[57] **CLAIM**

The ornamental design for a rolling cart with storage containments, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of the rolling cart with storage containments of our design showing the left side incorporating a slotted tissue dispenser, and the front,

wherein the slatted roll-up tambour door is shown in the closed position;

FIG. 2 is a perspective view of the design with the slatted roll-up tambour door in the open position, exposing partially-extended storage trays;

FIG. 3 is a perspective view of the design showing the left side and rear of the cart, with the storage trays partially extending from the front of the cart;

FIG. 4 is a top view of the design showing the slotted tissue dispenser in a left-side mounting and a roll supplies container with cutting edge in a right-side mounting;

FIG. 5 is a front view of the design with the slotted tissue dispenser in a left-side mounting and the roll supplies container in a right-side mounting;

FIG. 6 is a left-side view of the design showing the slotted tissue dispenser;

FIG. 7 is a right-side view of the design showing the roll supplies container with tearing edge;

FIG. 8 is a rear view of the design;

FIG. 9 is a left side perspective view of a second embodiment of the rolling cart with storage containments, the sole difference from the first embodiment being in the roll supplier container with cutting edge mounted therein instead of the slotted tissue dispenser of the first embodiment;

FIG. 10 is a left side perspective view of a third embodiment of the rolling cart with storage containments, the sole difference from the first embodiment being in the slotted tissue dispenser accessory removed; and,

FIG. 11 is a rear perspective view of a third embodiment of the rolling cart with storage containments, the sole difference from the first embodiment being in the hair-styling apparatus container, power strip, and trash receptacle attached to the slatted rear panel.
