[57] CLAIM

The ornamental design for an optical connector strain relief boot, as shown and described.

DESCRIPTION

FIG. 1 is an exploded front and upper right perspective view of an optical connector strain relief boot showing our new design with the two members separated; FIG. 2 is an exploded rear and upper left perspective view thereof; FIG. 3 is a front and upper right perspective view of an optical connector strain relief boot showing the design with the two members assembled; FIG. 4 is a rear and upper left perspective view thereof; FIG. 5 is a right side elevational view of an optical connector strain relief boot showing the design with the two members assembled on an enlarged scale, the left side elevational, top plan and bottom plan views having the same appearance; FIG. 6 is a rear elevational view thereof; and, FIG. 7 is a front elevational view thereof.

FIG. 3

FIG. 4

FIG. 5

FIG. 6

FIG. 7
