[57] **CLAIM**

The ornamental design of a multiple electrical outlet adapter with breaker alarm, as shown and described.

**DESCRIPTION**

FIG. 1 is a front elevational view of a multiple electrical

outlet adapter with breaker alarm showing my new design;

FIG. 2 is a left side elevational view thereof, the right side elevational view being a mirror image. The broken lines are included only for the purpose of illustrating the position of the receptacle per se and form no part of the claimed design;

FIG. 3 is a top plan view thereof;

FIG. 4 is a bottom plan view thereof, the broken lines being included only for the purpose of illustrating the position of the receptacle per se and form no part of the claimed design;

FIG. 5 is a back elevational view thereof;

FIG. 6 is a left side elevational view of a multiple electrical outlet adapter with breaker alarm showing a second embodiment of my new design, the right side elevational view being a mirror image, with the front and rear elevational views, and the top and bottom plan views being the same as the first embodiment;

FIG. 7 is a left side elevational view of a multiple electrical outlet adapter with breaker alarm showing a third embodiment of my new design, the right side elevational view being a mirror image, with the front and rear elevational views, and the top and bottom plan views being the same as the first embodiment;

FIG. 8 is a left side elevational view of a multiple electrical outlet adapter with breaker alarm showing a fourth embodiment of my new design, the right side elevational view being a mirror image, with the front and rear elevational views, and the top plan view being the same as the first embodiment. The broken lines are included only for the purpose of illustrating the position of the receptacle per se and form no part of the claimed design;

FIG. 9 is a left side elevational view of a multiple electrical outlet adapter with breaker alarms showing a fifth embodiment of my new design, the right side elevational view being a mirror image, with the front and rear elevational views, and the top plan view being the same as the first embodiment;

FIG. 10 is a left side elevational view of a multiple electrical outlet adapter with breaker alarm showing a sixth embodiment of my new design, the right side elevational view being a mirror image, with the front and rear elevational views, and the top plan view being the same as the first embodiment;

FIG. 11 is a bottom plan view of the fourth, fifth and sixth embodiments;

FIG. 12 is a front elevational view of a multiple electrical outlet adapter with breaker alarm showing a seventh embodiment of my new design;

FIG. 13 is a left side elevational view thereof, the right side elevational view being a mirror image. The broken lines are included only for the purpose of illustrating the position of the receptacle per se and form no part of the claimed design. The broken lines are included only for the purpose of illustrating the position of the receptacle per se and form no part of the claimed design;

FIG. 14 is a top plan view thereof;

FIG. 15 is a bottom plan view thereof;

FIG. 16 is a back elevational view thereof;

FIG. 17 is a left side elevational view of a multiple electrical outlet adapter with breaker alarm showing an eighth embodiment of my new design, the right side elevational view being a mirror image, with the front and rear elevational views, and the top and bottom plan views being the same as the seventh embodiment;

FIG. 18 is a left side elevational view of a multiple electrical outlet adapter with breaker alarm showing a ninth embodiment of my new design, the right side elevational view being a mirror image, with the front and rear elevational views, and the top and bottom plan views being the same as the seventh embodiment.
