[57] **CLAIM**

The ornamental design of a lateral surgical patient support cushion, as shown and described.

DESCRIPTION

FIG. 1 is a front elevational view of a lateral surgical patient support cushion embodying the design of the present invention;

FIG. 2 is a right side elevational view thereof, the left side elevational view being identical thereto;

FIG. 3 is a back elevational view thereof;

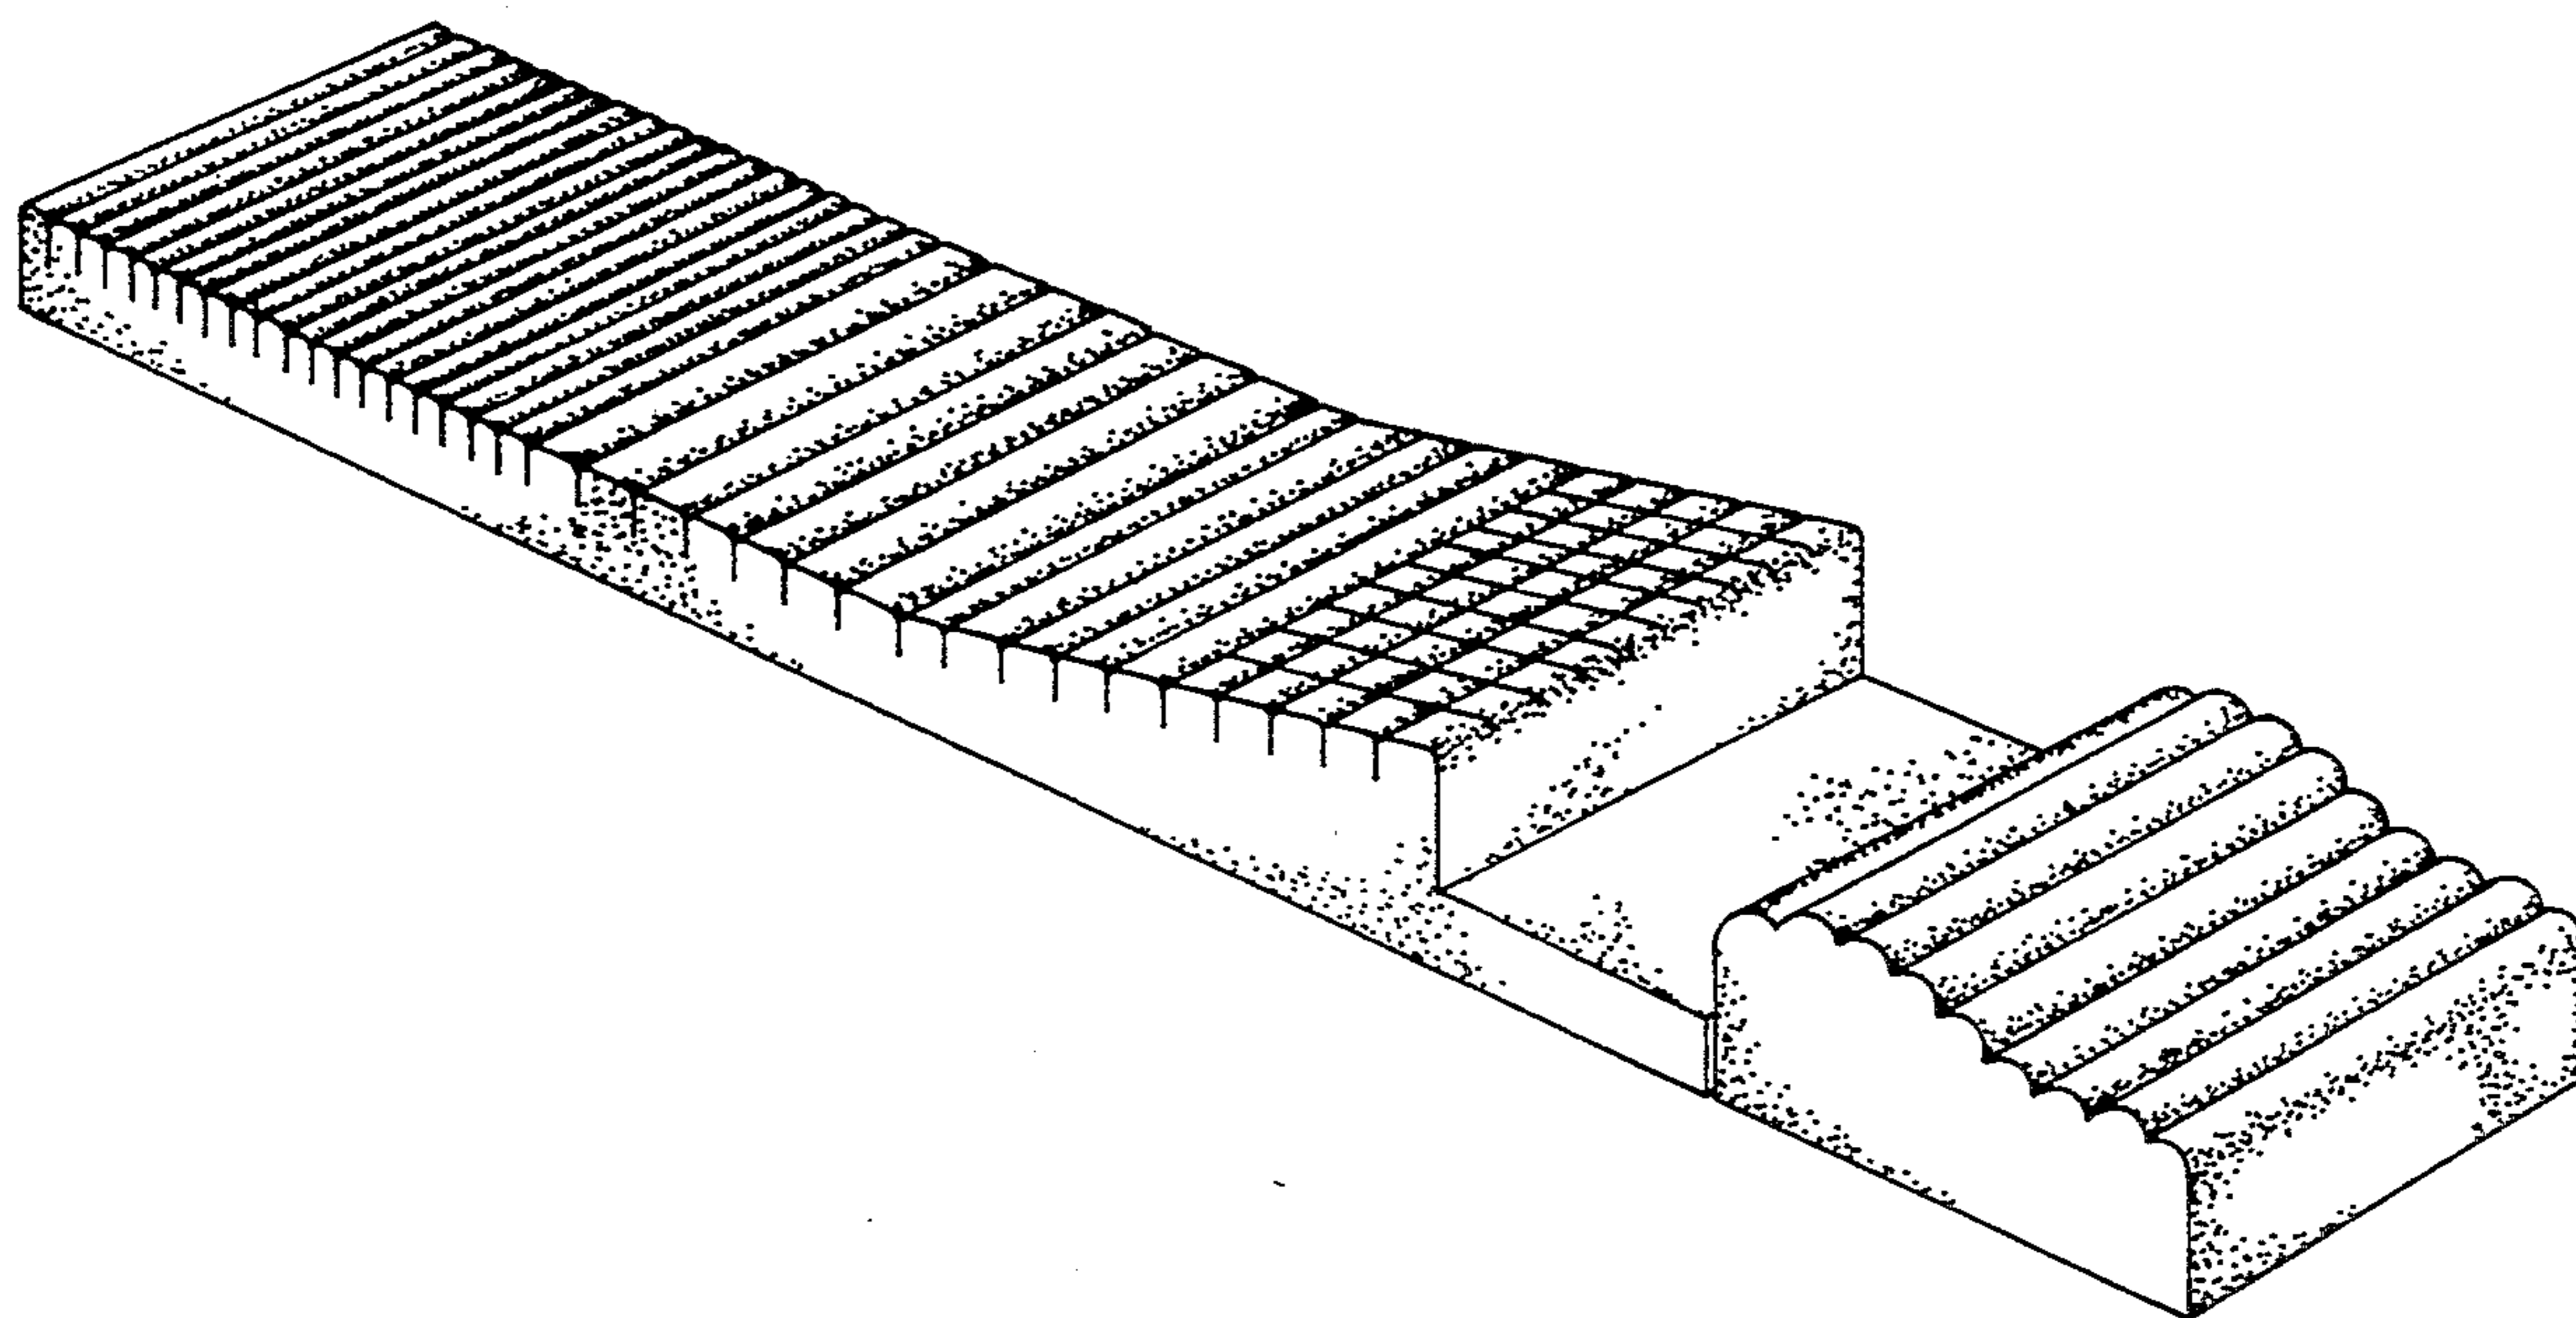

FIG. 4 is a top plan view thereof;

FIG. 5 is a bottom plan view thereof;

FIG. 6 is a perspective view thereof; and,

FIG. 7 is a perspective view of a second embodiment of FIG. 1 the only difference residing in the transverse notch area.

The use of stippling is intended to represent that the design is constructed primarily of foam or a like resilient material and does not form a surface feature of the design.

