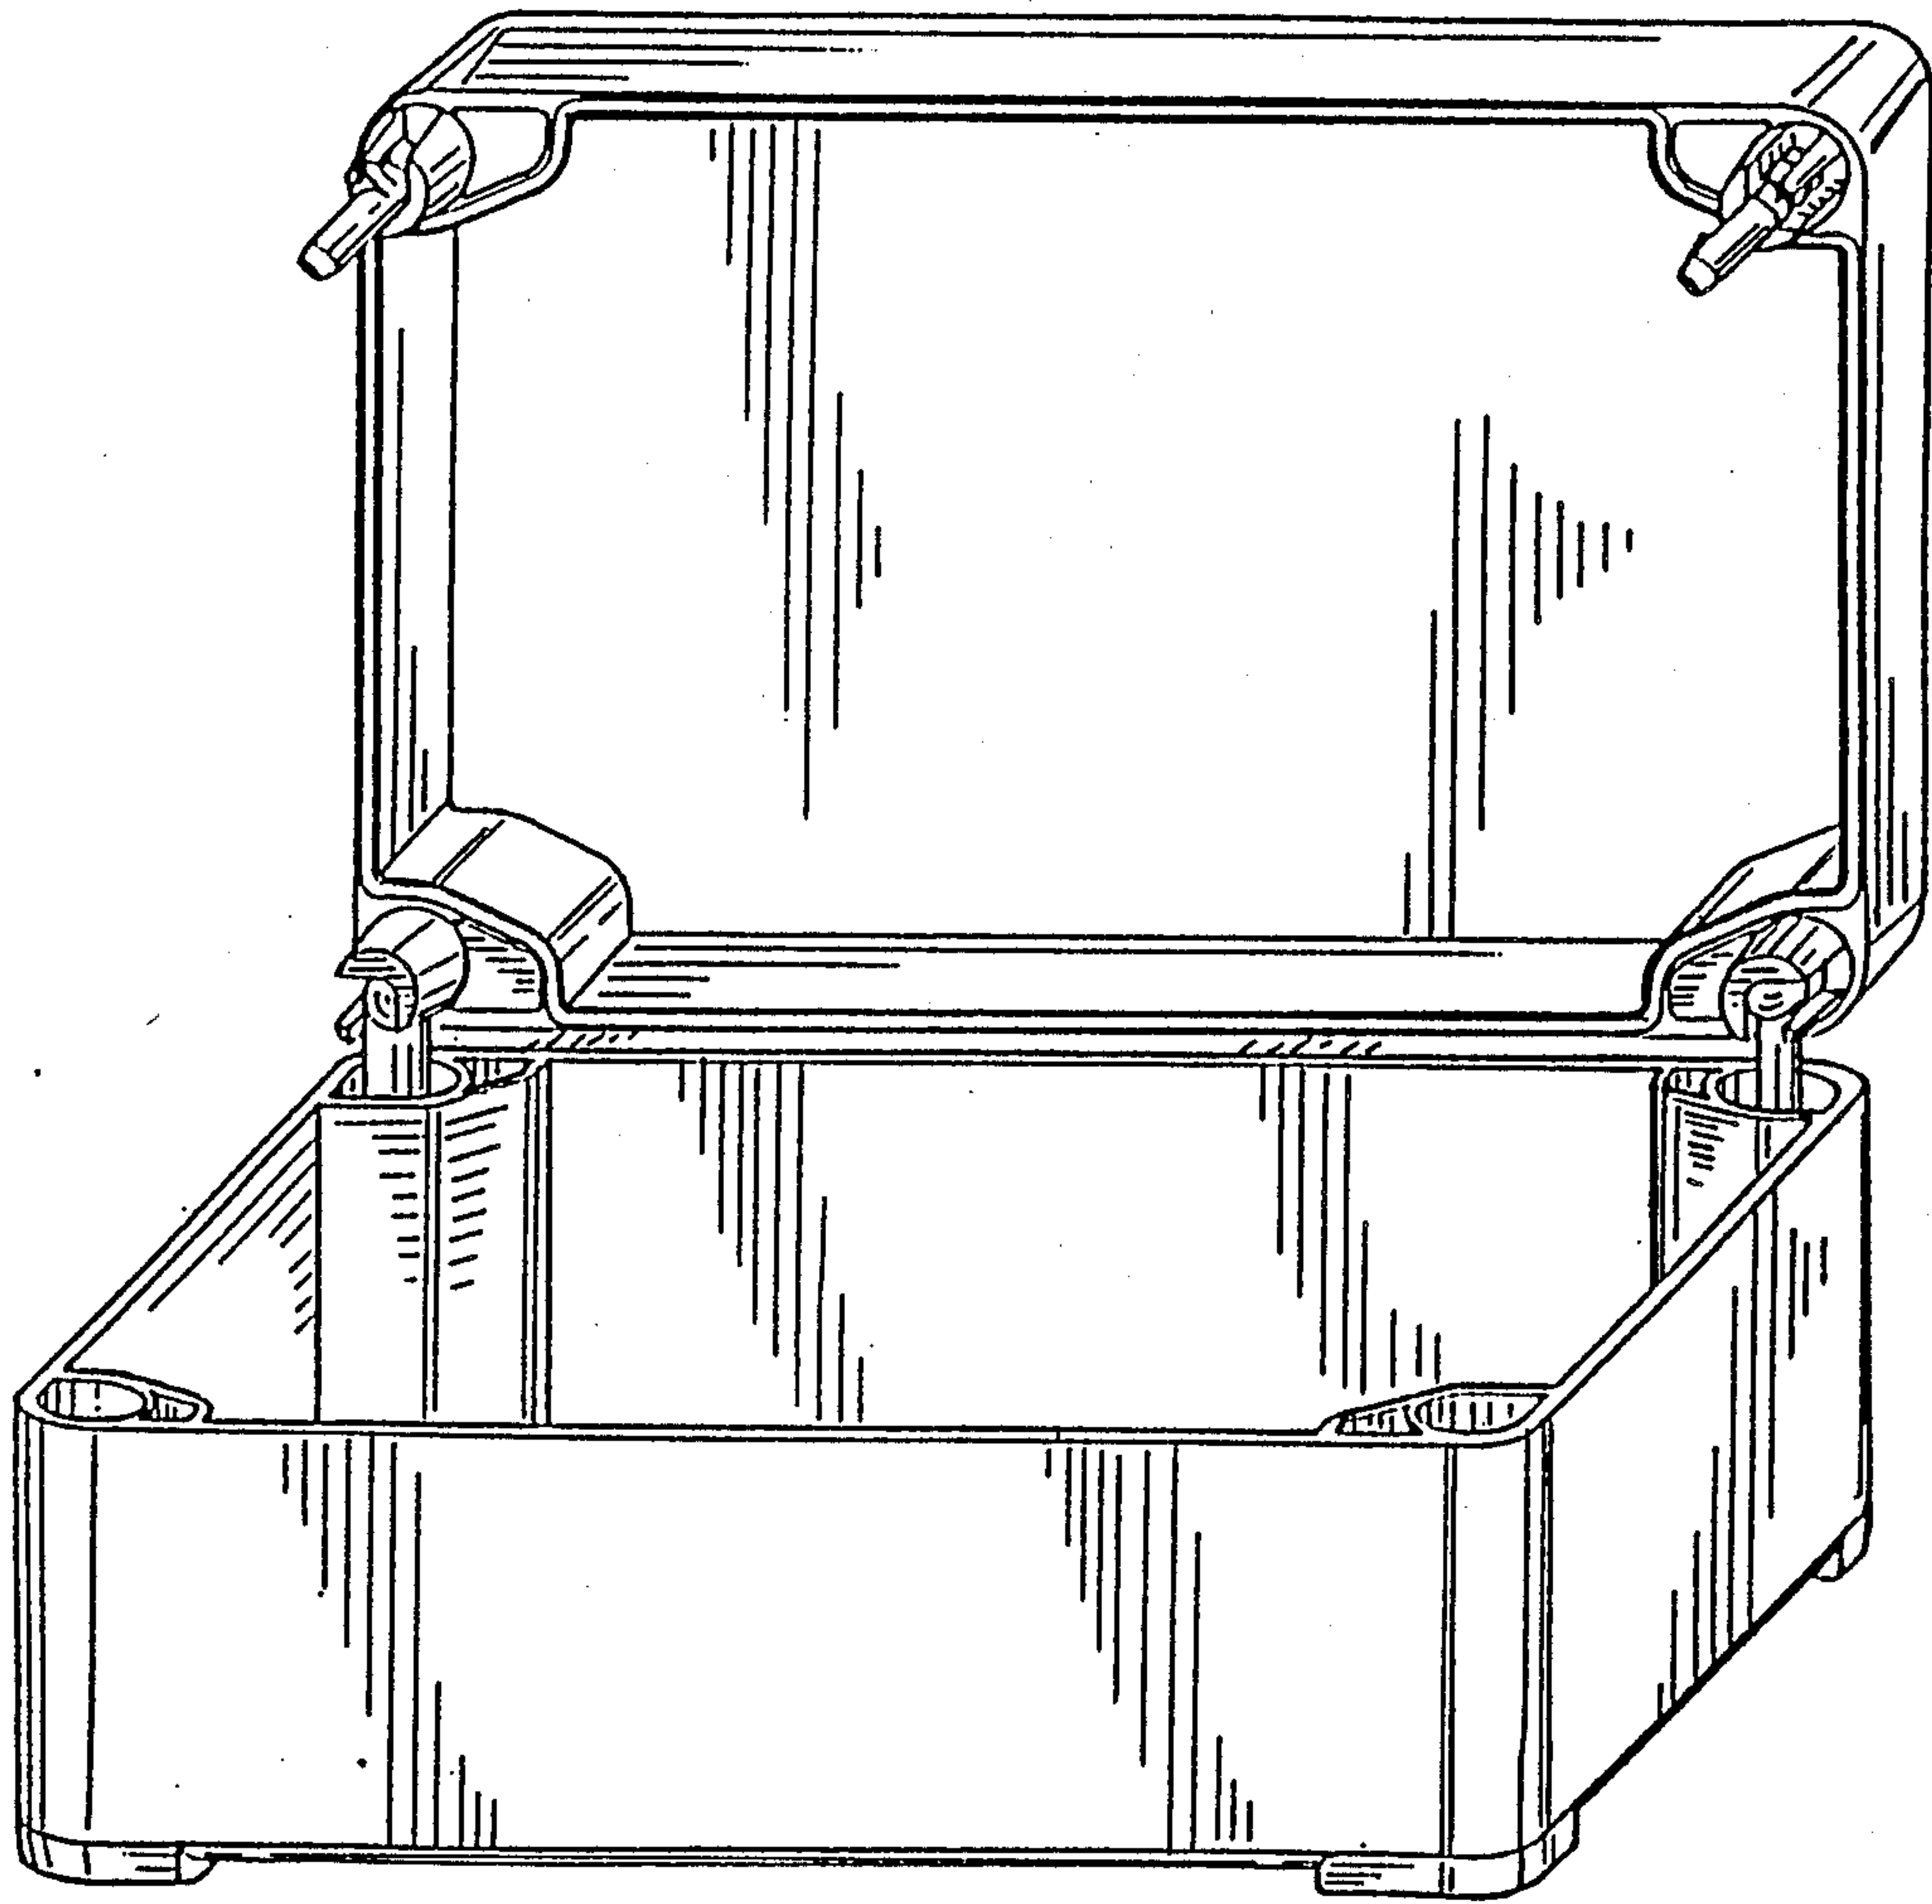

FIG. 3
