[57] CLAIM

The ornamental design for an orthodontic bracket, as shown and described.

DESCRIPTION

FIG. 1 is a top, front and right side perspective view of

an orthodontic bracket showing our new design as embodied in a lower bicuspid tooth bracket; FIG. 2 is a front elevational view thereof; FIG. 3 is a top, rear and left side perspective view thereof; FIG. 4 is a rear elevational view thereof; FIG. 5 is a right side elevational view thereof, the left side being a mirror image of that shown; FIG. 6 is a top plan view thereof; FIG. 7 is a bottom plan view thereof; FIG. 8 is a right side elevational view of an orthodontic bracket showing our new design as alternately embodied in a lower bicuspid tooth bracket, the only difference residing in the rear of the archwire slot; FIG. 9 is a right side elevational view of an orthodontic bracket showing our new design as alternately embodied in a lower bicuspid tooth bracket, the only difference residing in the rear of the archwire slot; FIG. 10 is a right side elevational view of an orthodontic bracket showing our new design as alternately embodied in a lower bicuspid tooth bracket, the only difference residing in the rear of the archwire slot; FIG. 11 is a right side elevational view of an orthodontic bracket showing our new design as alternately embodied in a lower bicuspid tooth bracket, the only difference residing in the rear of the archwire slot; FIG. 12 is a top, front and right side perspective view of an orthodontic bracket showing our new design as alternately embodied in a lower cuspid tooth bracket; FIG. 13 is a front elevational view thereof; FIG. 14 is a right side elevational view thereof, the left side being substantially a mirror image of that shown; FIG. 15 is a bottom plan view thereof; FIG. 16 is a top, front and right side perspective view of an orthodontic bracket showing our new design as alternately embodied in an upper cuspid tooth bracket; FIG. 17 is a front elevational view thereof; FIG. 18 is a right side elevational view thereof, the left side being substantially a mirror image of that shown; and FIG. 19 is a bottom plan view thereof.