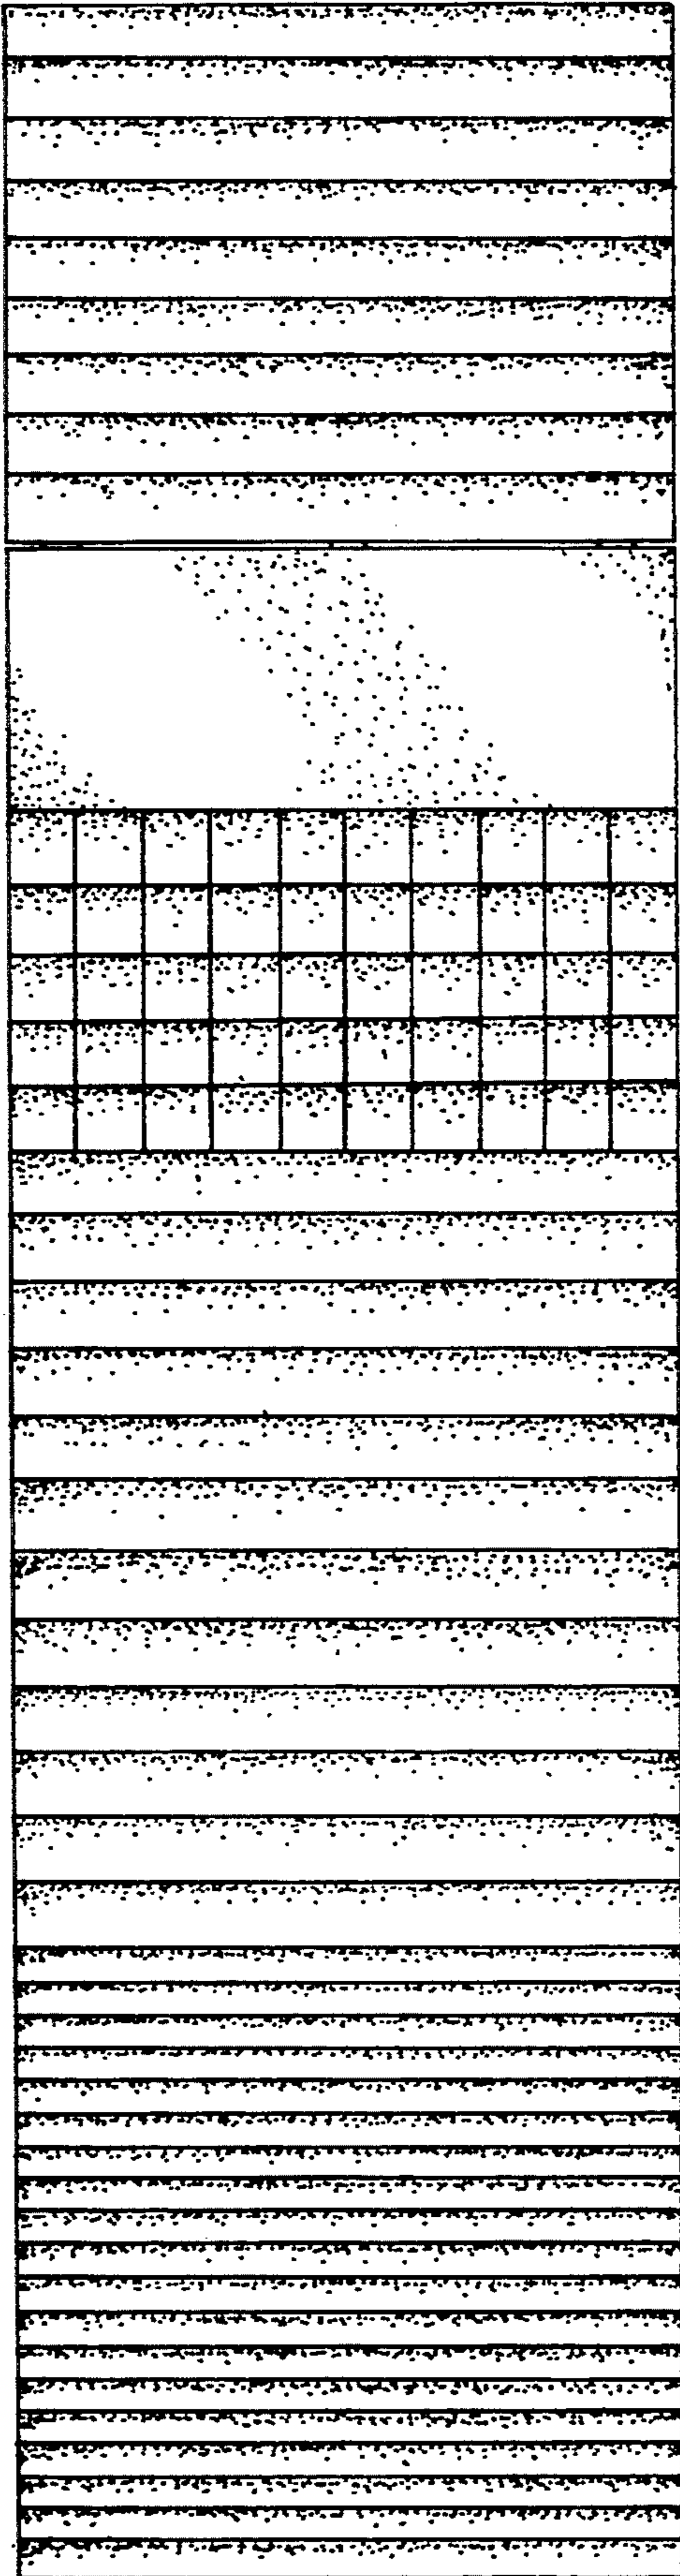

FIG. 1

