[57] CLAIM

The ornamental design for a housing for electrical equipment, as shown and described.

DESCRIPTION

FIG. 1 is a top, front and left side perspective view of a housing for electrical equipment showing our new design;
 FIG. 2 is a top plan view thereof;
 FIG. 3 is a front elevational view thereof, the rear elevational view being a mirror image;
 FIG. 4 is a bottom plan view thereof;
 FIG. 5 is a left side elevational view thereof, the side opposite being a mirror image;
 FIG. 6 is a top, front and left side perspective view of a second embodiment thereof, the top view being the same as that of FIG. 1, and the undisclosed rear and right side views being mirror images of the front view and left side elevational views of those shown in FIG. 6;
 FIG. 7 is a top, front and left side perspective view of a third embodiment of indeterminate height thereof, the undisclosed rear and right side view being mirror images of those shown in FIG. 7; and
 FIG. 8 is a top, front and left side perspective views of a fourth embodiment thereof, the undisclosed rear and right side views being mirror images of those shown in FIG. 7, and the bottom plan views of second and third embodiments being identical to FIG. 4 of the first embodiment, and the bottom plan of the fourth embodiment being identical to two bottom plan views of FIG. 4 is axial alignment.
