[57] CLAIM

The ornamental design for a sensor for controlling the water supply of lavatory fixtures, as shown and described.

DESCRIPTION

FIG. 1 is a top perspective view of a first embodiment of a sensor for controlling the water supply of lavatory fixtures according to my new design;

FIG. 2 is a bottom perspective view thereof;

FIG. 3 is a front elevational view thereof;

FIG. 4 is a left side elevational view thereof;

FIG. 5 is a top perspective view of a second embodiment of a sensor for controlling the water supply of lavatory fixtures showing my new design;

FIG. 6 is a bottom perspective view of FIG. 5;

FIG. 7 is a front elevational view of FIG. 5;

FIG. 8 is a left side elevational view of FIG. 5;

FIG. 9 is a top perspective view of a third embodiment of a sensor for controlling the water supply of lavatory fixtures showing my new design;

FIG. 10 is a bottom perspective view of FIG. 9;

FIG. 11 is a front elevational view of FIG. 9;

FIG. 12 is a left side elevational view of FIG. 9;

FIG. 13 is a top perspective view of a fourth embodiment of a sensor for controlling the water supply of lavatory fixtures showing my new design;

FIG. 14 is a bottom perspective view of FIG. 13;

FIG. 15 is a front elevational view of FIG. 13; and,

FIG. 16 is a left side elevational view of FIG. 13.

The right side elevational views pursuant to FIGS. 4, 8, 12 and 16 are mirror images thereof.