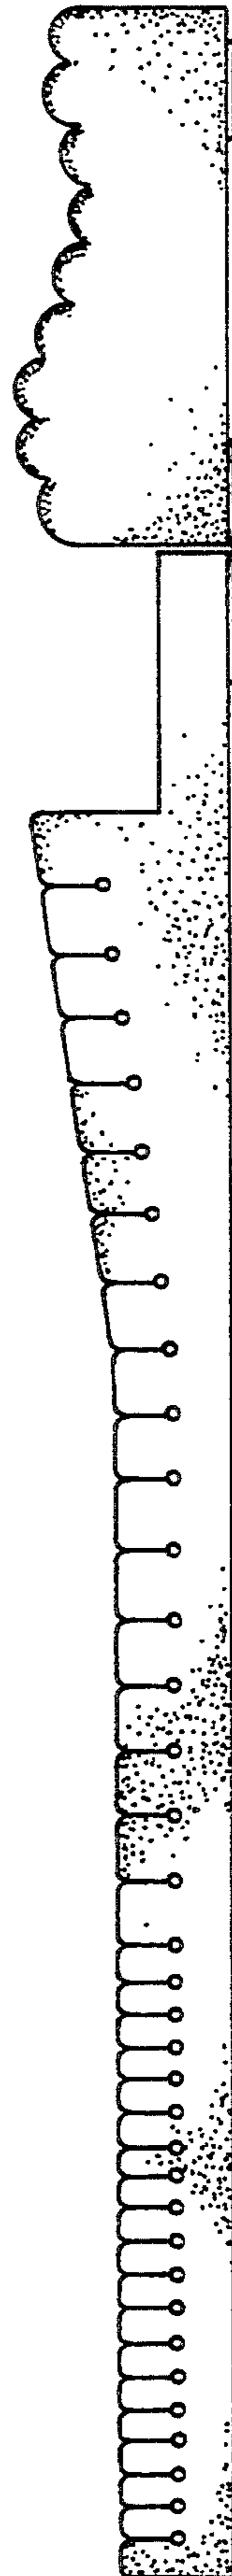

FIG. 2

