[57] **CLAIM**

The ornamental design for a secure key holder for selectively locking keys thereon, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a secure key holder for selectively locking keys thereon showing my new design wherein the broken line showing of a key is for

illustrative purposes only and forms no part of the claimed design;

FIG. 2 is a front elevational view thereof;

FIG. 3 is a rear elevational view thereof, wherein the broken line showing of a key insert and inner most circles is for illustrative purposes only and forms no part of the claimed design;

FIG. 4 is a side elevational view thereof;

FIG. 5 is a top plan view thereof;

FIG. 6 is an exploded perspective view thereof in an unlatched condition, wherein the broken line showing of a key is for illustrative purposes only and forms no part of the claimed design;

FIG. 7 is a side elevational view of a secure key holder for selectively locking keys thereon showing a second embodiment of my new design, wherein the front and rear views thereof are substantially similar to the front and rear views of the first embodiment;

FIG. 8 is a top plan view thereof;

FIG. 9 is a perspective view of a secure key holder for selectively locking keys thereon showing a third embodiment of my new design wherein the broken line showing of a key is for illustrative purposes only and forms no part of the claimed design;

FIG. 10 is a front elevational view thereof;

FIG. 11 is a rear elevational view thereof, wherein the broken line showing of a key insert and inner most circles is for illustrative purposes only and forms no part of the claimed design;

FIG. 12 is a side elevational view thereof;

FIG. 13 is a top plan view thereof;

FIG. 14 is an exploded perspective view thereof in an unlatched condition, wherein the broken line only showing of a key is for illustrative purposes only and forms no part of the claimed design;

FIG. 15 is a side elevational view of a secure key holder for selectively locking keys thereon showing a fourth embodiment of my new design, wherein the front and rear views thereof are substantially similar to the front and rear views of the third embodiment; and,

FIG. 16 is a top plan view thereof.
