[57] CLAIM

The ornamental design for a bicycle wheel spoke, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a bicycle wheel spoke showing the new design.

FIG. 2 is a top plan view thereof.

FIG. 3 is a bottom plan view thereof.

FIG. 4 is a left side elevation view thereof.

FIG. 5 is a right side elevation view thereof.

FIG. 6 is a greatly enlarged fragmentary bottom plan view of the portion thereof within the circle 6 in FIG. 3, showing the gradual transition of one color into the next color.

The characteristic feature of my design resides in the spoke having nine colored sections, wherein the color of sections 2 through 7 gradually changes into the color that is adjacent to its right, as best illustrated in FIG. 6, so as to give a rainbow effect between sections 2 through 8, the specific color of each section starting from left to right being silver, violet, dark blue, blue, green, yellow, orange, red and silver, respectively.