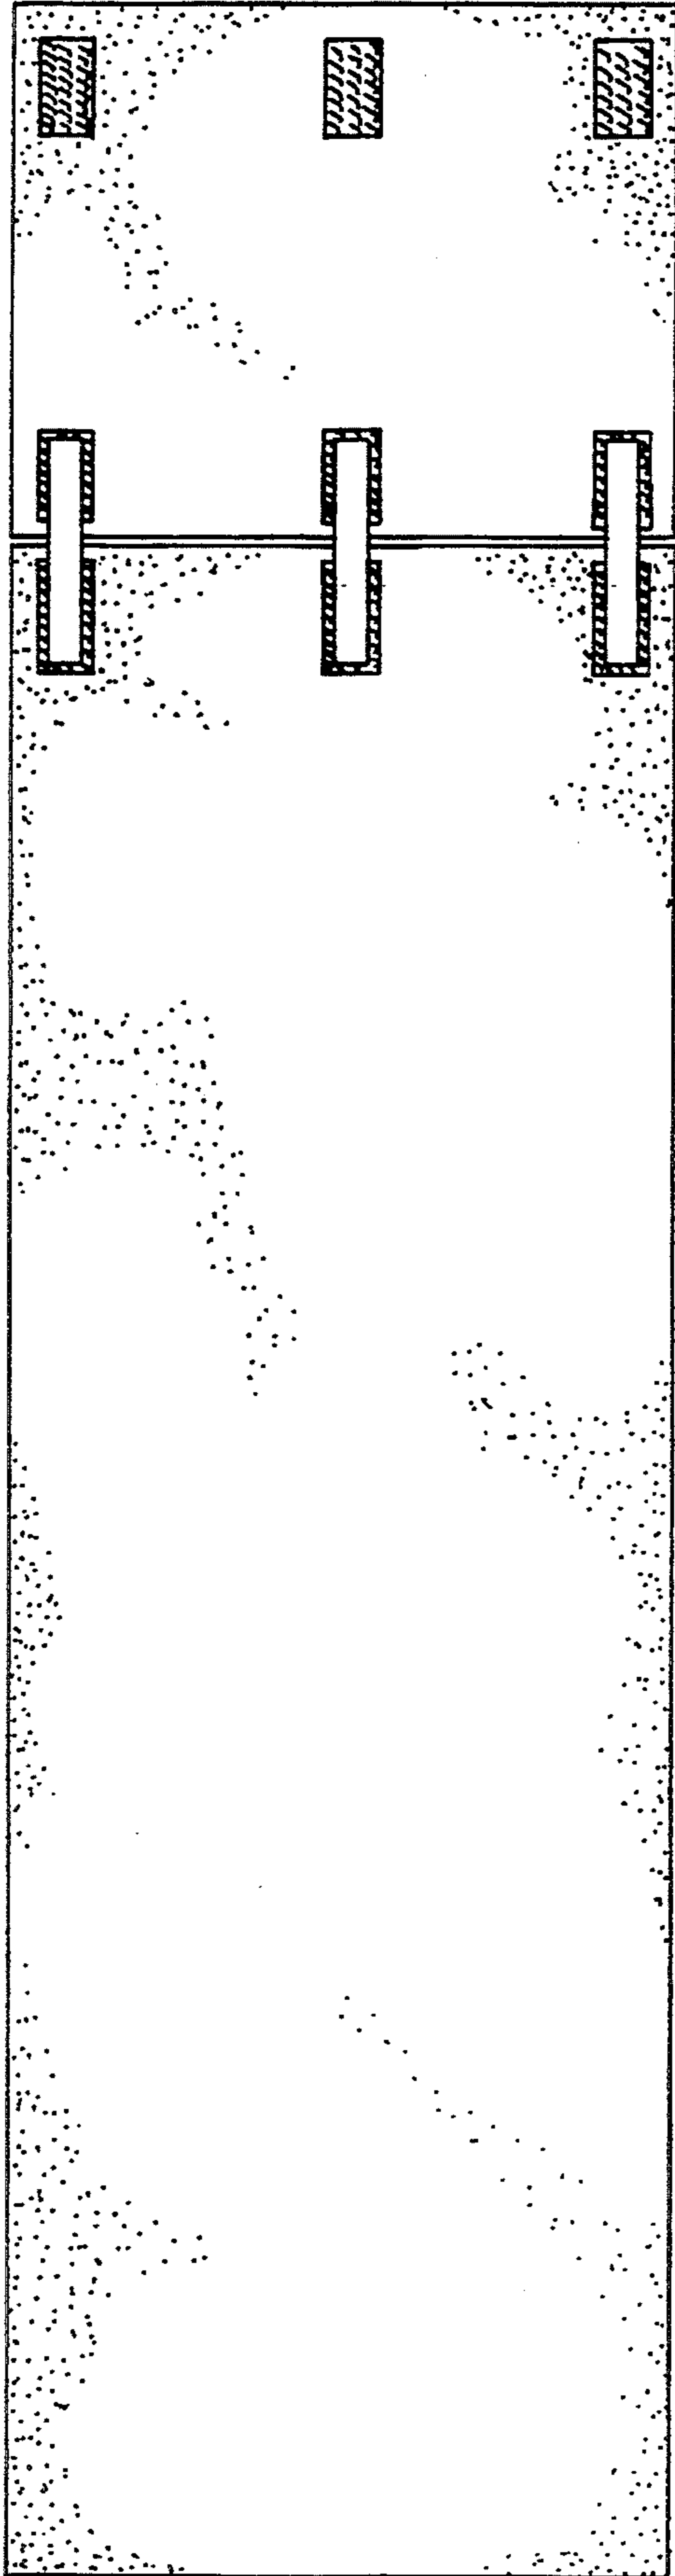

FIG. 3

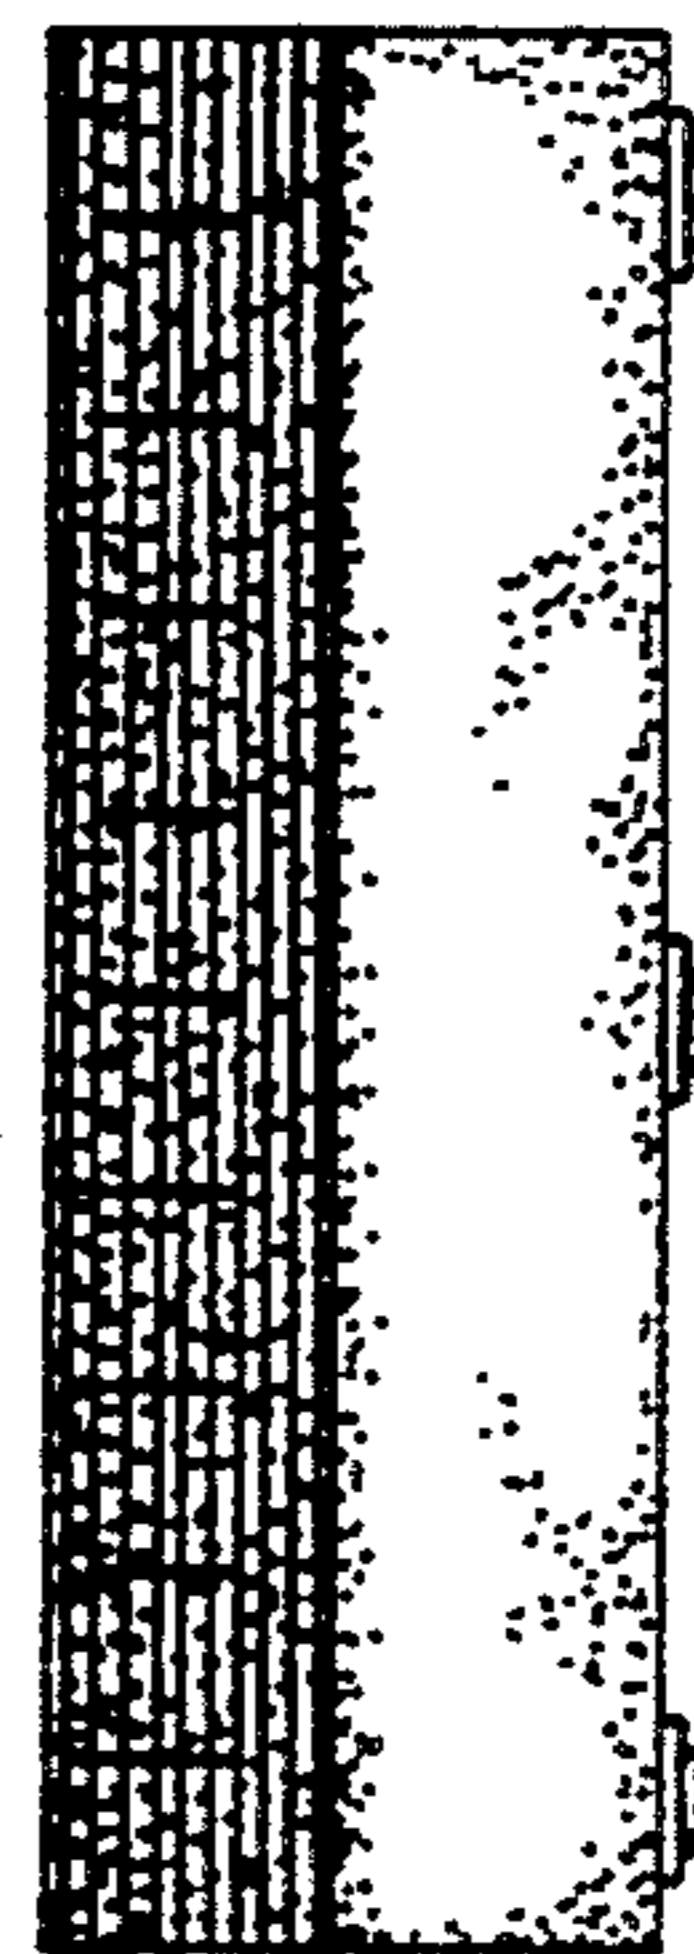

