[57] **CLAIM**

The ornamental design for a combination display package and flip file holder for compact discs boxes, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of the combination display package and flip file holder for compact discs boxes; FIG. 2 is an exploded view of the combination display package and flip file holder for compact discs boxes shown in FIG. 1, but without the outer shrink-wrap cover; FIG. 3 is a bottom plan view of the combination display package and flip file holder for compact discs boxes of FIG. 1; FIG. 4 is a left and right view of the long side of the combination display package and flip file holder for compact discs boxes of FIG. 1; FIG. 5 is a front and back view of the short side of the combination display package and flip file holder for compact discs boxes of FIG. 1; FIG. 6 is a cross-sectional view taken along line 6—6 in FIG. 1 of the combination display package and flip file holder for compact discs boxes of FIG. 1; FIG. 7 is a side view of one of the long side rails of the rectangular-type frame of the combination display package and flip file holder for compact discs boxes shown in FIG. 2; FIG. 8 is a top view of the long side rail shown in FIG. 6 for the combination display package and flip file holder for compact discs boxes; and FIG. 9 is a perspective view of the flip file holder for compact discs in accordance with the embodiment of the combination display package and flip file holder for compact discs boxes shown in FIG. 1, but without the outer shrink-wrap cover, the middle printed sheet, or the middle tie bars located between the compact discs and the printed sheet.
