[57] CLAIM

The ornamental design for a telecommunication device with hinged cover.

DESCRIPTION

FIG. 1 is a perspective view of a telecommunication device showing my new design, with its hinged cover in a partial open position;

FIG. 2 is a front elevational view thereof with its hinged cover in closed position;

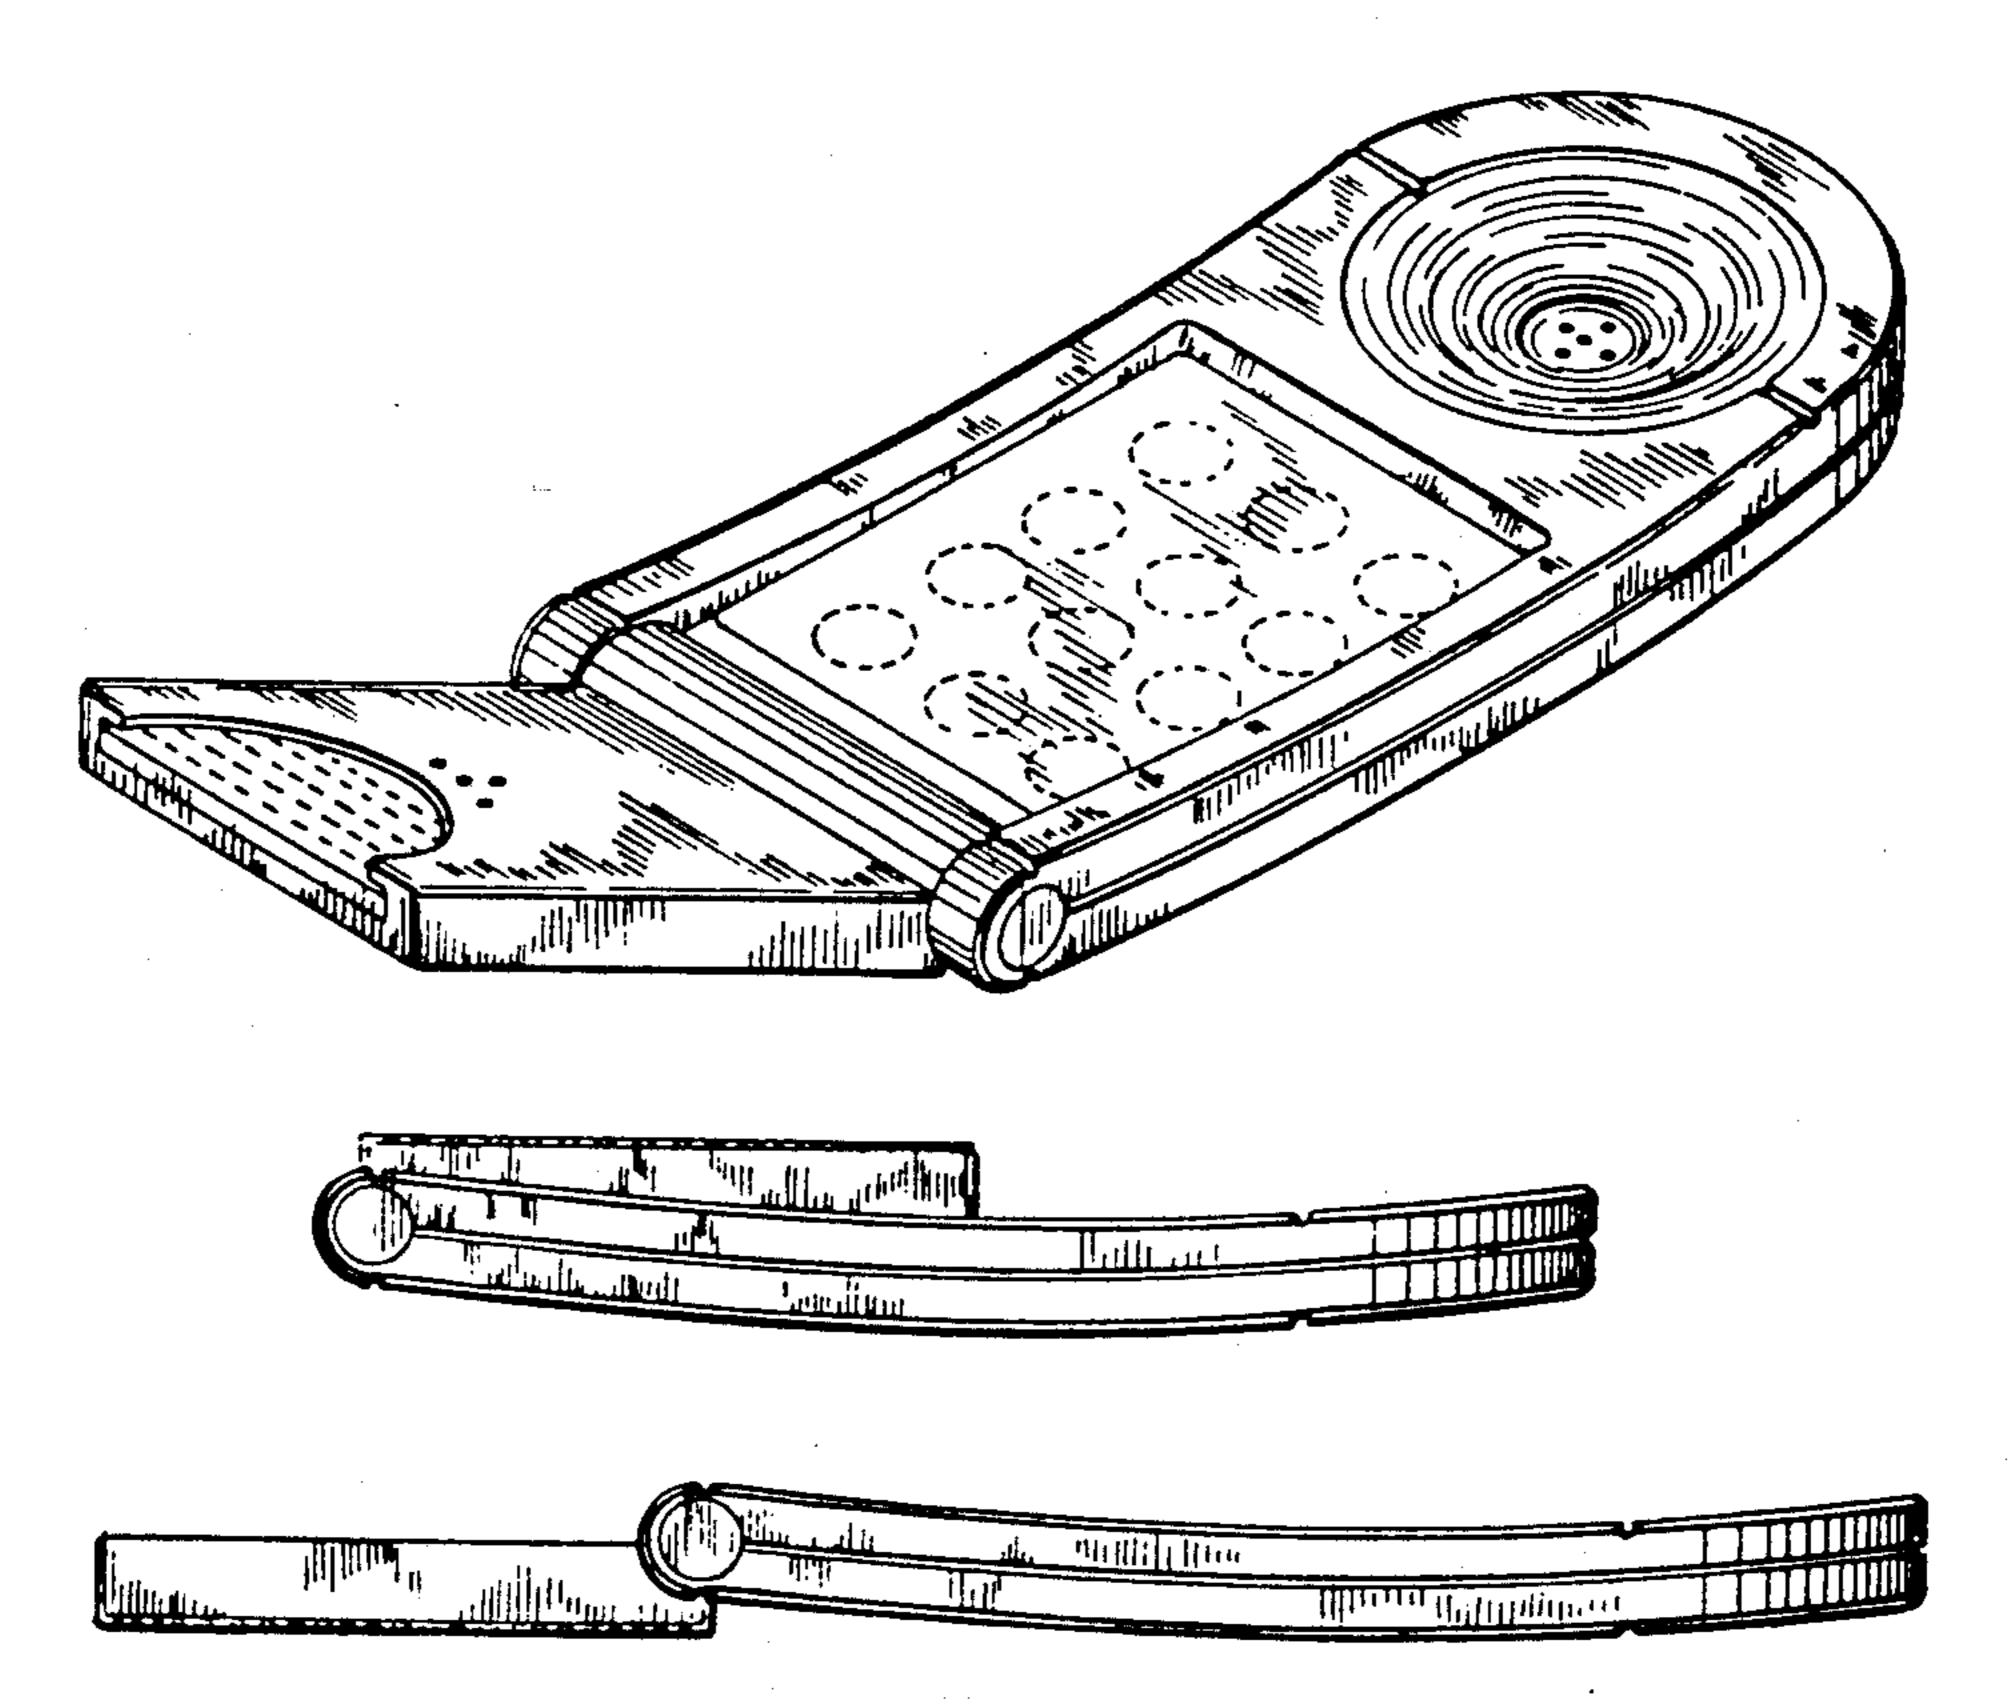

FIG. 3 is a front elevational view thereof, with its hinged cover in full open position;