FIG. 5

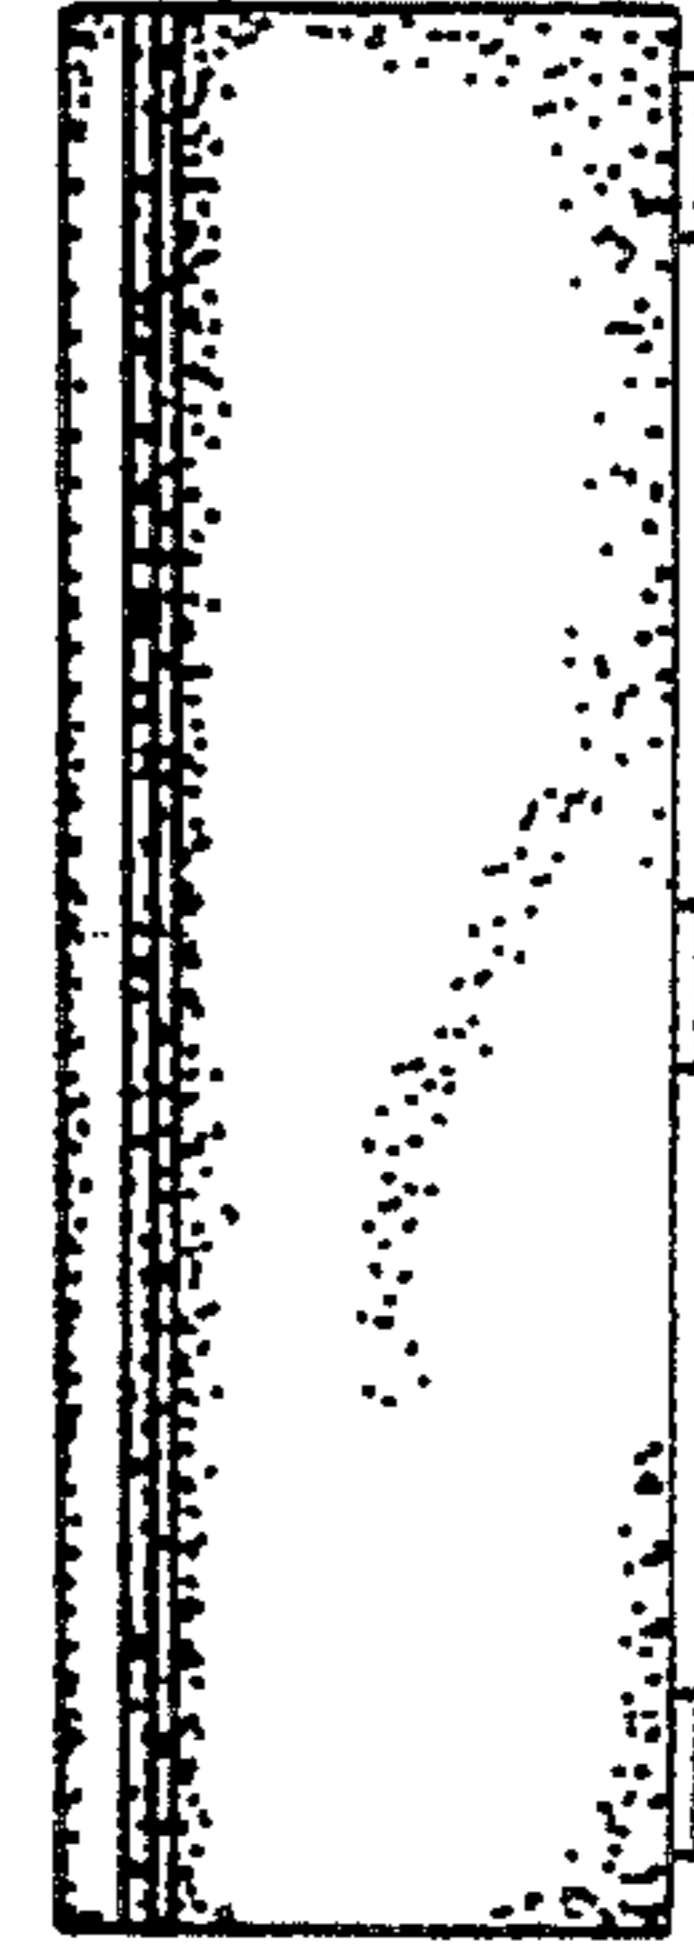

