### [57] CLAIM

The ornamental design for a combination integral remote control and cordless handset unit together with a telephone base unit with an antenna, as shown and described.

### DESCRIPTION

FIG. 1 is a front, top and right side perspective view of a combination integral remote control and cordless handset telephone and its base with an antenna showing our new design;

FIG. 2 is a top plan view of the integral remote control cordless handset telephone unit;

FIG. 3 is a right side elevational view of the integral remote control cordless handset telephone unit; the side opposite being a mirror image;

FIG. 4 is a bottom plan view of the integral remote control cordless handset telephone unit;

FIGS. 5 and 6 are respectively top and bottom ends of the integral remote combined and cordless handset telephone unit alone;

FIG. 7 is a right side, top and back side of the integral handset unit alone;

FIGS. 8 and 9 are respectively left and right side elevational views of the base unit alone; with the antenna truncated in FIG. 9;

FIG. 10 is a top plan view of the base unit alone;

FIG. 11 is a front elevational view of the base unit with antenna truncated for convenience;

FIG. 12 is a rear elevational view of the base unit with antenna extended; and,

FIG. 13 is a front, top and right side perspective view of a second embodiment of the integral remote control cordless handset telephone, with the sole difference being a different earpiece.
