[57] **CLAIM**

The ornamental design for a confection, as shown and described.

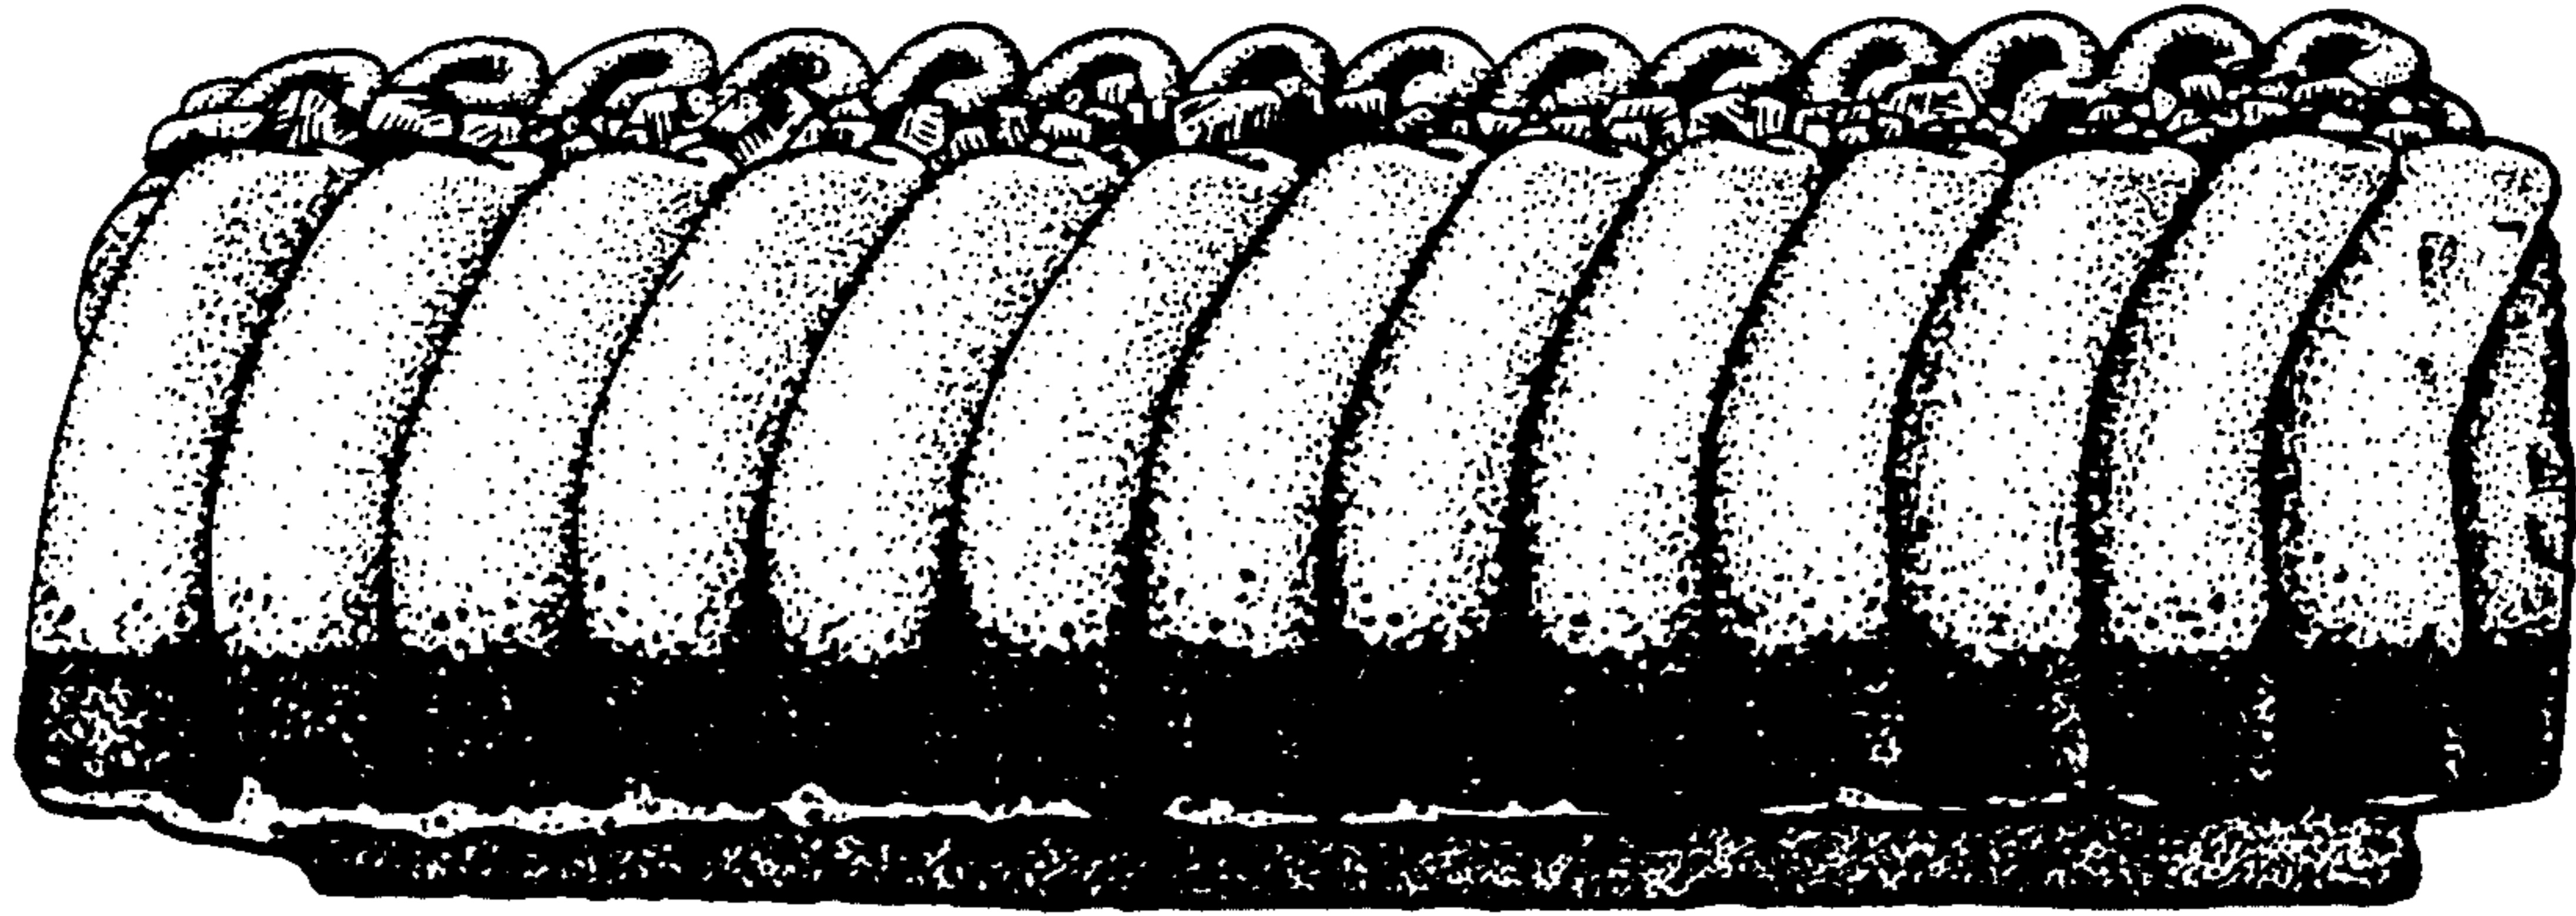

**DESCRIPTION**

FIG. 1 is a top perspective view of a confection showing my new design;  
FIG. 2 is a side elevational view thereof; and  
FIG. 3 is a top plan view thereof.  
The rear view corresponds to the front view of the design. The left side view of the design is a mirror image of the right side view. The bottom view is plain, since it is the surface on which the product is supported during its manufacture.
