[57] **CLAIM**

The ornamental design for a combination bar and bracket assembly for a storage or display rack, as shown and described.

DESCRIPTION

FIG. 1 is a top, front, and left side perspective view of a combination bar and bracket assembly for a storage or display rack showing my new design;

FIG. 2 is a left side elevational view of the bar and single bracket portion thereof;

FIG. 3 is a top, front, and left side perspective view of the bar portion thereof, with the rear being identical in

appearance to the front and the other elements omitted for clarity of illustration;

FIG. 4 is a top plan view of the bar portion thereof, the bottom being identical in appearance to that shown;

FIG. 5 is a left side elevational view of the bar portion thereof, with the right side being identical in appearance to that shown;

FIG. 6 is a top plan view of the single bracket portion thereof with the other elements omitted for clarity of illustration;

FIG. 7 is a left side elevational view of the signal bracket portion thereof, the right side being a mirror image of that shown;

FIG. 8 is a bottom plan view of the single bracket portion thereof;

FIG. 9 is a front elevational view of the single bracket portion thereof;

FIG. 10 is a rear elevational view of the single bracket portion thereof;

FIG. 11 is a left side elevational view of the double bracket portion thereof, with the right side being a mirror image of that shown and the other elements omitted for clarity of illustration;

FIG. 12 is a top plan view of the double bracket portion thereof;

FIG. 13 is a bottom plan view of the double bracket portion thereof;

FIG. 14 is a front elevational view of the double bracket portion thereof;

FIG. 15 is a rear elevational view of the double bracket portion thereof;

FIG. 16 is a left side elevational view of the price channel holder portion thereof with the other elements omitted for clarity of illustration;

FIG. 17 is a top plan view of the price channel holder portion thereof;

FIG. 18 is a bottom plan view of the price channel holder portion thereof;

FIG. 19 is a front elevational view of the price channel holder portion thereof; and,

FIG. 20 is a rear elevational view of the price channel holder portion thereof.
