[57] **CLAIM**

The ornamental design for a combined ceiling fan and  
light fixture, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of the combination of the  
present invention, showing a first embodiment of the  
new design;  
FIG. 2 is a side elevation view of the embodiment  
shown in FIG. 1, on a reduced scale;  
FIG. 3 is a top plan view of the embodiment shown in  
FIG. 1, on a reduced scale;  
FIG. 4 is a bottom plan view of the embodiment shown  
in FIG. 1, on a reduced scale;  
FIG. 5 is a perspective view of the embodiment shown  
in FIG. 1 with the light fixture portion of the design  
moved to a different location;  
FIG. 6 is a perspective view of a second embodiment of  
the new design; and,  
FIG. 7 is a perspective view of a third embodiment of  
the new design.

The sole difference between the first and third embodi-  
ments is the number of lights. The sole difference be-  
tween the first and second embodiments is that the light  
fixtures are composed of transparent or semi-transpar-  
ent (e.g., frosted) glass material in a petal-type design  
(FIG. 6), as opposed to solid-metal canister-type lights.  
FIG. 5 indicates that the lighting assembly may be  
moved along the down-rod a distance from the fan  
assembly.

FIG. 3

FIG. 4

FIG. 5

FIG. 6

FIG. 7