FIG. 4

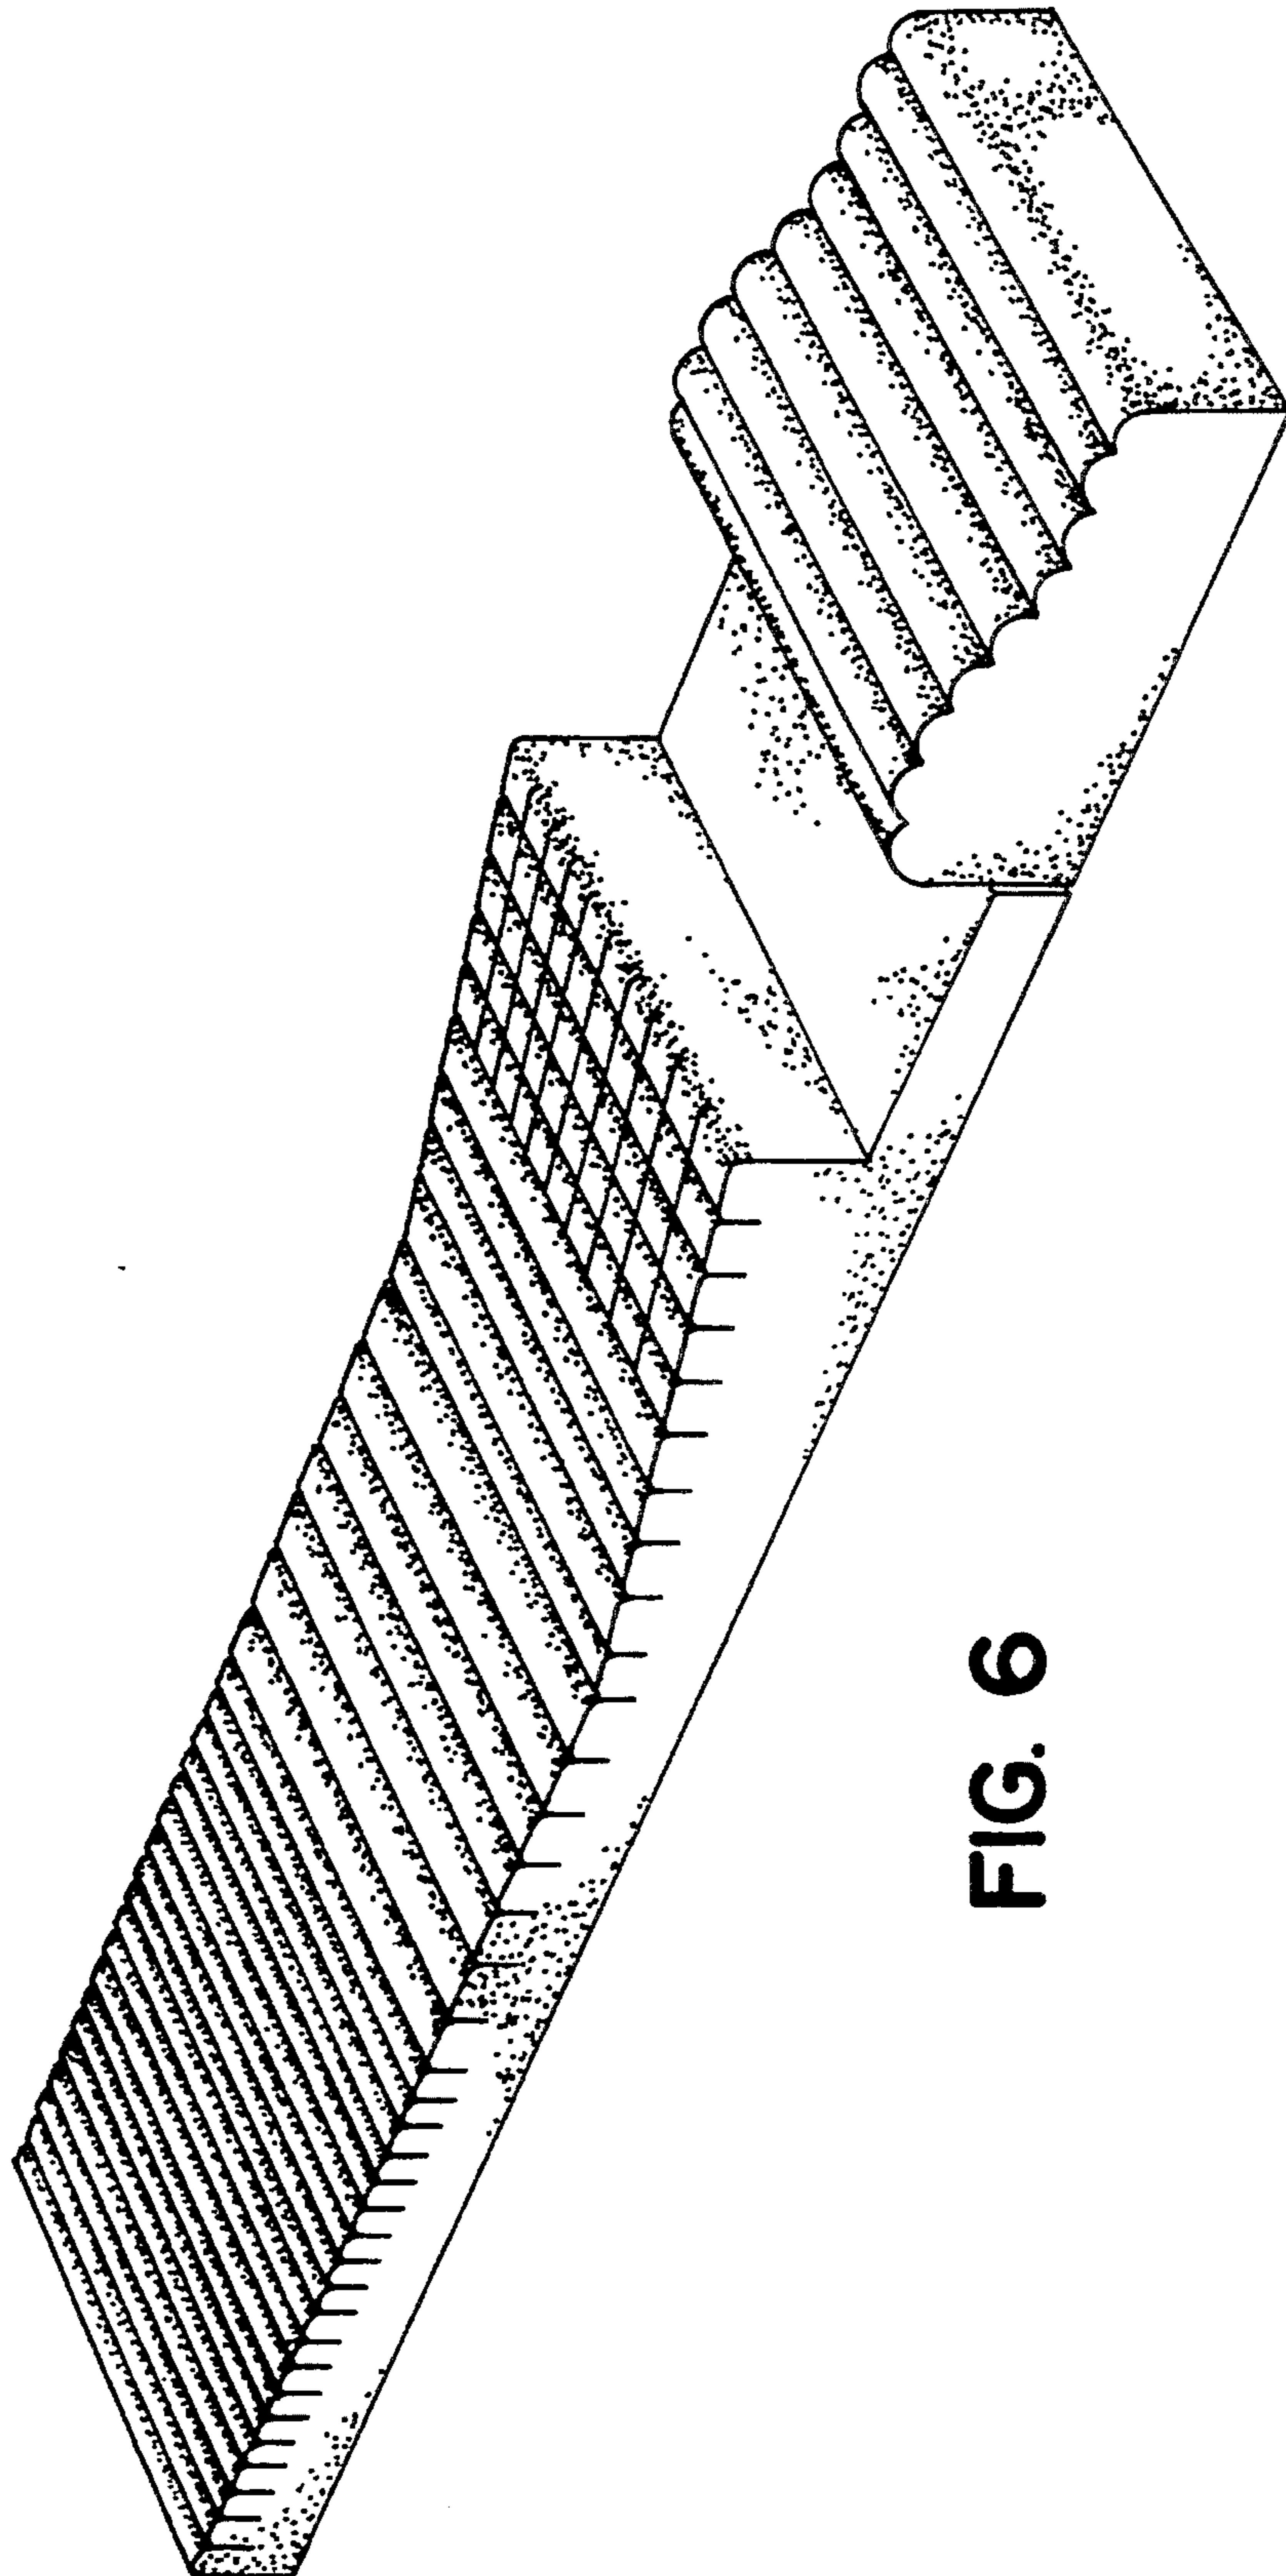

