[57] CLAIM

The ornamental design for a cupboard door latch assembly, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a cupboard door latch assembly showing my new design, the fragmentary broken-line disclosure of a cupboard and cupboard door being for illustrative purposes only and forming no part of the claimed design;

FIG. 2 is an enlarged front elevational view of the actuator portion thereof;

FIG. 3 is an enlarged left side elevational view of the actuator portion thereof, the right side being a mirror image that shown;

FIG. 4 is a top plan view of the actuator portion thereof;

FIG. 5 is an enlarged front elevational view of the spring clip portion thereof, the rear being identical in appearance;

FIG. 6 is an enlarged right side elevational view of the spring clip portion thereof, the left side being identical in appearance;

FIG. 7 is an enlarged front elevational view of the door plate portion thereof;

FIG. 8 is an enlarged top plan view of the door plate portion thereof;

FIG. 9 is an enlarged left side elevational view of the door plate portion thereof, the right side being a mirror image;

FIG. 10 is an enlarged bottom plan view of the catch portion thereof;

FIG. 11 is an enlarged top plan view of the catch portion thereof;

FIG. 12 is an enlarged front elevational view of the catch portion thereof; and,

FIG. 13 is an enlarged left side elevational view of the catch portion thereof, the right side being a mirror image.

Portions of the assembly are omitted in the views for clarity of illustration.
