[57] CLAIM

The ornamental design for a combined electronic component rack and enclosure, as shown and described.

DESCRIPTION

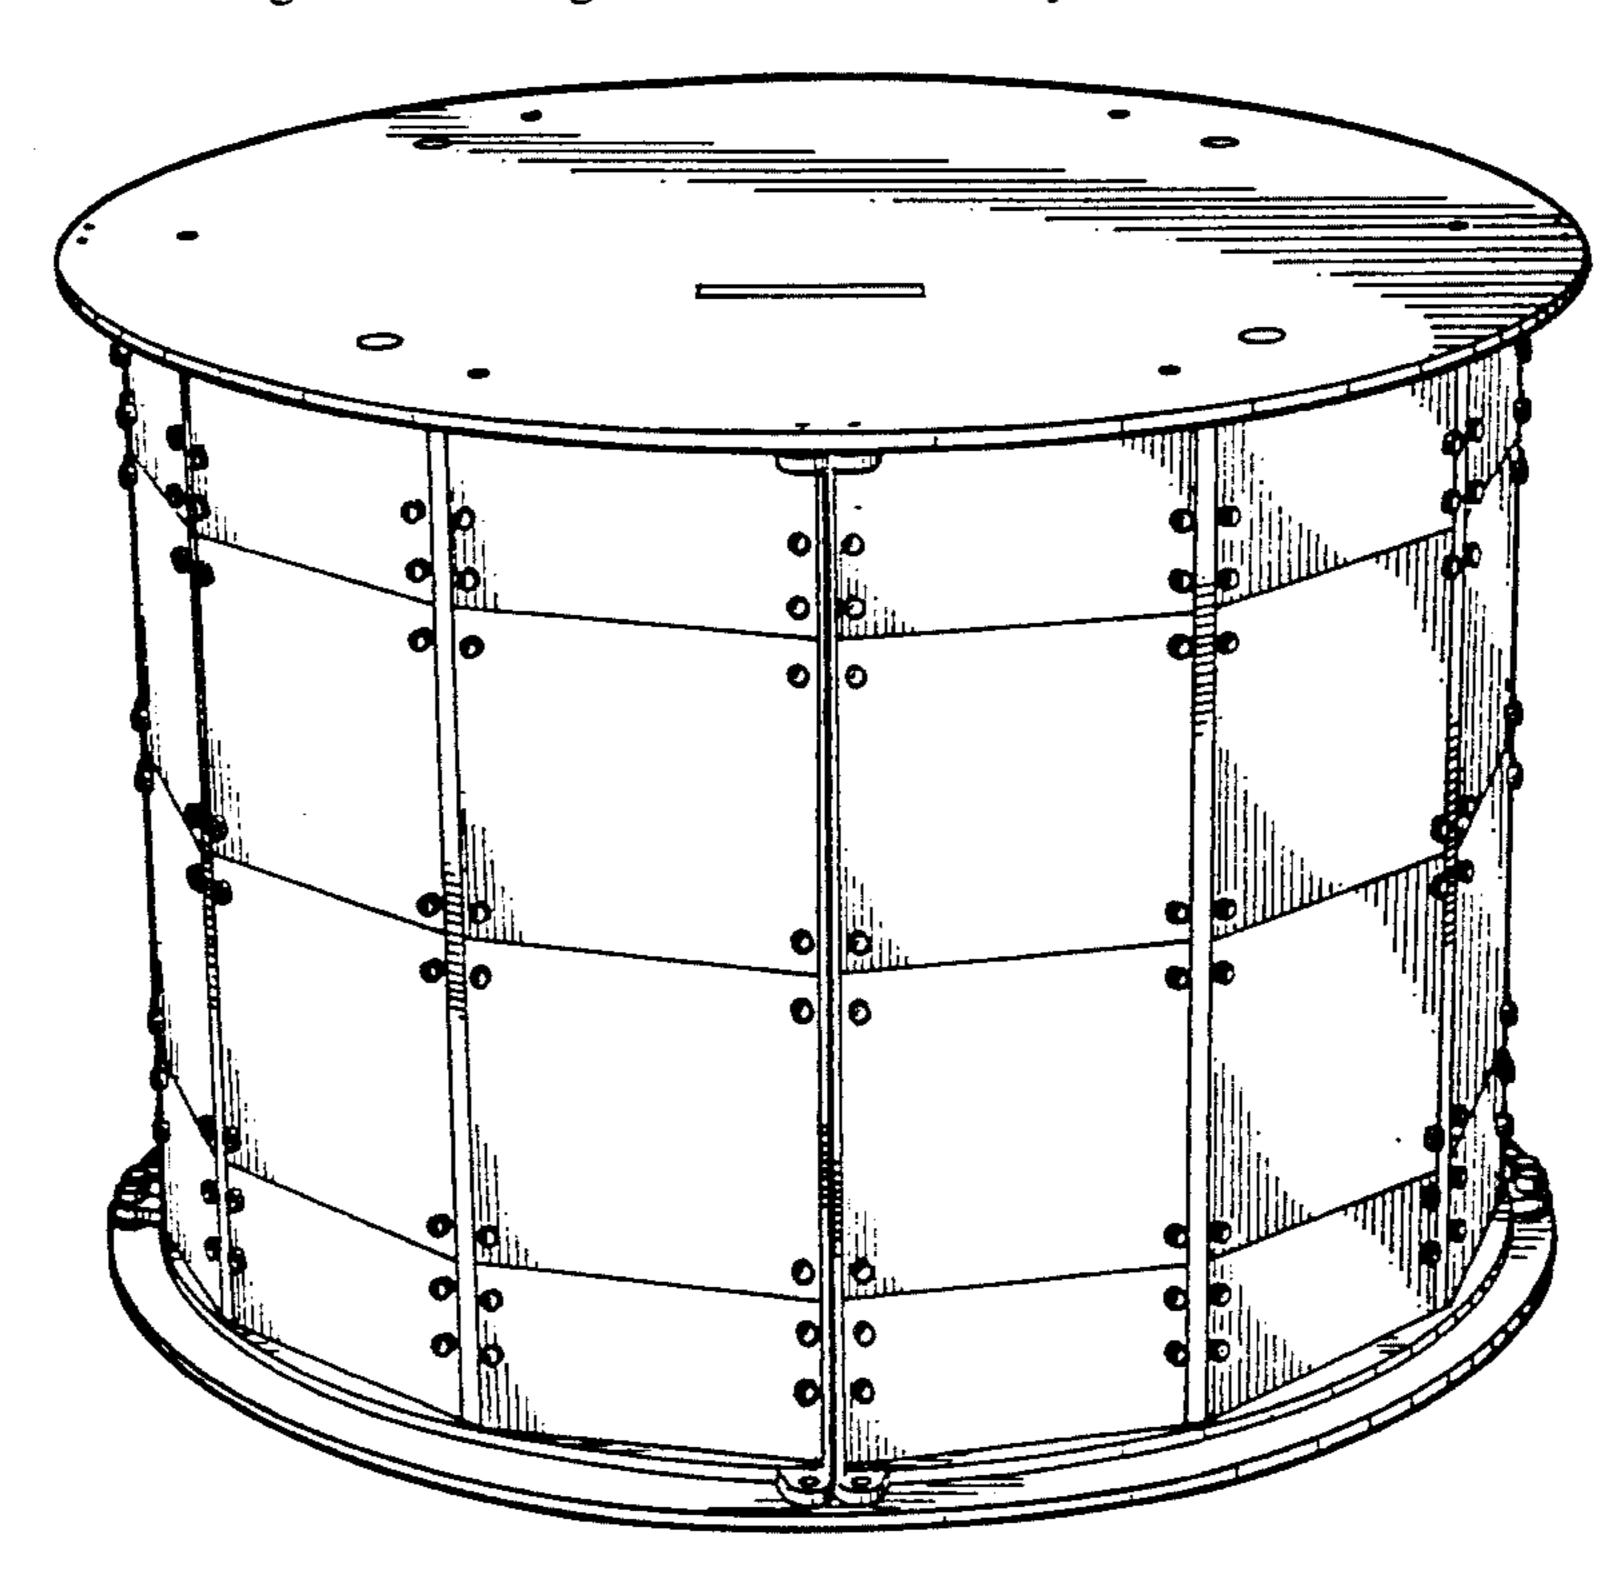

FIG. 1 is a top front perspective view of a combined electronic component rack and enclosure showing my new design;

FIG. 2 is a front and upper right perspective view thereof with the doors open. The broken line showing of side panels and a rear panel are included for the purpose of illustrating environmental elements only and neither forms a part of the claimed design;

FIG. 3 is a front and lower left perspective view thereof with the doors open. The broken line showing of one side panel and a rear panel is included for the purpose of illustrating environmental elements only and form no part of the claimed design;

FIG. 4 is a top, front perspective view thereof shown in use. The broken line showing of the mobile robot base is included for the purpose of illustrating environmental elements only and forms no part of the claimed design; FIG. 5 is a cross-sectional view thereof taken along the horizontal plane of line 5—5 in FIG. 4. The broken line showing of a side panel component enclosure is included for the purpose of illustrating environmental elements only and forms no part of the claimed design; and,

FIG. 6 is a rear and lower left perspective view thereof with the doors open. The broken line showing of side panels, a rear panel and a side panel component enclosure each of which are included for the purpose of illustrating environmental elements only and neither forms a part of the claimed design.
