[57] CLAIM

The ornamental design for a combined blood coagulation measuring instrument and test strip, as shown and described.

DESCRIPTION

FIG. 1 is a front elevational view of the blood coagulation measuring instrument as seen in FIG. 6, with the test strip removed;

FIG. 2 is a top plan view;

FIG. 3 is a right side elevational view, with the left side elevational view being a mirror image thereof;

FIG. 4 is a rear elevational view;

FIG. 5 is a bottom plan view thereof;

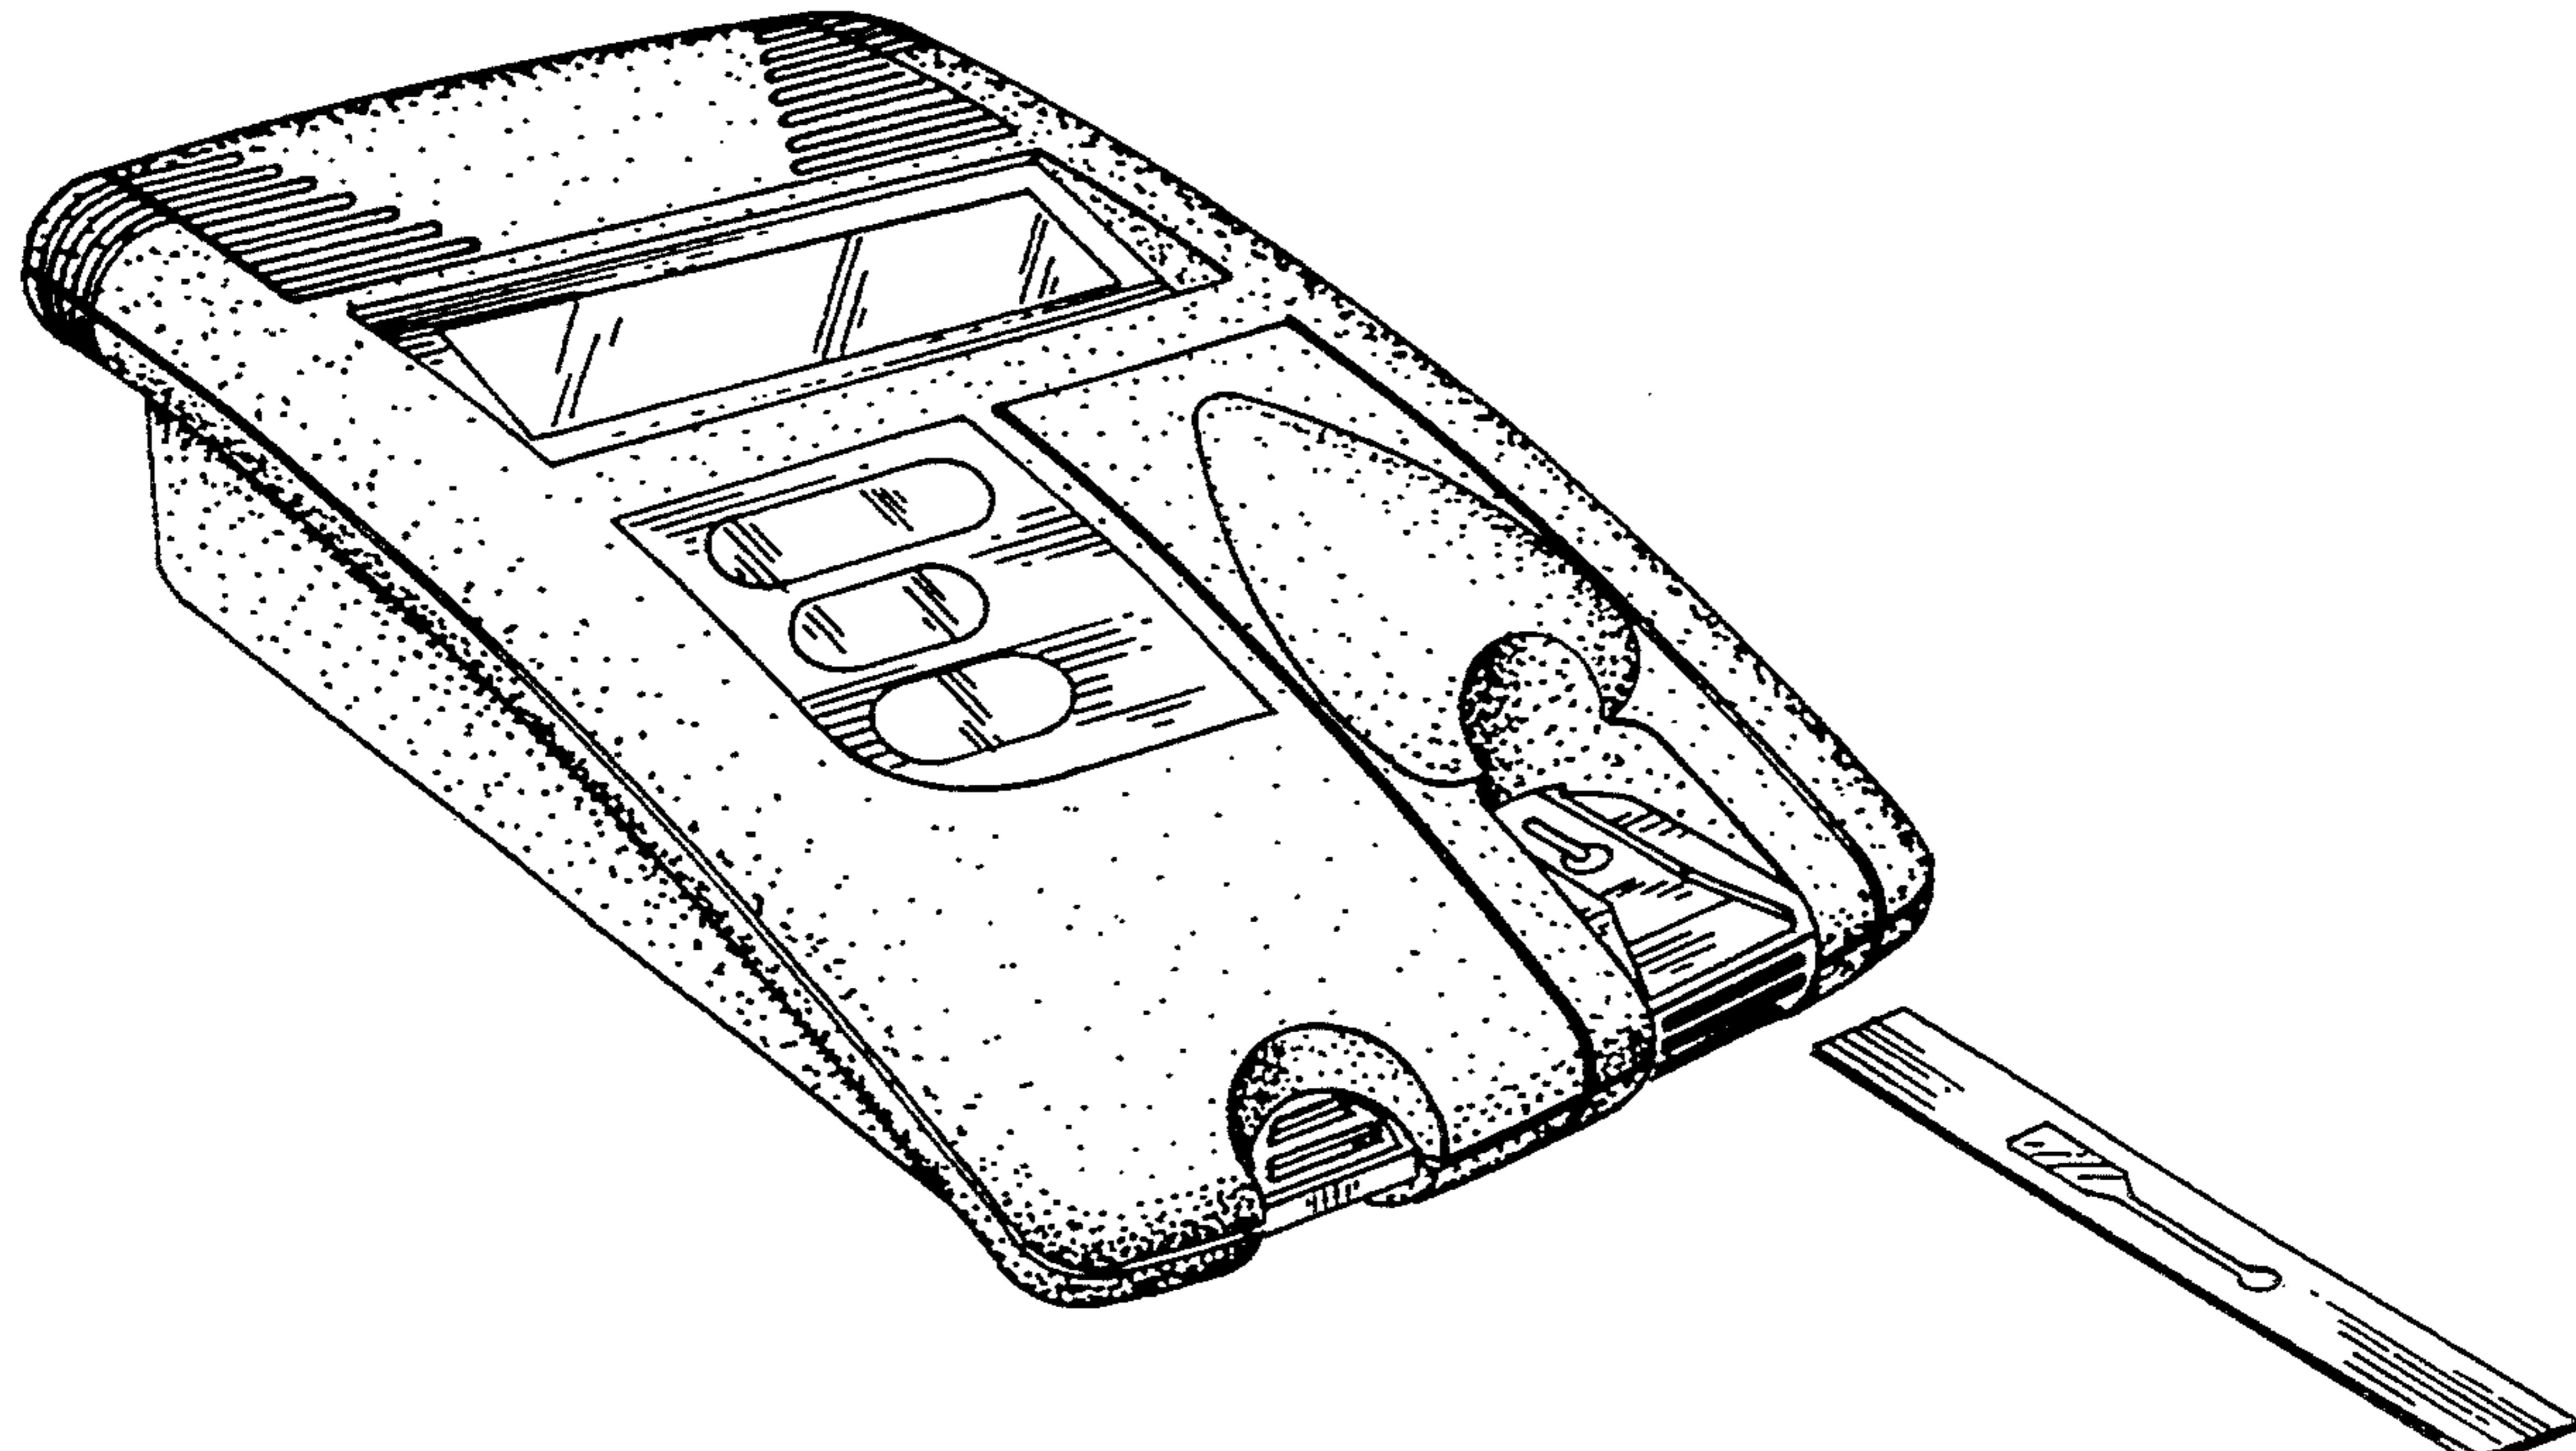

FIG. 6 is a front elevational view of a combined blood coagulation measuring instrument and test strip showing our new design with the test strip inserted therein, the rear elevational view being a mirror image of FIG. 4;

FIG. 7 is a top plan view of the design illustrated in FIG. 6;

FIG. 8 is a right side elevational view of the design illustrated in FIGS. 6-7, with the left side elevational view of the design of FIGS. 6-7 being a mirror image of FIG. 8;

FIG. 9 is a bottom plan view of the design of FIGS. 6-8; and

FIG. 10 is a perspective view thereof, with the test strip shown in separated condition.
