[57] CLAIM

The ornamental design for a flexible nautical hanger, as shown and described.

DESCRIPTION

FIG. 1 is a front elevational view of a first flexible nautical hanger showing my new design;

FIG. 2 is a rear elevational view thereof;

FIG. 3 is a right side elevational view thereof;

FIG. 4 is a left side view thereof;

FIG. 5 is a top view thereof;

FIG. 6 is a bottom view thereof;

FIG. 7 is a front elevational view of a second flexible nautical hanger showing my new design; and,

FIG. 8 is a rear elevational view thereof.

The claimed article is shown broken away in FIGS. 1-4, 7 and 8 to indicate indeterminate length.

The undisclosed side, top and bottom views of the second embodiment are similar in appearance to the side, top and bottom views of the first embodiment except for the absence of the circular fastener.

The contrasting cross-hatched shading represents a nylon material and is understood to cover the entire surface of the strap portion of the hanger.

The broken line portions of the drawings are merely illustrative of the environment and do not constitute part of the design of the claimed invention.