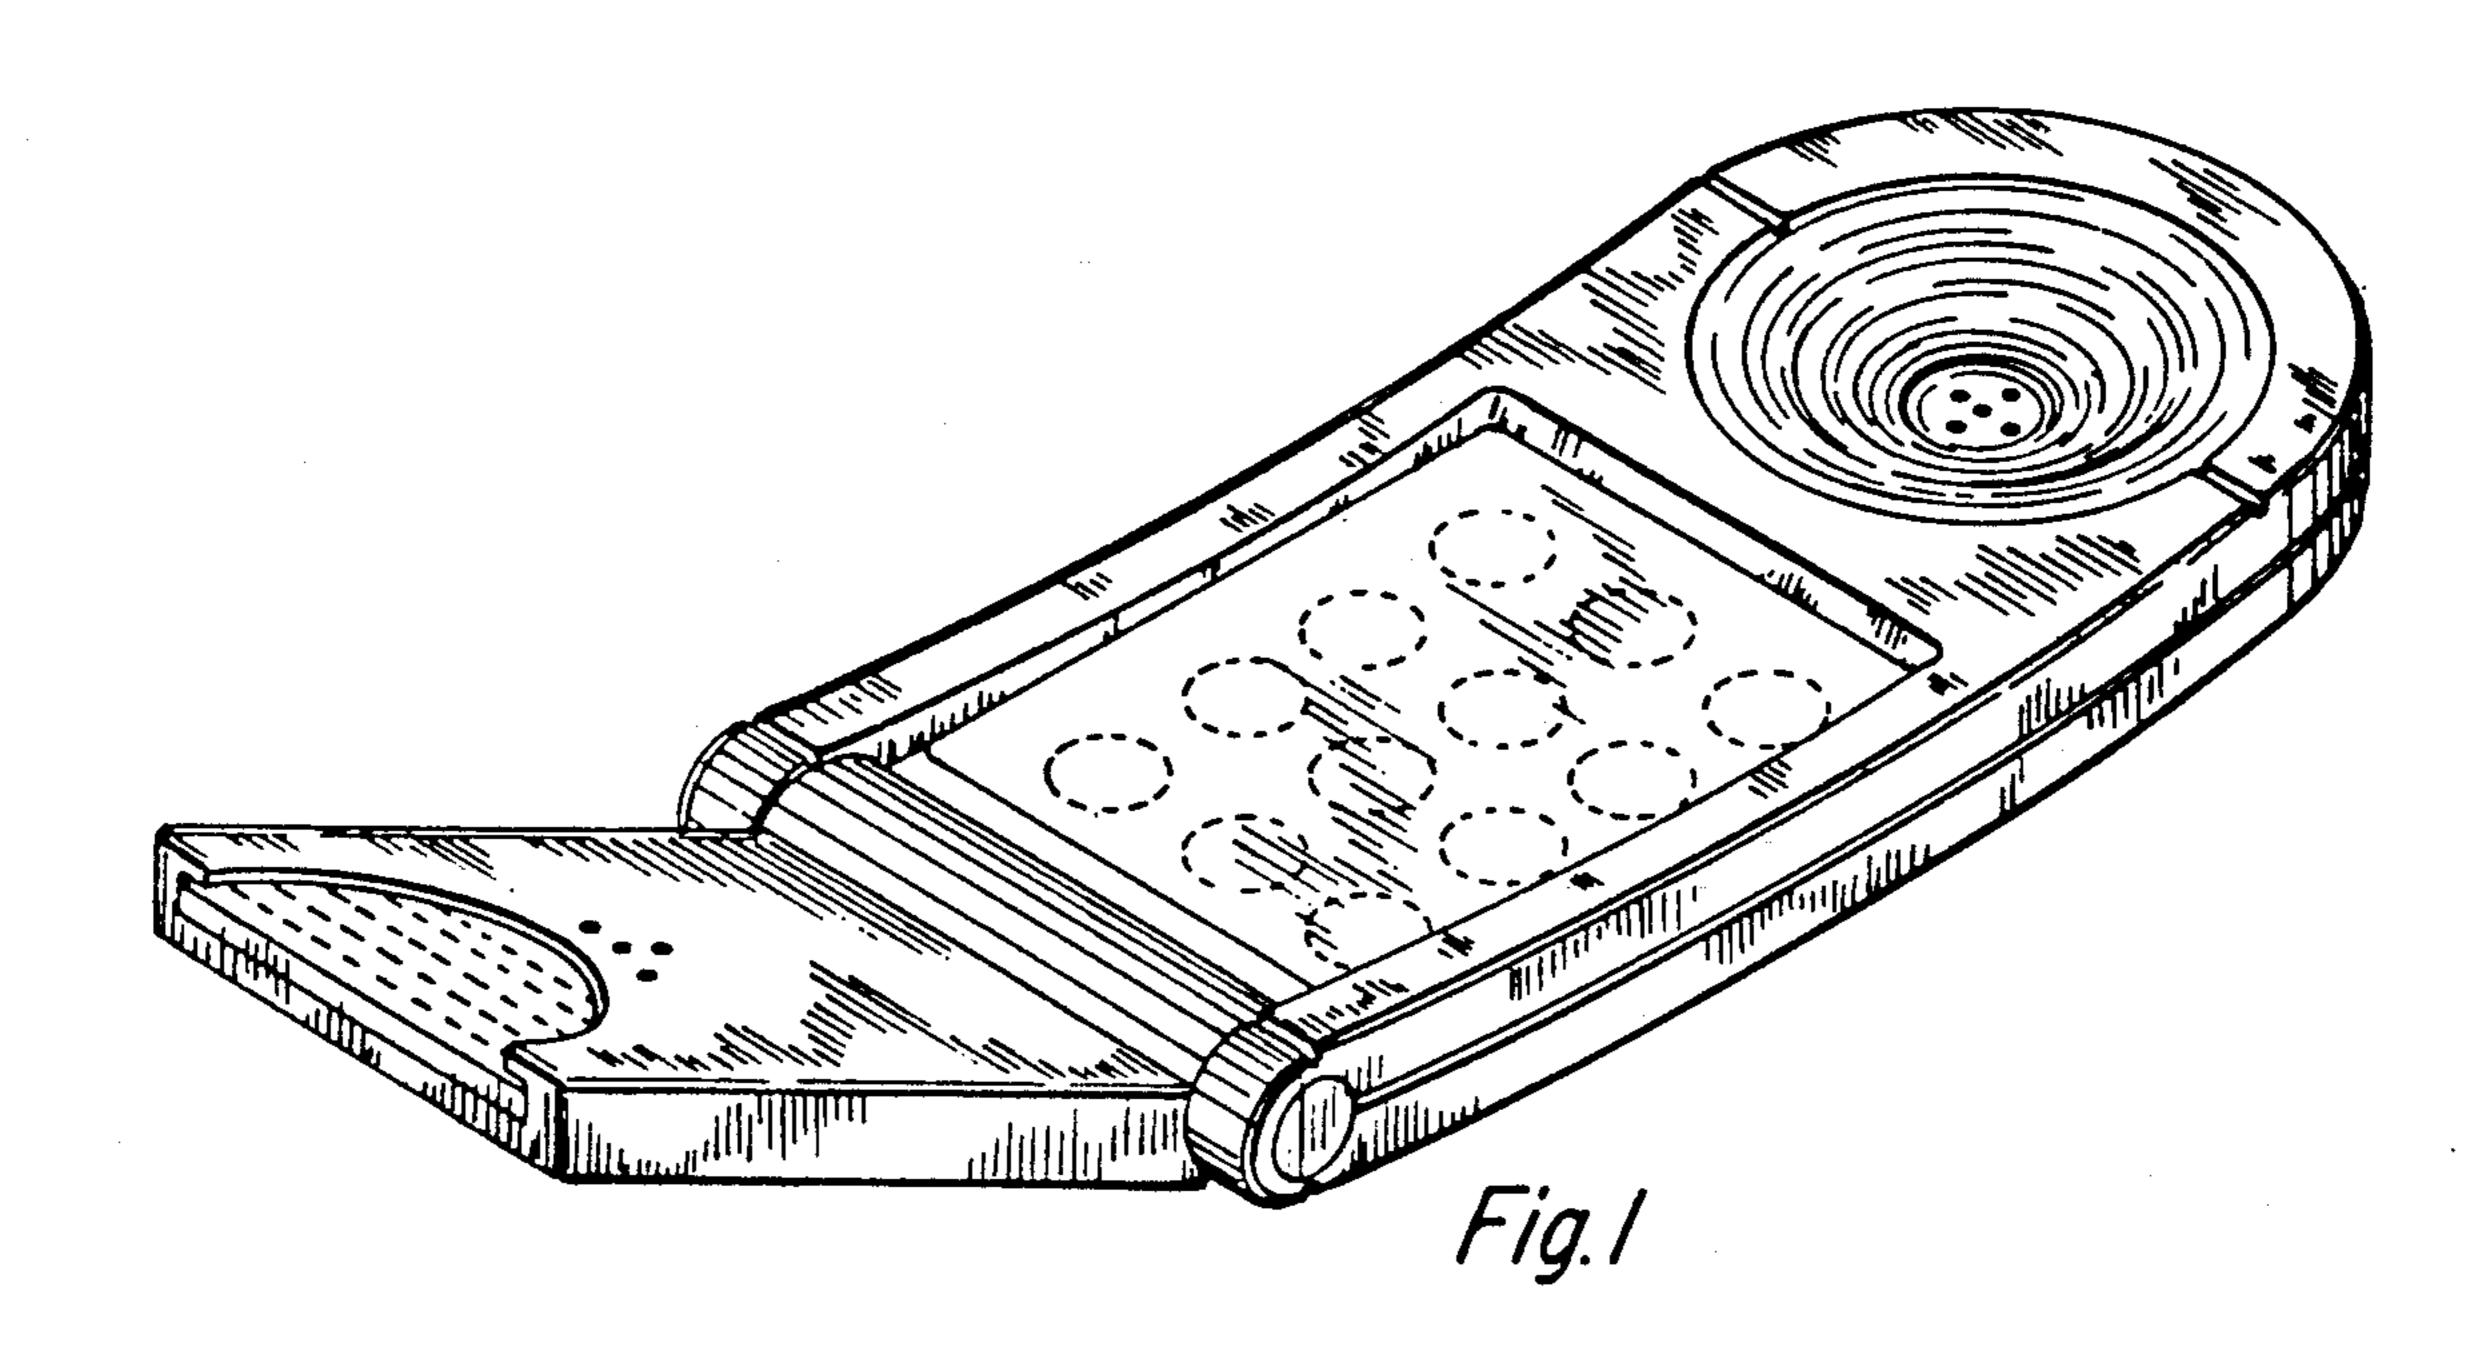

FIG. 4 is a rear elevational view thereof, with its cover in closed position;

FIG. 5 is a right side elevational view thereof, with its hinged cover in full position, the side opposite being a mirror image; and,

FIG. 6 is a right side elevational view thereof, with its hinged cover in a closed position, the side opposite being a mirror image.

The broken line showing of pushbuttons in FIGS. 1 and 3 is for illustrative purposes only and forms no part of the claimed design.
