[57] **CLAIM**

The ornamental design for a forearm outrigger ski, as shown and described.

**DESCRIPTION**

FIG. 1 is a front perspective view of a forearm outrigger ski, showing my new design;  
FIG. 2 is an elevational view of one side thereof;  
FIG. 3 is a front elevational view thereof;  
FIG. 4 is an elevational view of the other side thereof;  
FIG. 5 is a rear elevational view thereof;  
FIG. 6 is a top plan view thereof;  
FIG. 7 is a bottom plan view thereof; and,  
FIG. 8 is a side elevational view thereof, as in FIG. 2, but with the ski rotated, under spring urgency, approximately 90° in a counter-clockwise direction, as the clutch dog is first disengaged from a location between a first pair of teeth by upward force exerted by the user on the clutch handle and then re-engaged, under spring urgency, by a second pair of teeth on the semi-circular clutch plate as the user releases the clutch handle.
