[57] **CLAIM**

The ornamental design for a handle for roll material, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of the primary embodiment of the handle for roll material design of the invention; FIG. 2 is an outer end view of the handle for roll material design of the invention; FIG. 3 is an inner end view of the handle for roll material design of the invention; FIG. 4 is a plan view of the handle for roll material design of the invention; FIG. 5 is another plan view of the handle for roll material design of the invention; and, FIG. 6 is a fragmentary perspective of a modified hanger view of the handle for roll material design of the invention.

The handle has a one-hand holding section, an insertion section for insertion into the core of a roll of material such as stretch polyethylene film, the sections being joined by a flange, and an outer end having another flange and a hanger, as shown.

FIG. 1

FIG. 3

FIG. 2

FIG. 4

FIG. 5

FIG. 6
