[57] CLAIM

The ornamental design for sheet of tags, as shown and described.

DESCRIPTION

FIG. 1 is a top, plan view of a sheet of tags showing my new design in a first embodiment having opaque tag ends and tail tips, the tags being arranged on a backing sheet for feeding through a printer, the sheet and pattern of tags thus preferably being repetitive from top to bottom, as shown, the tags and backing sheet both being sheets, whereby the edge views are neither revealing nor, therefore, shown, and the bottom is plane and unornamented; and,

FIG. 2 is a top plan view of a second, uniformly transparent embodiment also showing my new design differing only from FIG. 1 in this described feature.

Both embodiments are of conventional thickness and the dotted lines indicate strike lines along which the main portions of the adhesive labels are folded.

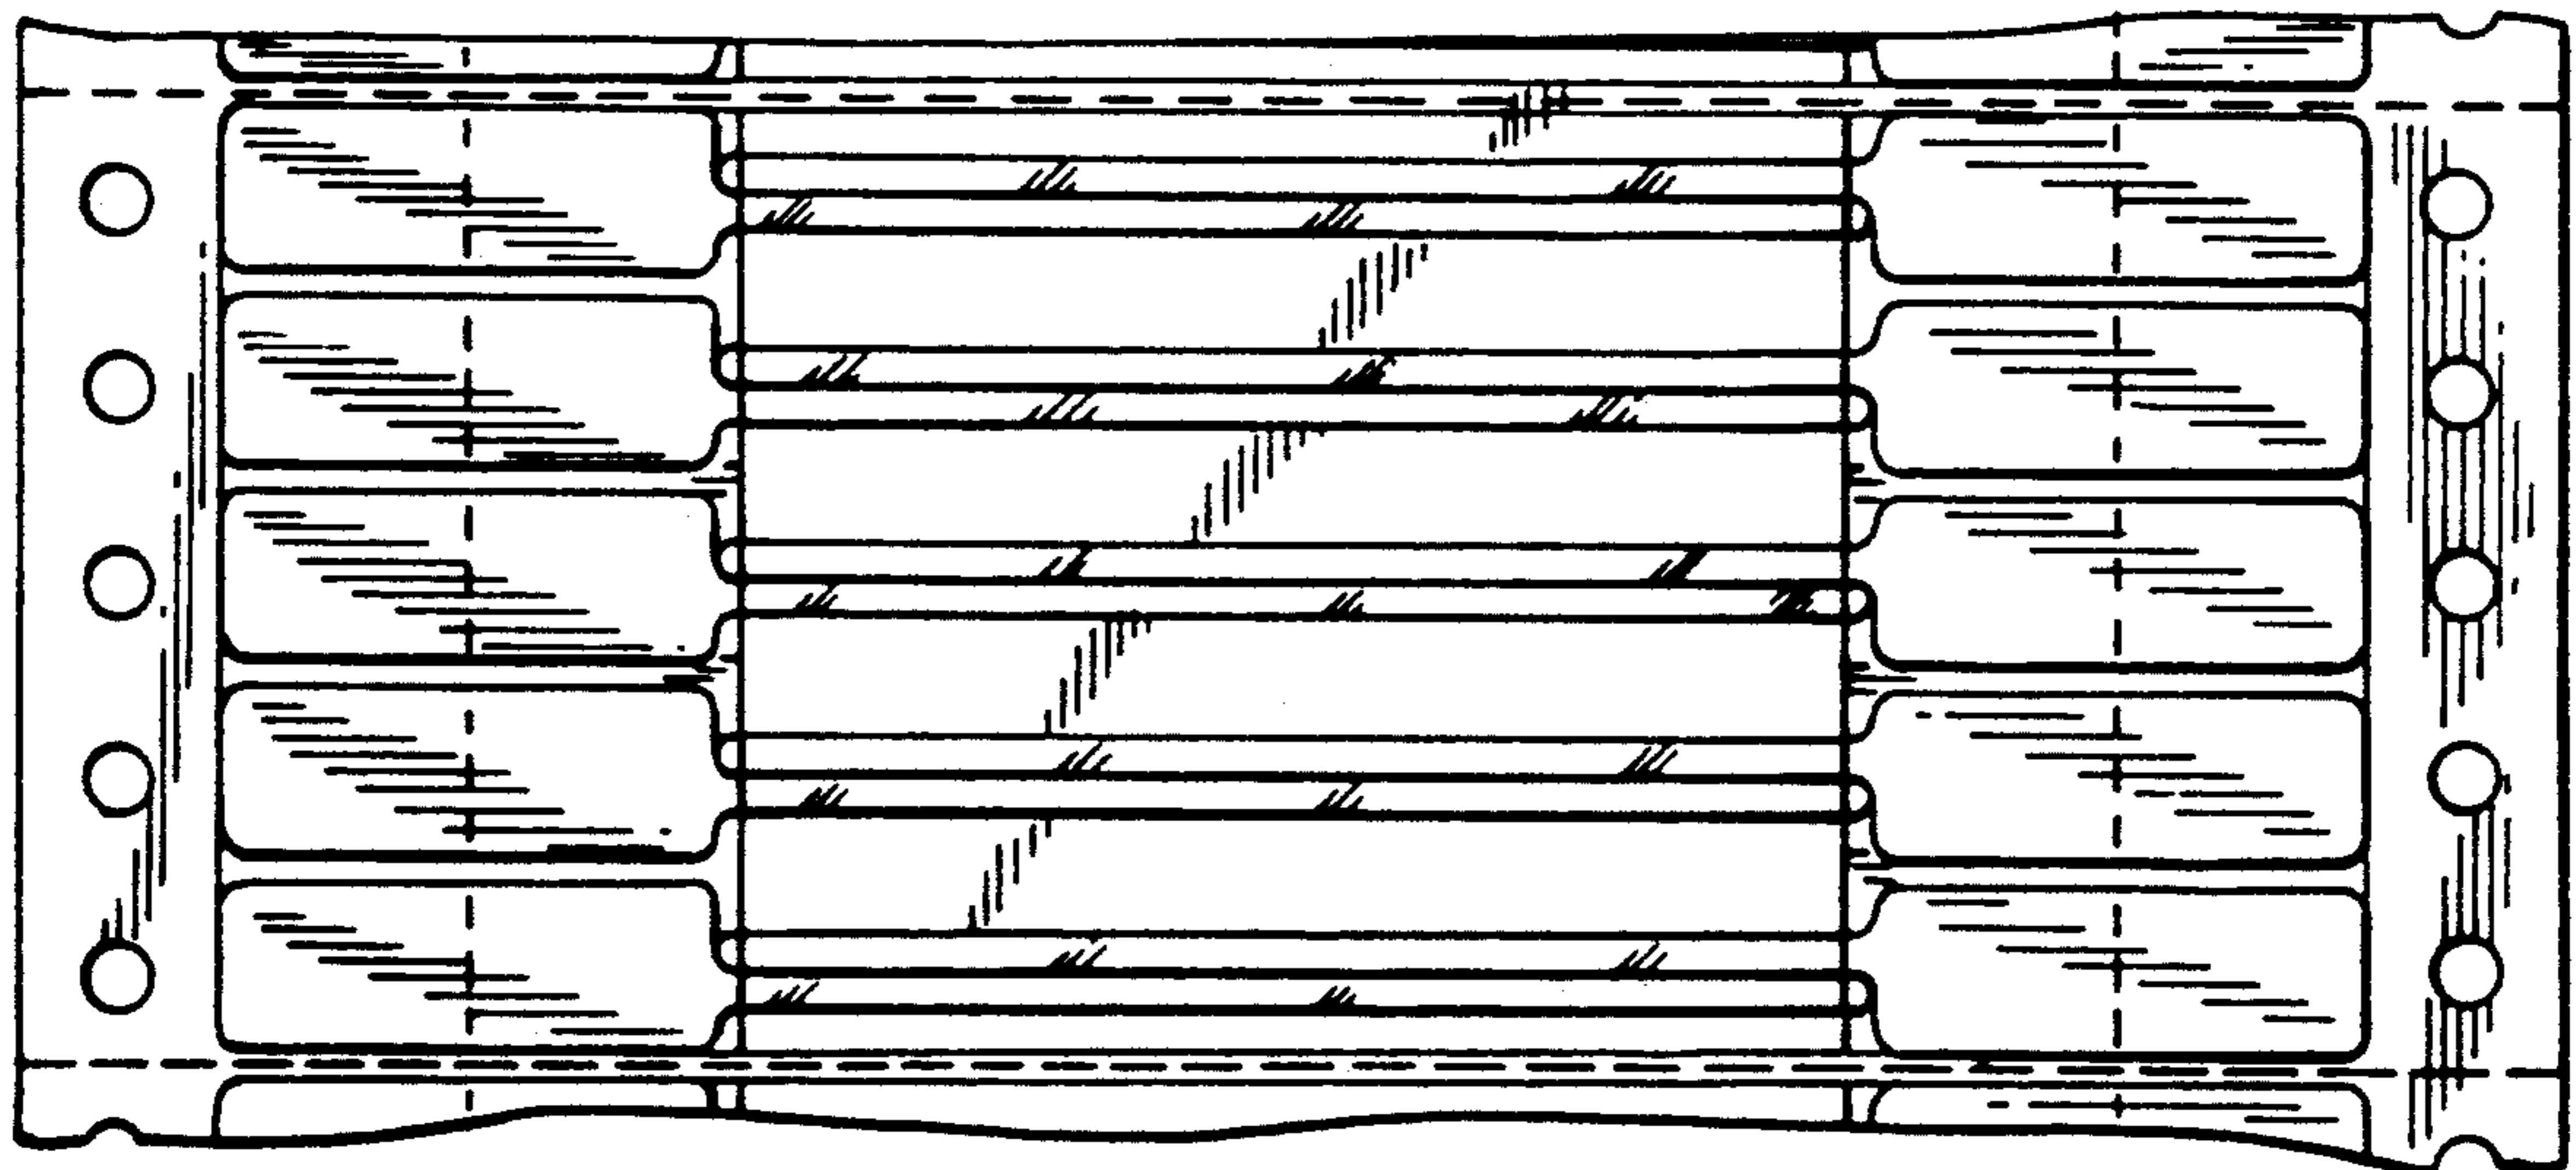

FIG. 1

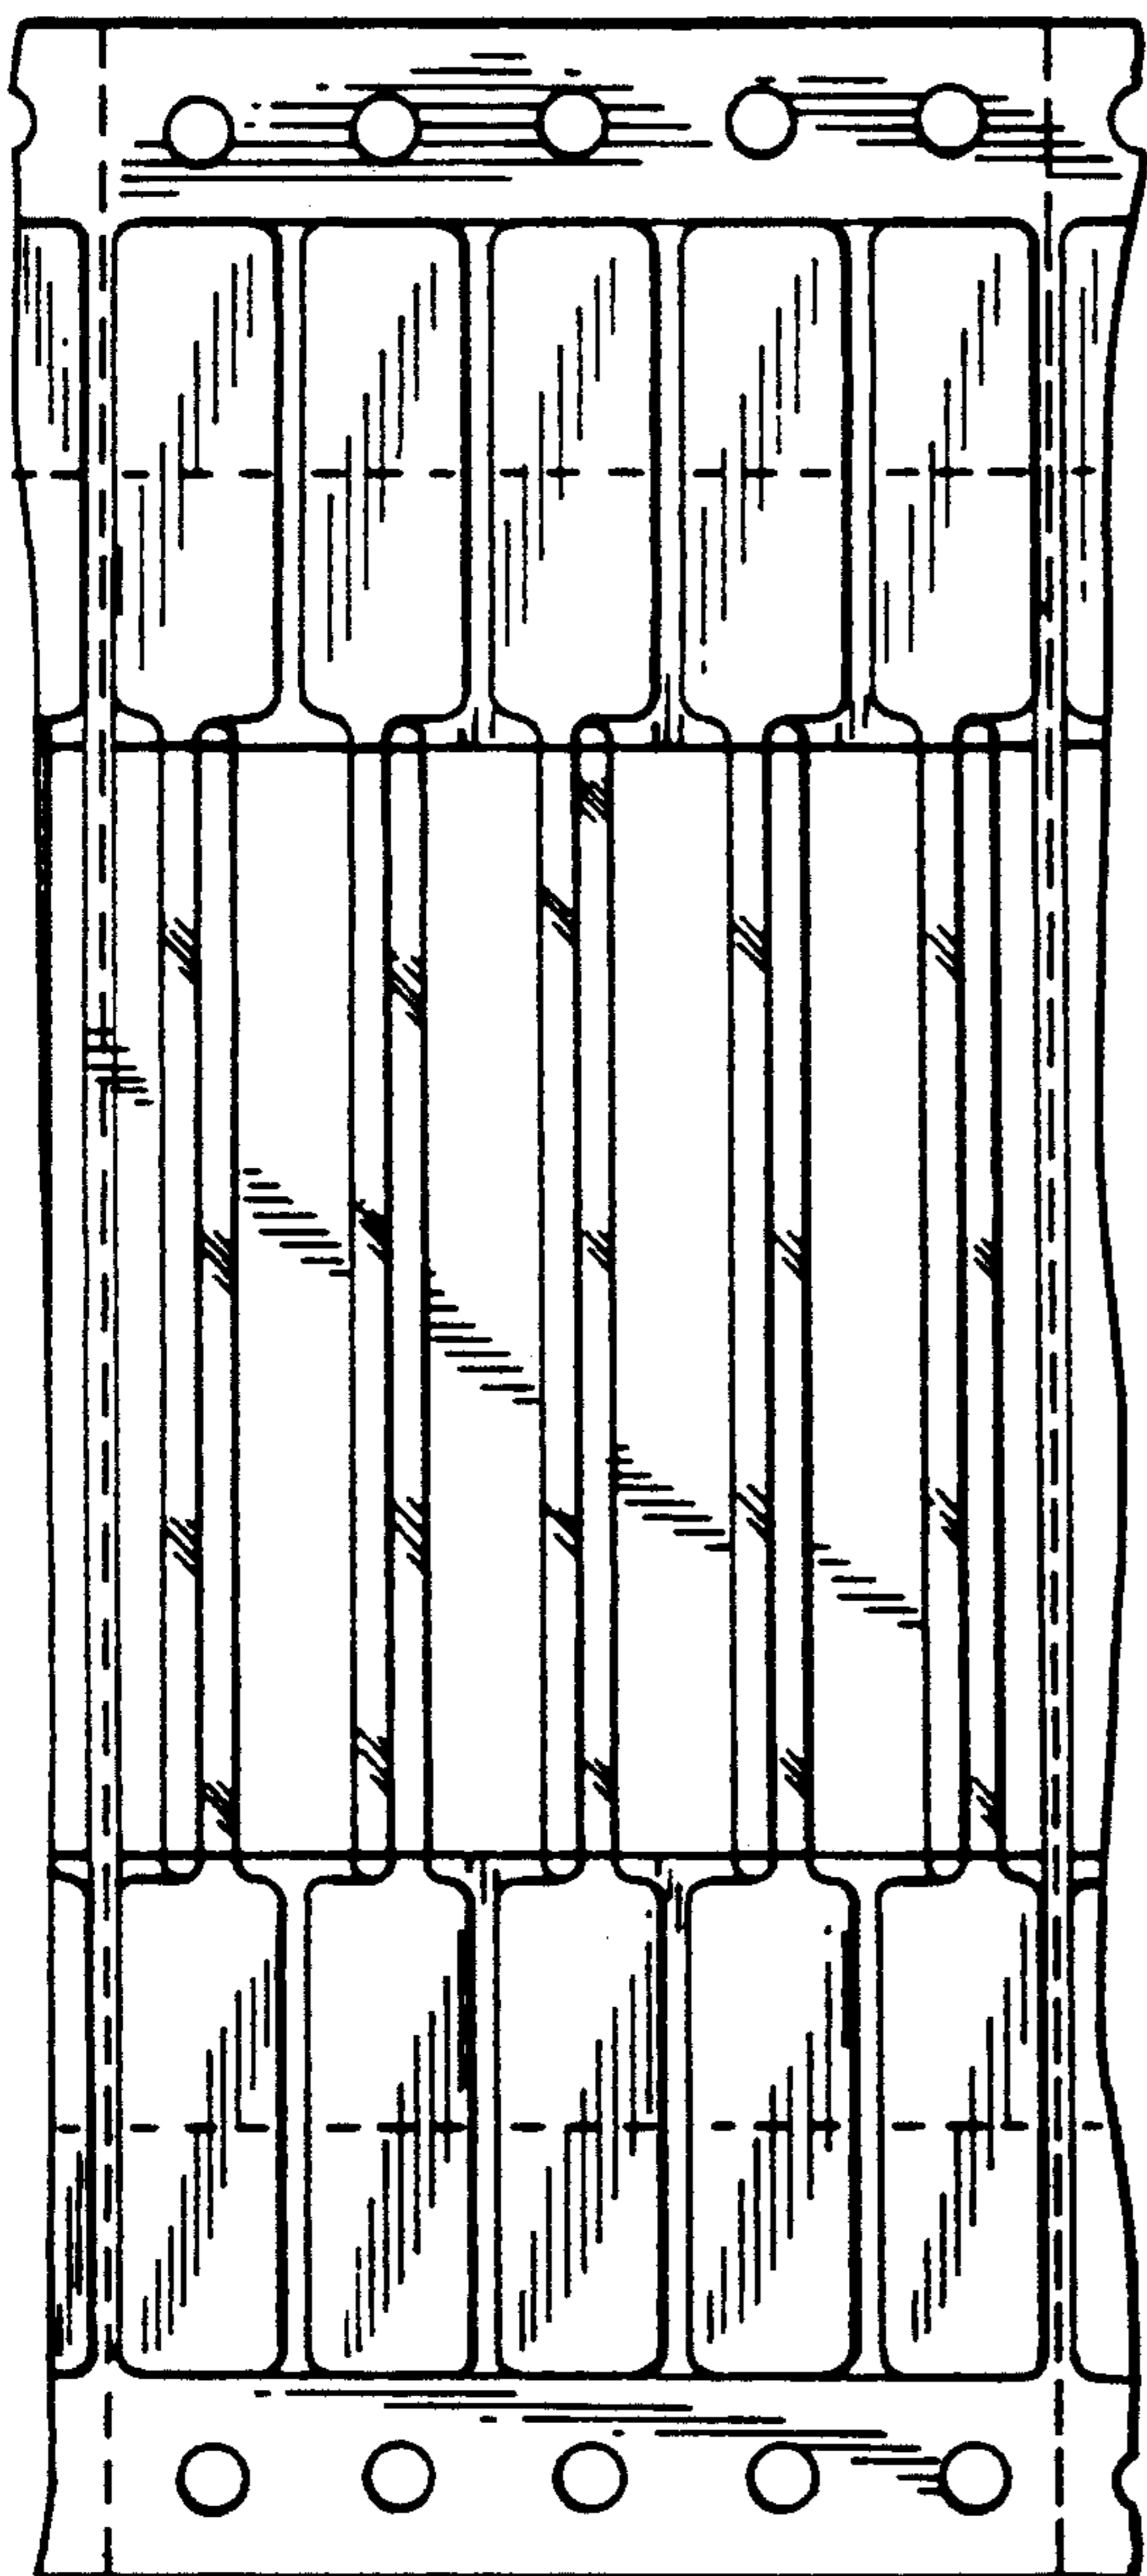

FIG. 2
