[57] CLAIM

The ornamental design for a wire separator structure, as shown and described.

DESCRIPTION

FIG. 1 is an exploded front, top and right side perspective view of wire separator structure showing my new design;

FIG. 2 is a front elevational view thereof in assembled relationship, the rear elevational view being a mirror image thereof;

FIG. 3 is an end elevational view thereof, the opposite end being a mirror image;

FIG. 4 is a bottom plan view thereof;

FIG. 5 is a front, top and right side perspective view of the wedge member of the structure showing a shallow rectangle rectangular recess in one end. In all other respects, the wedge member shown in FIG. 5 is as shown in FIGS. 1-4;

FIGS. 6 and 7 are respectively front elevational view of two embodiments thereof, differing only in the number of openings therethrough, and the resultant length thereof from each other and from the separator structure shown in FIGS. 1-4 respectively.
