[57] **CLAIM**

The ornamental design for a storage container for disk-shaped object, as shown and described.

DESCRIPTION

FIG. **1** is a top, front, left side perspective view of the storage container for disk-shaped object of the present invention in the open position;

FIG. **2** is a top plan view of the storage container for disk-shaped object of FIG. **2**;

FIG. **3** is a bottom plan view of the storage container for disk-shaped object of FIG. **1**;

FIG. **4** is a front view in elevation of the storage container for disk-shaped object of FIG. **1**;

FIG. **5** is a rear view in elevation of the storage container for disk-shaped object of FIG. **1**;

FIG. **6** is a left side view in elevation of the storage container for disk-shaped object of FIG. **1** with the right side view in elevation being a mirror image thereof;

FIG. **7** is a cross-sectional view along line **7—7** of the storage container for disk-shaped object of FIG. **2**;

FIG. **8** is a top, front, left side perspective view of the storage container for disk-shaped object of the present invention in the closed position;

FIG. **9** is a bottom, front, right side perspective view of the storage container for disk-shaped object of FIG. **8**;

FIG. **10** is a top plan view of the storage container for disk-shaped object of FIG. **8**;

FIG. **11** is a bottom plan view of the storage container for disk-shaped object of FIG. **8**;

FIG. **12** is a front view in elevation of the storage container for disk-shaped object of FIG. **8**;

FIG. **13** is a rear view in elevation of the storage container for disk-shaped object of FIG. **8**;

FIG. **14** is a left side view in elevation of the storage container for disk-shaped object of FIG. **8** with the right side view in elevation being a mirror image thereof; and,

FIG. **15** is a cross-sectional view along line **15—15** of the storage container for disk-shaped object of FIG. **10.**
