### [57] CLAIM

The ornamental design for a motorcycle rider's wind and rain breaker, as shown and described.

### DESCRIPTION

FIG. 1 is a front elevational view of a motorcycle rider's wind and rain breaker showing my new design, it being understood that the broken lines are for illustrative purposes only, indicative of a person wearing said design, and form no part of the claimed design;

FIG. 2 is a rear elevational view thereof wherein the open design at the rear showing is readily apparent; and, FIG. 3 is a left side elevational view thereof, it being understood that, because of symmetry, the right side elevational view is a substantial mirror image.

The broken lines shown around the neck opening in FIG. 2, and the rear waist area in FIGS. 2 and 3 are understood to represent conventional stitching.
