[57] CLAIM

The ornamental design for a concession booth, as
shown and described.

DESCRIPTION

FIG. 1 is a perspective view of the concession booth
showing my new design;
FIG. 2 is a top plan view thereof;
FIG. 3 is the bottom plan view thereof;
FIG. 4 is an elevational view of one side, the opposite
side being a mirror image;
FIG. 5 is a front elevational view thereof;
FIG. 6 is a rear elevational view thereof opposite that
shown in FIG. 5.

The concession booth is the shape and configuration of
a round cannister in two pieces with a flat top and a flat
bottom and parallel sides, with the exception of the
extreme lower section where there is a lip around the
circumference below which the sides incline inwards.
The cannister has a rectangular-shaped hole in the side
removing approximately one-third of the cannister side
and on the lower border of the hole there is a section
running horizontally.