FIG. 6

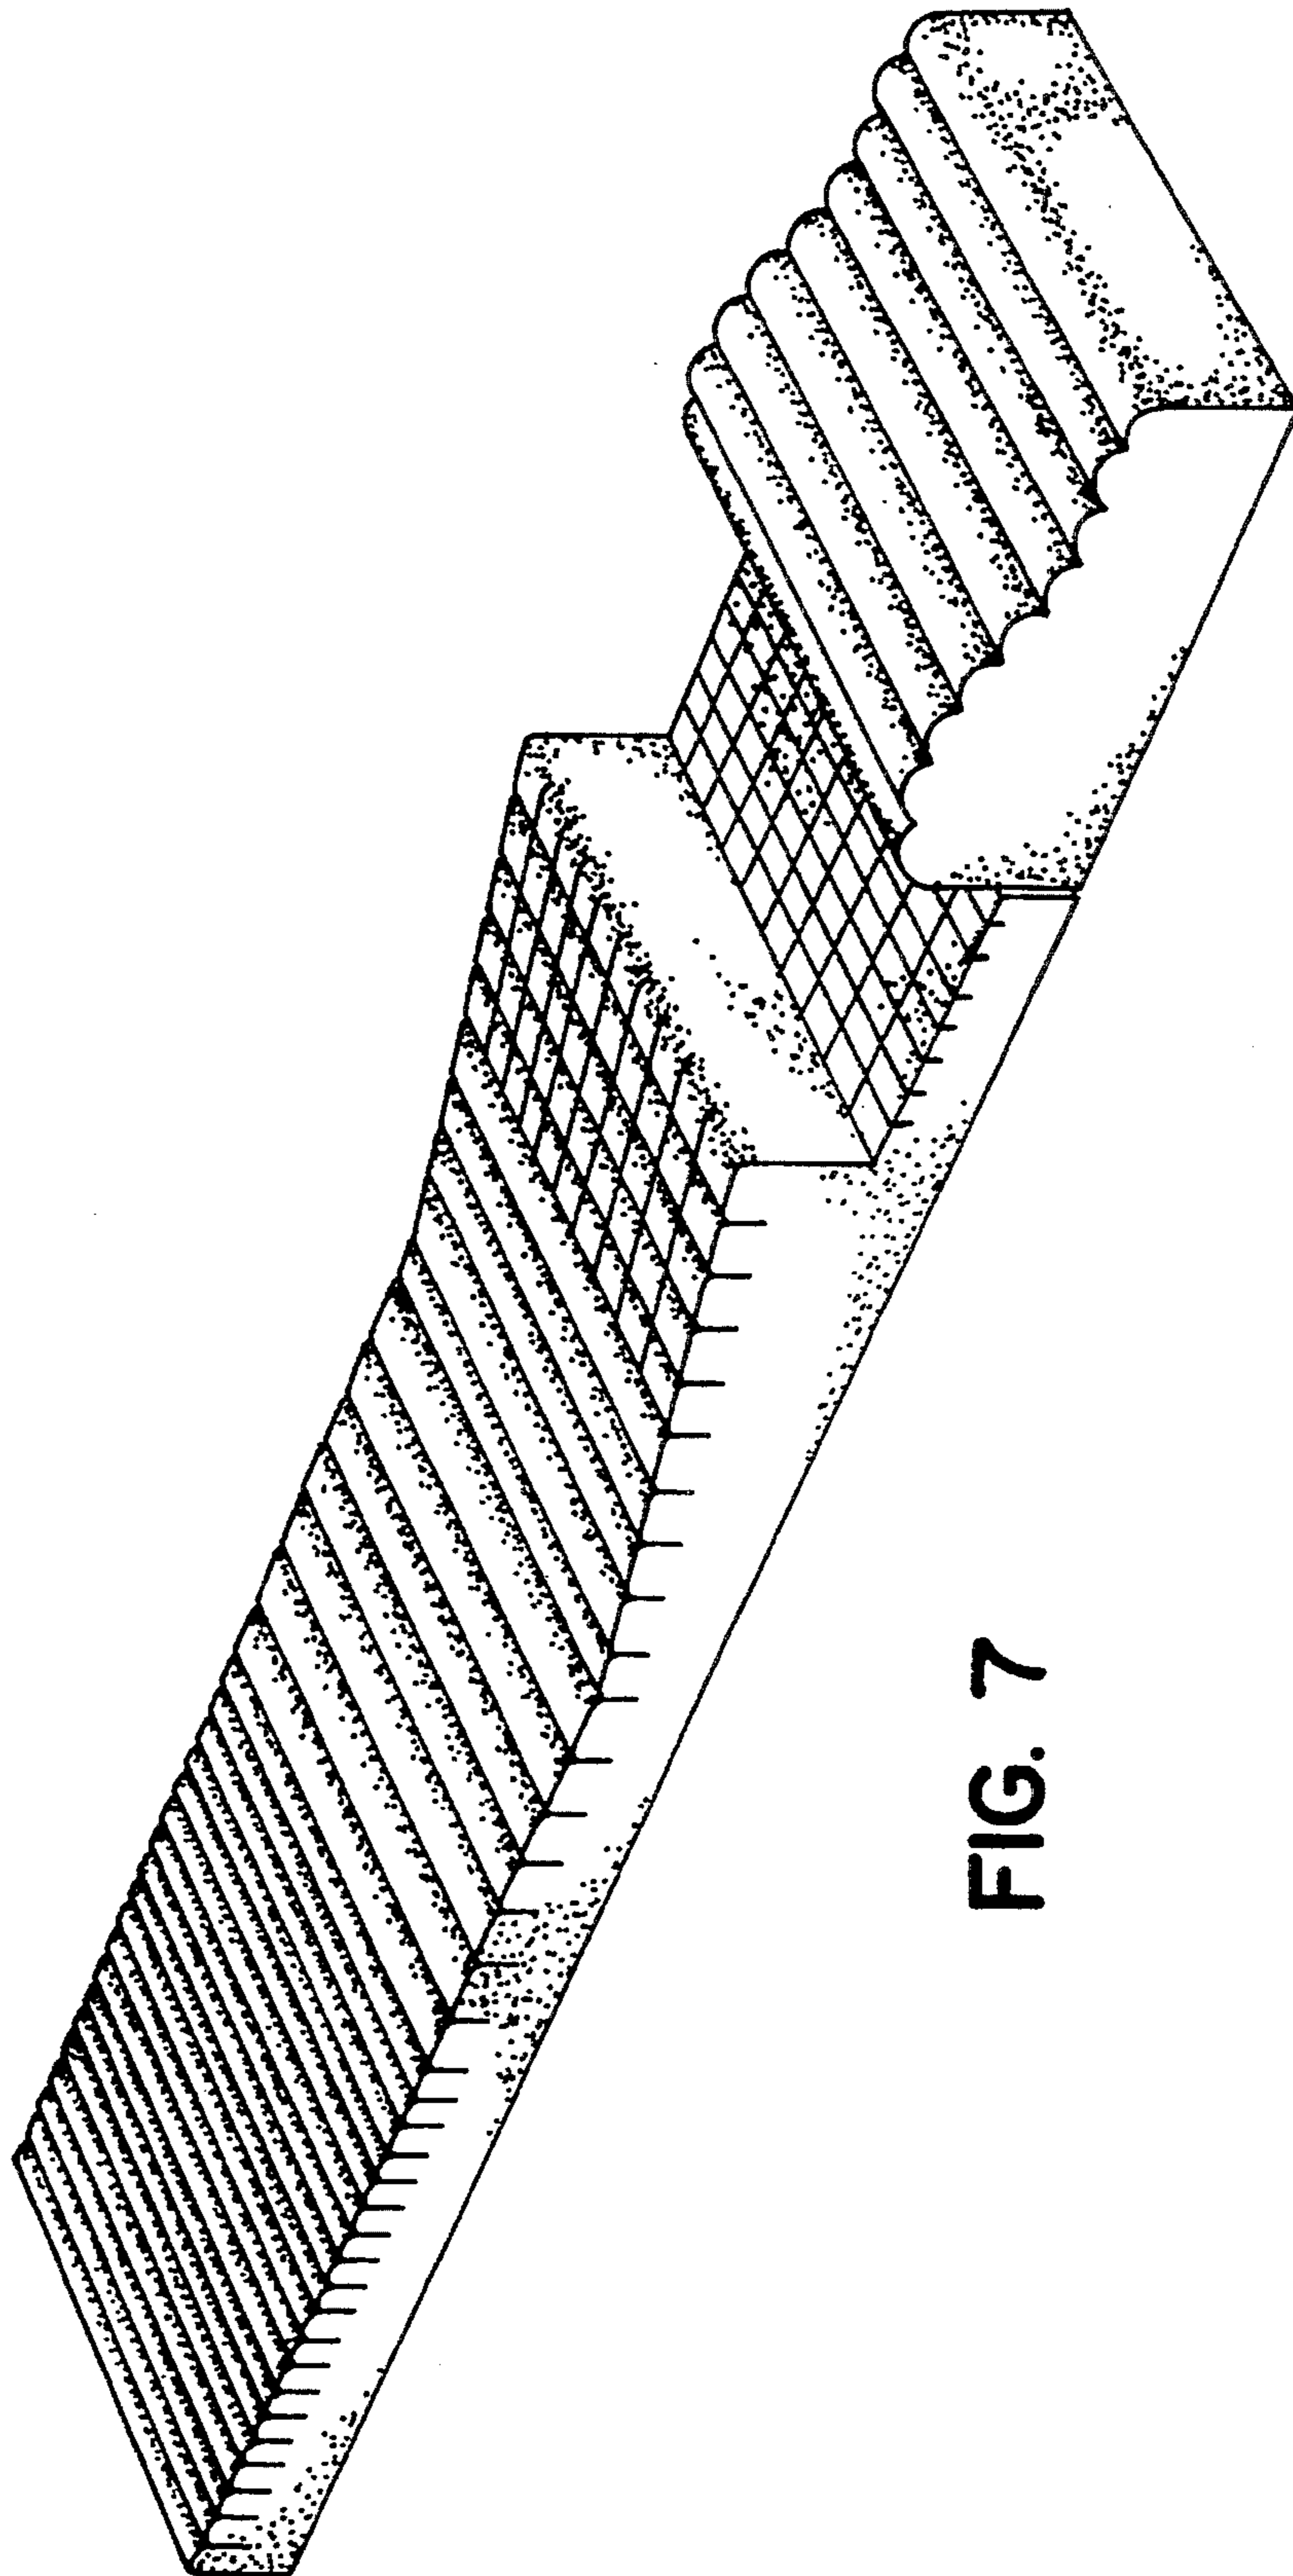

FIG. 7
